Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2003 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Active control

Applications of Some Semiactive Control Systems to Benchmark Cable-Stayed Bridge. —A. K. Agrawal, J. N. Yang, and W. L. He; 129(7), 884-94 (2003).

Switching Oil Damper with Built-in Controller for Structural Control. —Haruhiko Kurino, Jun Tagami, Kan Shimizu, and Takuji Kobori; 129(7), 895-904 (2003).

Reliability of Applied Semiactive Structural Control System. —Narito Kurata and Takuji Kobori; 129(7), 914-21 (2003).

Novel Semiactive Friction Controller for Linear Structures against Earthquakes. —W. L. He, A. K. Agrawal, and J. N. Yang; 129(7), 941-50 (2003).

Semiactive Tuned Liquid Column Dampers: Experimental Study. —Swaroop K. Yalla and Ahsan Kareem; 129(7), 960-71 (2003).

"Convexifying" Linear Matrix Inequality Methods for Integrating Structure and Control Design. —Juan F. Camino, M. C. de Oliveira, and R. E. Skelton; 129(7), 978-88 (2003).

Aerodynamics

Aerodynamic Loads on Tall Buildings: Interactive Database. —Yin Zhou, Tracy Kijewski, and Ahsan Kareem; 129(3), 394-404 (2003).

Efficacy of Tuned Mass Dampers for Bridge Flutter Control. —Xinzhong Chen and Ahsan Kareem; 129(10), 1291-300 (2003).

Algorithms

Flexural Design of Reinforced Concrete Frames Using a Genetic Algorithm. —Charles V. Camp, Shahram Pezeshk, and Håkan Hansson; 129(1), 105-15 (2003).

Automated Design of Steel Frames Using Advanced Analysis and Object-Oriented Evolutionary Computation. —Christopher M. Foley and Daniel Schinler; 129(5), 648-60 (2003).

Flexural Design of Reinforced Concrete Frames by Genetic Algorithm. —C. Lee and J. Ahn; 129(6), 762-74 (2003).

Knowledge-Based System on Optimum Design of Liquid Retaining Structures with Genetic Algorithms. — K. W. Chau and F. Albermani; 129(10), 1312-21 (2003).

Parallel Processing Techniques in Structural Engineering Applications. — E. D. Sotelino; 129(12), 1698-706 (2003).

Aluminum

Experimental and Numerical Prediction of Collapse of Flatbar Stiffeners in Aluminum Panels. — Yufeng Zha and Torgeir Moan; 129(2), 160-8 (2003).

Strength Curves for Metal Plates in Compression. — Paul Bezkorovainy, Tim Burns, and Kim J. R. Rasmussen; 129(11), 1433-40 (2003).

Ultimate Compressive Strength of Aluminum Plate Elements. — Yugang Xiao and Craig C. Menzemer; 129(11), 1441-7 (2003).

Analog models

Deflection of Metal Plate Connected Wood Trusses with Nontriangulated Openings. — Kathleen A. Wills Rittenburg and Sashi K. Kunnath; 129(11), 1546-58 (2003).

Arches

Geometry of Submerged Funicular Arches in Cartesian Coordinates. — Y. H. Chai and S. K. Kunnath; 129(8), 1087-92 (2003).

Assessment

System Reliability Assessment by Method of Moments. — Yan-Gang Zhao and Alfredo H-S. Ang; 129(10), 1341-9 (2003).

Axial loads

Plastic Resistance of Pipe Sections: Upper Bound Solution. —Magdi Mohareb; 129(1), 41-8 (2003).

Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. —S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).

Nonlinear Analysis of Axially Loaded Concrete-Filled Tube Columns with Confinement Effect. —Hsuan-Teh Hu, Chiung-Shiann Huang, Ming-Hsien Wu, and Yih-Min Wu; 129(10), 1322-9 (2003).

Axial strain

Analytical Fire Resistance of Axially Restrained Steel Columns. —Z. F. Huang and K. H. Tan; 129(11), 1531-7 (2003).

Base isolation

Fault Tolerance of Semiactive Seismic Isolation. —Henri Gavin, Cenk Alhan, and Natasha Oka; 129(7), 922-32 (2003).

Beam columns

Experimental Study and Calculation of Fire Resistance of Concrete-Filled Hollow Steel Columns. —Lin-Hai Han, Xiao-Ling Zhao, You-Fu Yang, and Jiu-Bin Feng; 129(3), 346-56 (2003).

Modeling Reinforced-Concrete Beam-Column Joints Subjected to Cyclic Loading. —Laura N. Lowes and Arash Altoontash; 129(12), 1686-97 (2003).

Beams

Nonlinear Vibration Characteristics of Damaged Concrete Beams. — S. A. Neild, M. S. Williams, and P. D. McFadden; 129(2), 260-8 (2003).

Effect of Reduced Beam Section Frame Elements on Stiffness of Moment Frames. — Janice J. Chambers, Shaheed Almudhafar, and Frank Stenger; 129(3), 383-93 (2003).

Static and Fatigue Behavior of Reinforced Concrete Beams Strengthened with Steel Plates for Flexure. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(4), 527-35 (2003).

Effect of Creep and Shrinkage on RC Frames with High Beam Stiffness. — Savita Maru, M. Asfaw, R. K. Sharma, and A. K. Nagpal; 129(4), 536-43 (2003).

Shear Capacity of Fiber-Reinforced Polymer-Strengthened Reinforced Concrete Beams: Fiber Reinforced Polymer Rupture. — J. F. Chen and J. G. Teng; 129(5), 615-25 (2003).

Lateral Buckling Strengths of Steel Angle Section Beams. — N. S. Trahair; 129(6), 784-91 (2003).

Cracked Membrane Model: Finite Element Implementation. — Stephen J. Foster and Peter Marti; 129(9), 1155-63 (2003).

Behavior of Reinforced Concrete Beams with Loss of Bond at Longitudinal Reinforcement. —Joakim Jeppsson and Sven Thelandersson; 129(10), 1376-83 (2003).

Lateral-Torsional Buckling of Stepped Beams. —Jong S. Park and J. Michael Stallings; 129(11), 1457-65 (2003).

Local Buckling of Fiber Reinforced Plastic Composite Structural Members with Open and Closed Cross Sections. —László P. Kollár; 129(11), 1503-13 (2003).

Dimensional Analysis of Reinforced Concrete Beams Subjected to Pure Torsion. —D. R. Phatak and H. B. Dhonde; 129(11), 1559-63 (2003).

Cross-Sectional Compactness and Bracing Requirements for HPS483W Girders. —S. J. Thomas and C. J. Earls; 129(12), 1569-83 (2003).

Structural Ductility in Hybrid High Performance Steel Beams. —N. Greco and C. J. Earls; 129(12), 1584-95 (2003).

Beams, support

Shear Compression Failure in Reinforced Concrete Deep Beams. —Prodromos D. Zararis; 129(4), 544-53 (2003).

Bearing capacity

Cold-Formed Steel Channels Subjected to Concentrated Bearing Load. —Ben Young and Gregory J. Hancock; 129(8), 1003-10 (2003).

Bench marks

Phase I Benchmark Control Problem for Seismic Response of Cable-Stayed Bridges. —S. J. Dyke, J. M. Caicedo, G. Turan, L. A. Bergman, and S. Hague; 129(7), 857-72 (2003).

Applications of Some Semiactive Control Systems

Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2003 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Active control

Applications of Some Semiactive Control Systems to Benchmark Cable-Stayed Bridge. —A. K. Agrawal, J. N. Yang, and W. L. He; 129(7), 884-94 (2003).

Switching Oil Damper with Built-in Controller for Structural Control. —Haruhiko Kurino, Jun Tagami, Kan Shimizu, and Takuji Kobori; 129(7), 895-904 (2003).

Reliability of Applied Semiactive Structural Control System. —Narito Kurata and Takuji Kobori; 129(7), 914-21 (2003).

Novel Semiactive Friction Controller for Linear Structures against Earthquakes. —W. L. He, A. K. Agrawal, and J. N. Yang; 129(7), 941-50 (2003).

Semiactive Tuned Liquid Column Dampers: Experimental Study. —Swaroop K. Yalla and Ahsan Kareem; 129(7), 960-71 (2003).

"Convexifying" Linear Matrix Inequality Methods for Integrating Structure and Control Design. —Juan F. Camino, M. C. de Oliveira, and R. E. Skelton; 129(7), 978-88 (2003).

Aerodynamics

Aerodynamic Loads on Tall Buildings: Interactive Database. —Yin Zhou, Tracy Kijewski, and Ahsan Kareem; 129(3), 394-404 (2003).

Efficacy of Tuned Mass Dampers for Bridge Flutter Control. —Xinzhong Chen and Ahsan Kareem; 129(10), 1291-300 (2003).

Algorithms

Flexural Design of Reinforced Concrete Frames Using a Genetic Algorithm. —Charles V. Camp, Shahram Pezeshk, and Håkan Hansson; 129(1), 105-15 (2003).

Automated Design of Steel Frames Using Advanced Analysis and Object-Oriented Evolutionary Computation. —Christopher M. Foley and Daniel Schinler; 129(5), 648-60 (2003).

Flexural Design of Reinforced Concrete Frames by Genetic Algorithm. —C. Lee and J. Ahn; 129(6), 762-74 (2003).

Knowledge-Based System on Optimum Design of Liquid Retaining Structures with Genetic Algorithms. — K. W. Chau and F. Albermani; 129(10), 1312-21 (2003).

Parallel Processing Techniques in Structural Engineering Applications. — E. D. Sotelino; 129(12), 1698-706 (2003).

Aluminum

Experimental and Numerical Prediction of Collapse of Flatbar Stiffeners in Aluminum Panels. — Yufeng Zha and Torgeir Moan; 129(2), 160-8 (2003).

Strength Curves for Metal Plates in Compression. — Paul Bezkorovainy, Tim Burns, and Kim J. R. Rasmussen; 129(11), 1433-40 (2003).

Ultimate Compressive Strength of Aluminum Plate Elements. — Yugang Xiao and Craig C. Menzemer; 129(11), 1441-7 (2003).

Analog models

Deflection of Metal Plate Connected Wood Trusses with Nontriangulated Openings. — Kathleen A. Wills Rittenburg and Sashi K. Kunnath; 129(11), 1546-58 (2003).

Arches

Geometry of Submerged Funicular Arches in Cartesian Coordinates. — Y. H. Chai and S. K. Kunnath; 129(8), 1087-92 (2003).

Assessment

System Reliability Assessment by Method of Moments. — Yan-Gang Zhao and Alfredo H-S. Ang; 129(10), 1341-9 (2003).

Axial loads

Plastic Resistance of Pipe Sections: Upper Bound Solution. —Magdi Mohareb; 129(1), 41-8 (2003).

Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. —S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).

Nonlinear Analysis of Axially Loaded Concrete-Filled Tube Columns with Confinement Effect. —Hsuan-Teh Hu, Chiung-Shiann Huang, Ming-Hsien Wu, and Yih-Min Wu; 129(10), 1322-9 (2003).

Axial strain

Analytical Fire Resistance of Axially Restrained Steel Columns. —Z. F. Huang and K. H. Tan; 129(11), 1531-7 (2003).

Base isolation

Fault Tolerance of Semiactive Seismic Isolation. —Henri Gavin, Cenk Alhan, and Natasha Oka; 129(7), 922-32 (2003).

Beam columns

Experimental Study and Calculation of Fire Resistance of Concrete-Filled Hollow Steel Columns. —Lin-Hai Han, Xiao-Ling Zhao, You-Fu Yang, and Jiu-Bin Feng; 129(3), 346-56 (2003).

Modeling Reinforced-Concrete Beam-Column Joints Subjected to Cyclic Loading. —Laura N. Lowes and Arash Altoontash; 129(12), 1686-97 (2003).

Beams

Nonlinear Vibration Characteristics of Damaged Concrete Beams. — S. A. Neild, M. S. Williams, and P. D. McFadden; 129(2), 260-8 (2003).

Effect of Reduced Beam Section Frame Elements on Stiffness of Moment Frames. — Janice J. Chambers, Shaheed Almudhafar, and Frank Stenger; 129(3), 383-93 (2003).

Static and Fatigue Behavior of Reinforced Concrete Beams Strengthened with Steel Plates for Flexure. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(4), 527-35 (2003).

Effect of Creep and Shrinkage on RC Frames with High Beam Stiffness. — Savita Maru, M. Asfaw, R. K. Sharma, and A. K. Nagpal; 129(4), 536-43 (2003).

Shear Capacity of Fiber-Reinforced Polymer-Strengthened Reinforced Concrete Beams: Fiber Reinforced Polymer Rupture. — J. F. Chen and J. G. Teng; 129(5), 615-25 (2003).

Lateral Buckling Strengths of Steel Angle Section Beams. — N. S. Trahair; 129(6), 784-91 (2003).

Cracked Membrane Model: Finite Element Implementation. — Stephen J. Foster and Peter Marti; 129(9), 1155-63 (2003).

Behavior of Reinforced Concrete Beams with Loss of Bond at Longitudinal Reinforcement. —Joakim Jeppsson and Sven Thelandersson; 129(10), 1376-83 (2003).

Lateral-Torsional Buckling of Stepped Beams. —Jong S. Park and J. Michael Stallings; 129(11), 1457-65 (2003).

Local Buckling of Fiber Reinforced Plastic Composite Structural Members with Open and Closed Cross Sections. —László P. Kollár; 129(11), 1503-13 (2003).

Dimensional Analysis of Reinforced Concrete Beams Subjected to Pure Torsion. —D. R. Phatak and H. B. Dhonde; 129(11), 1559-63 (2003).

Cross-Sectional Compactness and Bracing Requirements for HPS483W Girders. —S. J. Thomas and C. J. Earls; 129(12), 1569-83 (2003).

Structural Ductility in Hybrid High Performance Steel Beams. —N. Greco and C. J. Earls; 129(12), 1584-95 (2003).

Beams, support

Shear Compression Failure in Reinforced Concrete Deep Beams. —Prodromos D. Zararis; 129(4), 544-53 (2003).

Bearing capacity

Cold-Formed Steel Channels Subjected to Concentrated Bearing Load. —Ben Young and Gregory J. Hancock; 129(8), 1003-10 (2003).

Bench marks

Phase I Benchmark Control Problem for Seismic Response of Cable-Stayed Bridges. —S. J. Dyke, J. M. Caicedo, G. Turan, L. A. Bergman, and S. Hague; 129(7), 857-72 (2003).

Applications of Some Semiactive Control Systems

to Benchmark Cable-Stayed Bridge. — A. K. Agrawal, J. N. Yang, and W. L. He; 129(7), 884-94 (2003).

Bending

Lateral Buckling Strengths of Steel Angle Section Beams. — N. S. Trahair; 129(6), 784-91 (2003).

Testing of Steel Pipes Under Bending, Twist, and Shear. — Istemi Faruk Ozkan and Magdi Mohareb; 129(10), 1350-7 (2003).

Bending moments

Calculation of Moments on Top Slab in Single-Cell Box Girders. — Q. Z. Luo, J. Tang, and Q. S. Li; 129(1), 130-4 (2003).

Bolts

Behavior and Modeling of a Bolt Bearing on a Single Plate. — Clinton O. Rex and W. Samuel Easterling; 129(6), 792-800 (2003).

Bonding

Poststrengthening of Concrete Slabs: Full-Scale Testing and Design Recommendations. — Werner Seim, Alvaro Vasquez, Vistasp Karbhari, and Frieder Seible; 129(6), 743-52 (2003).

Failure Behavior and Separation Criterion for Strengthened Concrete Members with Steel Plates. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(9), 1191-8 (2003).

Behavior of Reinforced Concrete Beams with Loss of Bond at Longitudinal Reinforcement. —Joakim Jeppsson and Sven Thelandersson; 129(10), 1376-83 (2003).

Box columns

Strength of Concrete Filled Steel Box Columns Incorporating Interaction Buckling. —Mohanad Mursi and Brian Uy; 129(5), 626-39 (2003).

Box girders

Calculation of Moments on Top Slab in Single-Cell Box Girders. —Q. Z. Luo, J. Tang, and Q. S. Li; 129(1), 130-4 (2003).

Bracing

Tests of Cold-Formed Circular Tubular Braces under Cyclic Axial Loading. —Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 129(4), 507-14 (2003).

Preliminary Analysis of High-Rise Braced Frames with Facade Riggers. —J. C. D. Hoenderkamp and H. H. Snijder; 129(5), 640-7 (2003).

Design of Retrofitting for Damaged Rectangular Hollow Sectioned Struts. —Medhat K. Boutros; 129(8), 1011-8 (2003).

Lateral-Torsional Buckling of Stepped Beams. —Jong S. Park and J. Michael Stallings; 129(11), 1457-65 (2003).

Cross-Sectional Compactness and Bracing Requirements for HPS483W Girders. —S. J. Thomas and C. J. Earls; 129(12), 1569-83 (2003).

Structural Ductility in Hybrid High Performance Steel Beams. —N. Greco and C. J. Earls; 129(12), 1584-95 (2003).

Seismic Response of Concentrically Braced Steel Frames Made with Rectangular Hollow Bracing Members. —R. Tremblay, M.-H. Archambault, and A. Filiatrault; 129(12), 1626-36 (2003).

Brick masonry

Lateral Stiffness of Brick Masonry Infilled Plane Frames. — P. G. Asteris; 129(8), 1071-9 (2003).

Bridge towers

Cyclic Testing of Built-Up Steel Shear Links for the New Bay Bridge. —Cole C. McDaniel, Chia-Ming Uang, and Frieder Seible; 129(6), 801-9 (2003).

Bridges

Cyclic Testing of Built-Up Steel Shear Links for the New Bay Bridge. — Cole C. McDaniel, Chia-Ming Uang, and Frieder Seible; 129(6), 801-9 (2003).

Life-Cycle Reliability-Based Maintenance Cost Optimization of Deteriorating Structures with Emphasis on Bridges. — Jung S. Kong and Dan M. Frangopol; 129(6), 818-28 (2003).

External Prestressing Concrete Columns for Improved Seismic Shear Resistance. — Murat Saatcioglu and Cem Yalcin; 129(8), 1057-70 (2003).

Efficacy of Tuned Mass Dampers for Bridge Flutter Control. — Xinzhong Chen and Ahsan Kareem; 129(10), 1291-300 (2003).

Bridges, cable-stayed

Phase I Benchmark Control Problem for Seismic Response of Cable-Stayed Bridges. — S. J. Dyke, J. M. Caicedo, G. Turan, L. A. Bergman, and S. Hague; 129(7), 857-72 (2003).

Control of Seismically Excited Cable-Stayed Bridge Employing Magnetorheological Fluid Dampers. — Hyung-Jo Jung, Billie F. Spencer, Jr., and In-Won Lee; 129(7), 873-83 (2003).

Applications of Some Semiactive Control Systems to Benchmark Cable-Stayed Bridge. —A. K. Agrawal, J. N. Yang, and W. L. He; 129(7), 884-94 (2003).

Bridges, girder

Nondestructive Crack Detection Algorithm for Full-Scale Bridges. —Jeong-Tae Kim and Norris Stubbs; 129(10), 1358-66 (2003).

Bridges, piers

Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. I: Theory and Formulation. —Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1199-207 (2003).

Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. —Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).

Bridges, steel

Nonlinear Behavior of Heavy Class Steel Truss Bridges. — Razi S. Nagavi and A. Emin Aktan; 129(8), 1113-21 (2003).

Bridges, wooden

Application of Dynamic System Identification to Timber Bridges. —S. T. Peterson, D. I. McLean, and D. G. Pollock; 129(1), 116-24 (2003).

Brittle fracture

Effects of Material Toughness and Plate Thickness on Brittle Fracture of Steel Members. —Hitoshi Kuwamura, Jun Iyama, and Koji Matsui; 129(11), 1475-83 (2003).

Buckling

Local Web Buckling Strength of Coped Steel I Beams. — Michael C. H. Yam, Angus C. C. Lam, V. P. Iu, and J. J. R. Cheng; 129(1), 3-11 (2003).

Effects of Stiffeners on Nonlinear Stability of Self-Erecting Dome. —Vinasithamby Ragavan and Amde M. Amde; 129(1), 49-55 (2003).

Local Buckling of Composite Fiber-Reinforced Plastic Wide-Flange Sections. —Pizhong Qiao and Guiping Zou; 129(1), 125-9 (2003).

Experimental and Numerical Prediction of Collapse of Flatbar Stiffeners in Aluminum Panels. — Yufeng Zha and Torgeir Moan; 129(2), 160-8 (2003).

Experimental Investigation of Cold-Formed Stainless Steel Columns. — Ben Young and Yahua Liu; 129(2), 169-76 (2003).

Experimental Study on Steel Shear Wall with Slits. — Toko Hitaka and Chiaki Matsui; 129(5), 586-95 (2003).

Strength of Concrete Filled Steel Box Columns Incorporating Interaction Buckling. — Mohanad Mursi and Brian Uy; 129(5), 626-39 (2003).

Lateral Buckling Strengths of Steel Angle Section Beams. — N. S. Trahair; 129(6), 784-91 (2003).

Steel–Concrete Composite Plate Girders Subject to Shear Loading. — N. E. Shanmugam and K. Baskar; 129(9), 1230-42 (2003).

Testing of Steel Pipes Under Bending, Twist, and Shear. — Istemi Faruk Ozkan and Magdi Mohareb; 129(10), 1350-7 (2003).

Compression Tests of Channels with Inclined Simple Edge Stiffeners. — Ben Young and Gregory J. Hancock; 129(10), 1403-11 (2003).

Ultimate Compressive Strength of Aluminum Plate Elements. —Yugang Xiao and Craig C. Menzemer; 129(11), 1441-7 (2003).

Lateral-Torsional Buckling of Stepped Beams. —Jong S. Park and J. Michael Stallings; 129(11), 1457-65 (2003).

Local Buckling of Fiber Reinforced Plastic Composite Structural Members with Open and Closed Cross Sections. —László P. Kollár; 129(11), 1503-13 (2003).

Cross-Sectional Compactness and Bracing Requirements for HPS483W Girders. —S. J. Thomas and C. J. Earls; 129(12), 1569-83 (2003).

Structural Ductility in Hybrid High Performance Steel Beams. —N. Greco and C. J. Earls; 129(12), 1584-95 (2003).

Local Buckling Tests on Cold-Formed Steel Beams. — Cheng Yu and Benjamin W. Schafer; 129(12), 1596-606 (2003).

Seismic Response of Concentrically Braced Steel Frames Made with Rectangular Hollow Bracing Members. —R. Tremblay, M.-H. Archambault, and A. Filiatrault; 129(12), 1626-36 (2003).

Form Finding of Sparse Structures with Continuum Topology Optimization. —Salam Rahmatalla and Colby C. Swan; 129(12), 1707-16 (2003).

Building codes

Toward Load and Resistance Factor Design for Fiber-Reinforced Polymer Composite Structures. — Bruce R. Ellingwood; 129(4), 449-58 (2003).

Shear Compression Failure in Reinforced Concrete Deep Beams. —Prodromos D. Zararis; 129(4), 544-53 (2003).

Building frames

Statistics of Single-Degree-of-Freedom Estimate of Displacement for Pushover Analysis of Buildings. — Anil K. Chopra, Rakesh K. Goel, and Chatpan Chintanapakdee; 129(4), 459-69 (2003).

Preliminary Analysis of High-Rise Braced Frames with Facade Riggers. —J. C. D. Hoenderkamp and H. H. Snijder; 129(5), 640-7 (2003).

Flexural Design of Reinforced Concrete Frames by Genetic Algorithm. —C. Lee and J. Ahn; 129(6), 762-74 (2003).

Tests to Structural Collapse of Single Degree of

Freedom Frames Subjected to Earthquake Excitations. — Darren Vian and Michel Bruneau; 129(12), 1676-85 (2003).

Buildings

Experimental Seismic Study of Adjacent Buildings with Fluid Dampers. — Z. Yang, Y. L. Xu, and X. L. Lu; 129(2), 197-205 (2003).

Study on Damping Reduction Factor for Buildings under Earthquake Ground Motions. — Y. Y. Lin and K. C. Chang; 129(2), 206-14 (2003).

Wind Speeds in ASCE 7 Standard Peak-Gust Map: Assessment. — Emil Simiu, Roseanne Wilcox, Fahim Sadek, and James J. Filliben; 129(4), 427-39 (2003).

Damping Evaluation Using Full-Scale Data of Buildings in Japan. — Naoki Satake, Ken-ichi Suda, Toshiharu Arakawa, Atsushi Sasaki, and Yukio Tamura; 129(4), 470-7 (2003).

Experimental Study on Steel Shear Wall with Slits. — Toko Hitaka and Chiaki Matsui; 129(5), 586-95 (2003).

Adaptive Fuzzy Control for Nonlinear Building-Magnetorheological Damper System. —Li Zhou, Chih-Chen Chang, and Li-Xin Wang; 129(7), 905-13 (2003).

Buildings, high-rise

Aerodynamic Loads on Tall Buildings: Interactive Database. —Yin Zhou, Tracy Kijewski, and Ahsan Kareem; 129(3), 394-404 (2003).

Effect of Creep and Shrinkage on RC Frames with High Beam Stiffness. —Savita Maru, M. Asfaw, R. K. Sharma, and A. K. Nagpal; 129(4), 536-43 (2003).

Preliminary Analysis of High-Rise Braced Frames with Facade Riggers. —J. C. D. Hoenderkamp and H. H. Snijder; 129(5), 640-7 (2003).

Buildings, residential

Quasi-Static Reversed Cyclic Response of Level and Stepped Cripple Walls. —Y. H. Chai, Tara C. Hutchinson, and Steven M. Vukazich; 129(5), 567-75 (2003).

California

Quasi-Static Reversed Cyclic Response of Level and Stepped Cripple Walls. —Y. H. Chai, Tara C. Hutchinson, and Steven M. Vukazich; 129(5), 567-75 (2003).

Cyclic Testing of Built-Up Steel Shear Links for the New Bay Bridge. —Cole C. McDaniel, Chia-Ming Uang, and Frieder Seible; 129(6), 801-9 (2003).

Classification

Classification Approach for Reliability Analysis with Stochastic Finite-Element Modeling. —Jorge E. Hurtado and Diego A. Alvarez; 129(8), 1141-9 (2003).

Cold-formed steel

Experimental Investigation of Cold-Formed Stainless Steel Columns. —Ben Young and Yahua Liu; 129(2), 169-76 (2003).

Tests of Cold-Formed Circular Tubular Braces under Cyclic Axial Loading. —Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 129(4), 507-14 (2003).

Cold-Formed Steel Channels Subjected to Concentrated Bearing Load. —Ben Young and Gregory J. Hancock; 129(8), 1003-10 (2003).

Compression Tests of Channels with Inclined Simple Edge Stiffeners. —Ben Young and Gregory J. Hancock; 129(10), 1403-11 (2003).

Local Buckling Tests on Cold-Formed Steel Beams. — Cheng Yu and Benjamin W. Schafer; 129(12), 1596-606 (2003).

Collapse

Experimental and Numerical Prediction of Collapse of Flatbar Stiffeners in Aluminum Panels. — Yufeng Zha and Torgeir Moan; 129(2), 160-8 (2003).

Tests to Structural Collapse of Single Degree of Freedom Frames Subjected to Earthquake Excitations. — Darren Vian and Michel Bruneau; 129(12), 1676-85 (2003).

Dynamic Instability of Simple Structural Systems. — Eduardo Miranda and Sinan D. Akkar; 129(12), 1722-6 (2003).

Columns

Fire Resistance of Four-Face Heated Reinforced Concrete Columns. — K. H. Tan and Y. Yao; 129(9), 1220-9 (2003).

Nonlinear Analysis of Axially Loaded Concrete-Filled Tube Columns with Confinement Effect. — Hsuan-Teh Hu, Chiung-Shiann Huang, Ming-Hsien Wu, and Yih-Min Wu; 129(10), 1322-9 (2003).

Compression Tests of Channels with Inclined Simple Edge Stiffeners. —Ben Young and Gregory J. Hancock; 129(10), 1403-11 (2003).

Local Buckling of Fiber Reinforced Plastic Composite Structural Members with Open and Closed Cross Sections. —László P. Kollár; 129(11), 1503-13 (2003).

Compaction

Cross-Sectional Compactness and Bracing Requirements for HPS483W Girders. —S. J. Thomas and C. J. Earls; 129(12), 1569-83 (2003).

Structural Ductility in Hybrid High Performance Steel Beams. —N. Greco and C. J. Earls; 129(12), 1584-95 (2003).

Composite beams

Shear Connection Nonlinearity and Deflections of Steel–Concrete Composite Beams: A Simplified Method. —Ciro Faella, Enzo Martinelli, and Emidio Nigro; 129(1), 12-20 (2003).

Steel–Concrete Composite Beams Considering Shear Slip Effects. —Jianguo Nie and C. S. Cai; 129(4), 495-506 (2003).

Ultimate Strength of Ribbed Slab Composite Beams with Web Openings. —J. W. Park, C. H. Kim, and S. C. Yang; 129(6), 810-7 (2003).

Behavior of Shear Studs Subjected to Fully Reversed Cyclic Loading. —Scott A. Civjan and Prabhjeet Singh; 129(11), 1466-74 (2003).

Composite columns

Long-Term Behavior and Strength of Partially Encased Composite Columns Made with Built-Up Steel Shapes. —Thierry Chicoine, Bruno Massicotte, and Robert Tremblay; 129(2), 141-50 (2003).

Strength of Concrete Filled Steel Box Columns Incorporating Interaction Buckling. —Mohanad Mursi and Brian Uy; 129(5), 626-39 (2003).

Composite materials

Local Buckling of Composite Fiber-Reinforced Plastic Wide-Flange Sections. —Pizhong Qiao and Guiping Zou; 129(1), 125-9 (2003).

Energy-Dissipating Polymer Matrix Composite-Infill Wall System for Seismic Retrofitting. —Amjad J. Aref and Woo-Young Jung; 129(4), 440-8 (2003).

Rotational Stiffness of Rectangular Hollow Sections Composite Joints. — L. A. P. Silva, L. F. N. Neves, and F. C. T. Gomes; 129(4), 487-94 (2003).

Adaptive Wood Composite: Experiment. — Watanachai Smittakorn and Paul R. Heyliger; 129(5), 699-702 (2003).

Improving the Strength and Ductility of Rectangular Reinforced Concrete Columns through Composite Partial Interaction: Tests. — Y. F. Wu, M. C. Griffith, and D. J. Oehlers; 129(9), 1183-90 (2003).

Steel–Concrete Composite Plate Girders Subject to Shear Loading. — N. E. Shanmugam and K. Baskar; 129(9), 1230-42 (2003).

Feasibility and Optimization of Rigidified Inflatable Structures for Housing. — Steven Van Dessel, Achille Messac, Anoop A. Mullur, and Amy A. Farina; 129(11), 1494-502 (2003).

Composite structures

Toward Load and Resistance Factor Design for Fiber-Reinforced Polymer Composite Structures. — Bruce R. Ellingwood; 129(4), 449-58 (2003).

Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. I: Theoretical Development. — Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1093-102 (2003).

Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. II: Validations. —Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1103-12 (2003).

Behavior of Shear Studs Subjected to Fully Reversed Cyclic Loading. —Scott A. Civjan and Prabhjeet Singh; 129(11), 1466-74 (2003).

Local Buckling of Fiber Reinforced Plastic Composite Structural Members with Open and Closed Cross Sections. —László P. Kollár; 129(11), 1503-13 (2003).

Connectors for Timber–Lightweight Concrete Composite Structures. —Eric Steinberg, Ricky Selle, and Thorsten Faust; 129(11), 1538-45 (2003).

Compression

Moment Magnifier Method for Long-Term Behavior of Flat Plates Subjected to In-Plane Compression. — K. Choi, H. Park, and Y. Shin; 129(1), 87-95 (2003).

Microplane Model for Reinforced-Concrete Planar Members in Tension-Compression. —Honggun Park and Hakjun Kim; 129(3), 337-45 (2003).

Shear Compression Failure in Reinforced Concrete Deep Beams. —Prodromos D. Zararis; 129(4), 544-53 (2003).

Cracked Membrane Model: Finite Element Implementation. — Stephen J. Foster and Peter Marti; 129(9), 1155-63 (2003).

Compression tests

Compression Tests of Channels with Inclined Simple Edge Stiffeners. —Ben Young and Gregory J. Hancock; 129(10), 1403-11 (2003).

Compressive strength

Neural Network Modeling of Confined Compressive Strength and Strain of Circular Concrete Columns. — Andres W. C. Oreta and Kazuhiko Kawashima; 129(4), 554-61 (2003).

Design of Retrofitting for Damaged Rectangular Hollow Sectioned Struts. —Medhat K. Boutros; 129(8), 1011-8 (2003).

Strength Curves for Metal Plates in Compression.

—Paul Bezkorovainy, Tim Burns, and Kim J. R. Rasmussen; 129(11), 1433-40 (2003).
Ultimate Compressive Strength of Aluminum Plate Elements. — Yugang Xiao and Craig C. Menzemer; 129(11), 1441-7 (2003).

Computation

Automated Design of Steel Frames Using Advanced Analysis and Object-Oriented Evolutionary Computation. — Christopher M. Foley and Daniel Schinler; 129(5), 648-60 (2003).

Concentrated loads

Models for Concentrated Load Performance Assessment of Isotropic Wood Floor Sheathing. — Wilfred H. Thomas; 129(8), 1080-6 (2003).

Conceptual design

Hershey Arena: Anton Tedesko's Pioneering Form. — Edmond P. Saliklis and David P. Billington; 129(3), 278-85 (2003).

Concrete

Shear Connection Nonlinearity and Deflections of Steel–Concrete Composite Beams: A Simplified Method. —Ciro Faella, Enzo Martinelli, and Emidio Nigro; 129(1), 12-20 (2003).
Strengthening of Steel-Concrete Composite Girders Using Carbon Fiber Reinforced Polymers Sheets. — M. Tavakkolizadeh and H. Saadatmanesh; 129(1), 30-40 (2003).
Concrete-Filled Hollow Structural Steel Columns after Exposure to ISO-834 Fire Standard. —Lin-Hai Han and Jing-si Huo; 129(1), 68-78 (2003).
Experimental Study and Calculation of Fire Resistance of Concrete-Filled Hollow Steel Columns. —Lin-Hai Han, Xiao-Ling Zhao, You-Fu Yang, and Jiu-Bin Feng; 129(3), 346-56 (2003).
Concrete Uniaxial Tensile Strength and Cylinder Splitting Test. —Zhuhai Lin and Laurence Wood; 129(5), 692-8 (2003).
Connectors for Timber–Lightweight Concrete Composite Structures. —Eric Steinberg, Ricky Selle, and Thorsten Faust; 129(11), 1538-45 (2003).

Concrete columns

Uniaxial Confinement Model for Normal- and High-Strength Concrete Columns. —Frédéric Légeron and Patrick Paultre; 129(2), 241-52 (2003).
Effect of Strength and Fiber Reinforcement on Fire Resistance of High-Strength Concrete Columns. —V. K. R. Kodur, Fu-Ping Cheng, Tien-Chih Wang, and M. A. Sultan; 129(2), 253-9 (2003).
Drift Limits of High-Strength Concrete Columns Subjected to Load Reversals. —Adolfo B. Matamoros and Mete A. Sozen; 129(3), 297-313 (2003).
Early Cover Spalling in High-Strength Concrete Columns. — Sungjin Bae and Oguzhan Bayrak; 129(3), 314-23 (2003).
Neural Network Modeling of Confined Compressive Strength and Strain of Circular Concrete Columns. — Andres W. C. Oreta and Kazuhiko Kawashima; 129(4), 554-61 (2003).
Retrofit of Reinforced Concrete Columns Using Partially Stiffened Steel Jackets. —Yan Xiao and Hui Wu; 129(6), 725-32 (2003).
Modeling Confinement Efficiency of Reinforced Concrete Columns with Rectilinear Transverse Steel Using Artificial Neural Networks. —Chao-Wei Tang, How-Ji Chen, and Tsong Yen; 129(6), 775-83 (2003).
External Prestressing Concrete Columns for Improved Seismic Shear Resistance. — Murat Saatcioglu and Cem Yalcin; 129(8), 1057-70 (2003).
Reliability of Fiber-Reinforced Polymer-Confined Reinforced Concrete Columns. — Dimitri V. Val; 129(8), 1122-30 (2003).
Improving the Strength and Ductility of Rectangular Reinforced Concrete Columns through Composite Partial Interaction: Tests. — Y. F. Wu, M. C. Griffith, and D. J. Oehlers; 129(9), 1183-90 (2003).
Modeling Reinforced-Concrete Beam-Column Joints Subjected to Cyclic Loading. — Laura N. Lowes and Arash Altoontash; 129(12), 1686-97 (2003).

Concrete construction

Strength of Concrete Filled Steel Box Columns Incorporating Interaction Buckling. — Mohanad Mursi and Brian Uy; 129(5), 626-39 (2003).

Concrete masonry

Three-Strut Model for Concrete Masonry-Infilled Steel Frames. —Wael W. El-Dakhakhni, Mohamed Elgaaly, and Ahmad A. Hamid; 129(2), 177-85 (2003).
Cyclic Performance of Concrete-Backed Stone Masonry Walls. —Mohamed A. H. Abdel-Halim and Samer A. Barakat; 129(5), 596-605 (2003).

Concrete slabs

Poststrengthening of Concrete Slabs: Full-Scale Testing and Design Recommendations. —Werner Seim, Alvaro Vasquez, Vistasp Karbhari, and Frieder Seible; 129(6), 743-52 (2003).
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. I: Theoretical Development. -- Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1093-102 (2003).
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. II: Validations. —Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1103-12 (2003).
Alternative Shear Reinforcement for Reinforced Concrete Flat Slabs. —K. Pilakoutas and X. Li; 129(9), 1164-72 (2003).

Concrete structures

Tendon Model for Nonlinear Analysis of Externally Prestressed Concrete Structures. —Xiao-Han Wu and Xilin Lu; 129(1), 96-104 (2003).
Nonlinear Vibration Characteristics of Damaged Concrete Beams. —S. A. Neild, M. S. Williams, and P. D. McFadden; 129(2), 260-8 (2003).
Static and Fatigue Behavior of Reinforced Concrete Beams Strengthened with Steel Plates for Flexure. —Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(4), 527-35 (2003).
Life-Cycle Modeling of Corrosion-Affected Concrete Structures: Propagation. —C. Q. Li; 129(6), 753-61 (2003).
Flexural Design of Reinforced Concrete Frames by Genetic Algorithm. —C. Lee and J. Ahn; 129(6), 762-74 (2003).
Failure Behavior and Separation Criterion for Strengthened Concrete Members with Steel Plates. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(9), 1191-8 (2003).

Concrete, post-tensioned

Tendon Model for Nonlinear Analysis of Externally Prestressed Concrete Structures. —Xiao-Han Wu and Xilin Lu; 129(1), 96-104 (2003).

Concrete, precast

Seismic Performance of Precast Reinforced and Prestressed Concrete Walls. — Tony Holden, Jose Restrepo, and John B. Mander; 129(3), 286-96 (2003).

Concrete, prestressed

Tendon Model for Nonlinear Analysis of Externally Prestressed Concrete Structures. — Xiao-Han Wu and Xilin Lu; 129(1), 96-104 (2003).
External Prestressing Concrete Columns for Improved Seismic Shear Resistance. — Murat Saatcioglu and Cem Yalcin; 129(8), 1057-70 (2003).

Concrete, reinforced

Flexural Design of Reinforced Concrete Frames Using a Genetic Algorithm. — Charles V. Camp, Shahram Pezeshk, and Håkan Hansson; 129(1), 105-15 (2003).
Seismic Performance of Precast Reinforced and Prestressed Concrete Walls. — Tony Holden, Jose Restrepo, and John B. Mander; 129(3), 286-96 (2003).
Drift Limits of High-Strength Concrete Columns Subjected to Load Reversals. —Adolfo B. Matamoros and Mete A. Sozen; 129(3), 297-313 (2003).
Microplane Model for Reinforced-Concrete Planar Members in Tension-Compression. —Honggun Park and Hakjun Kim; 129(3), 337-45 (2003).
Static and Fatigue Behavior of Reinforced Concrete Beams Strengthened with Steel Plates for Flexure. —Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(4), 527-35 (2003).
Shear Compression Failure in Reinforced Concrete Deep Beams. —Prodromos D. Zararis; 129(4), 544-53 (2003).
Seismic Retrofit of Shear Walls with Headed Bars and Carbon Fiber Wrap. —James Paterson and Denis Mitchell; 129(5), 606-14 (2003).
Shear Capacity of Fiber-Reinforced Polymer-Strengthened Reinforced Concrete Beams: Fiber Reinforced Polymer Rupture. —J. F. Chen and J. G. Teng; 129(5), 615-25 (2003).
Tension Stiffening and Crack Formation in Reinforced Concrete Members with Fiber-Reinforced Polymer Sheets. —Yuichi Sato and Frank J. Vecchio; 129(6), 717-24 (2003).
Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. —S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).
Flexural Design of Reinforced Concrete Frames by Genetic Algorithm. —C. Lee and J. Ahn; 129(6), 762-74 (2003).
Reliability of Fiber-Reinforced Polymer-Confined Reinforced Concrete Columns. —Dimitri V. Val; 129(8), 1122-30 (2003).
Cracked Membrane Model: Finite Element Implementation. — Stephen J. Foster and Peter Marti; 129(9), 1155-63 (2003).
Alternative Shear Reinforcement for Reinforced Concrete Flat Slabs. —K. Pilakoutas and X. Li; 129(9), 1164-72 (2003).
Punching Shear Strengthening of Reinforced Concrete Flat Plates Using Carbon Fiber Reinforced Polymers. —Baris Binici and Oguzhan Bayrak; 129(9), 1173-82 (2003).
Improving the Strength and Ductility of Rectangular Reinforced Concrete Columns through Com-

posite Partial Interaction: Tests. — Y. F. Wu, M. C. Griffith, and D. J. Oehlers; 129(9), 1183-90 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. I: Theory and Formulation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1199-207 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).
Fire Resistance of Four-Face Heated Reinforced Concrete Columns. — K. H. Tan and Y. Yao; 129(9), 1220-9 (2003).
Behavior of Reinforced Concrete Beams with Loss of Bond at Longitudinal Reinforcement. — Joakim Jeppsson and Sven Thelandersson; 129(10), 1376-83 (2003).
Influence of Bond Slip on Crack Spacing in Numerical Modeling of Reinforced Concrete. —G. Chen and G. Baker; 129(11), 1514-21 (2003).
Dimensional Analysis of Reinforced Concrete Beams Subjected to Pure Torsion. —D. R. Phatak and H. B. Dhonde; 129(11), 1559-63 (2003).

Confinement

Uniaxial Confinement Model for Normal- and High-Strength Concrete Columns. —Frédéric Légeron and Patrick Paultre; 129(2), 241-52 (2003).
Seismic Retrofit of Shear Walls with Headed Bars and Carbon Fiber Wrap. —James Paterson and Denis Mitchell; 129(5), 606-14 (2003).
Retrofit of Reinforced Concrete Columns Using Partially Stiffened Steel Jackets. —Yan Xiao and Hui Wu; 129(6), 725-32 (2003).
Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. —S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).
Modeling Confinement Efficiency of Reinforced Concrete Columns with Rectilinear Transverse Steel Using Artificial Neural Networks. —Chao-Wei Tang, How-Ji Chen, and Tsong Yen; 129(6), 775-83 (2003).
Reliability of Fiber-Reinforced Polymer-Confined Reinforced Concrete Columns. —Dimitri V. Val; 129(8), 1122-30 (2003).
Nonlinear Analysis of Axially Loaded Concrete-Filled Tube Columns with Confinement Effect. —Hsuan-Teh Hu, Chiung-Shiann Huang, Ming-Hsien Wu, and Yih-Min Wu; 129(10), 1322-9 (2003).

Connections

Shear Connection Nonlinearity and Deflections of Steel–Concrete Composite Beams: A Simplified Method. —Ciro Faella, Enzo Martinelli, and Emidio Nigro; 129(1), 12-20 (2003).
Effect of Reduced Beam Section Frame Elements on Stiffness of Moment Frames. —Janice J. Chambers, Shaheed Almudhafar, and Frank Stenger; 129(3), 383-93 (2003).
Behavior and Modeling of a Bolt Bearing on a Single Plate. —Clinton O. Rex and W. Samuel Easterling; 129(6), 792-800 (2003).
Lap Splice Steel Connections with Stainless Steel Nails. — Maura Lecce and Jeffrey A. Packer; 129(9), 1250-8 (2003).
Connectors for Timber–Lightweight Concrete Composite Structures. — Eric Steinberg, Ricky Selle, and Thorsten Faust; 129(11), 1538-45 (2003).

Connections, bolted

Nonlinear Analysis as a Diagnostic Tool for the Strengthening of an Old Wooden Dome. — Alessandra Marini and Paolo Riva; 129(10), 1412-21 (2003).
Cyclic Load Tests and Analysis of Bolted Top-and-Seat Angle Connections. — Maria M. Garlock, James M. Ricles, and Richard Sause; 129(12), 1615-25 (2003).

Connections, semirigid

Steel Semirigid Column–Tree Moment Resisting Frame Seismic Behavior. — Kurt Michael McMullin and Abolhassan Astaneh-Asl; 129(9), 1243-9 (2003).

Connections, welded

Welded Tee-to-HSS Connections. — N. Kosteski and J. A. Packer; 129(2), 151-9 (2003).
Longitudinal Plate and Through Plate-to-Hollow Structural Section Welded Connections. —N. Kosteski and J. A. Packer; 129(4), 478-86 (2003).
Experimental Investigation on European Welded Connections. — Elena Mele, Luis Calado, and Antonello De Luca; 129(10), 1301-11 (2003).

Connectors, mechanical

Connectors for Timber–Lightweight Concrete Composite Structures. —Eric Steinberg, Ricky Selle, and Thorsten Faust; 129(11), 1538-45 (2003).

Constitutive models

Concrete Uniaxial Tensile Strength and Cylinder Splitting Test. —Zhuhai Lin and Laurence Wood; 129(5), 692-8 (2003).

Control methods

Phase I Benchmark Control Problem for Seismic Response of Cable-Stayed Bridges. —S. J. Dyke, J. M. Caicedo, G. Turan, L. A. Bergman, and S. Hague; 129(7), 857-72 (2003).
Control of Seismically Excited Cable-Stayed Bridge Employing Magnetorheological Fluid Dampers. — Hyung-Jo Jung, Billie F. Spencer, Jr., and In-Won Lee; 129(7), 873-83 (2003).
Adaptive Fuzzy Control for Nonlinear Building-Magnetorheological Damper System. —Li Zhou, Chih-Chen Chang, and Li-Xin Wang; 129(7), 905-13 (2003).
Control of a Civil Structure Using an Electric Machine with Semiactive Capability. —J. T. Scruggs and W. D. Iwan; 129(7), 951-9 (2003).
Active Multiple Tuned Mass Dampers: A New Control Strategy. —Chunxiang Li, Yanxia Liu, and Zhaomin Wang; 129(7), 972-7 (2003).
"Convexifying" Linear Matrix Inequality Methods for Integrating Structure and Control Design. —Juan F. Camino, M. C. de Oliveira, and R. E. Skelton; 129(7), 978-88 (2003).
Identification of Simplified Models Using Adaptive Control Techniques. —Michael S. Wrobleski and Henry T. Y. Yang; 129(7), 989-97 (2003).

Control systems

Applications of Some Semiactive Control Systems to Benchmark Cable-Stayed Bridge. — A. K. Agrawal, J. N. Yang, and W. L. He; 129(7), 884-94 (2003).
Semiactive Structural-Control Based on Variable Slip-Force Level Dampers. — Akira Nishitani, Yoshihiro Nitta, and Yoshiki Ikeda; 129(7), 933-40 (2003).

Corrosion

Life-Cycle Modeling of Corrosion-Affected Concrete Structures: Propagation. — C. Q. Li; 129(6), 753-61 (2003).
Probabilistic Model for Marine Corrosion of Steel for Structural Reliability Assessment. — Robert E. Melchers; 129(11), 1484-93 (2003).

Cost control

Life-Cycle Reliability-Based Maintenance Cost Optimization of Deteriorating Structures with Emphasis on Bridges. — Jung S. Kong and Dan M. Frangopol; 129(6), 818-28 (2003).

Costs

Evaluation of Expected Life-Cycle Maintenance Cost of Deteriorating Structures. — Jung S. Kong and Dan M. Frangopol; 129(5), 682-91 (2003).

Crack propagation

Fatigue Strength of Steel Girders Strengthened with Carbon Fiber Reinforced Polymer Patch. —M. Tavakkolizadeh and H. Saadatmanesh; 129(2), 186-96 (2003).
Numerical Analysis of Multiple Discrete Cracks in Concrete Dams Using Extended Fictitious Crack Model. —Zihai Shi, Masaki Suzuki, and Masaaki Nakano; 129(3), 324-36 (2003).

Cracking

Shear Connection Nonlinearity and Deflections of Steel–Concrete Composite Beams: A Simplified Method. —Ciro Faella, Enzo Martinelli, and Emidio Nigro; 129(1), 12-20 (2003).
Numerical Analysis of Multiple Discrete Cracks in Concrete Dams Using Extended Fictitious Crack Model. —Zihai Shi, Masaki Suzuki, and Masaaki Nakano; 129(3), 324-36 (2003).
Tension Stiffening and Crack Formation in Reinforced Concrete Members with Fiber-Reinforced Polymer Sheets. —Yuichi Sato and Frank J. Vecchio; 129(6), 717-24 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. I: Theory and Formulation. —Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1199-207 (2003).
Nondestructive Crack Detection Algorithm for Full-Scale Bridges. —Jeong-Tae Kim and Norris Stubbs; 129(10), 1358-66 (2003).
Influence of Bond Slip on Crack Spacing in Numerical Modeling of Reinforced Concrete. —G. Chen and G. Baker; 129(11), 1514-21 (2003).

Creep

Effect of Creep and Shrinkage on RC Frames with High Beam Stiffness. —Savita Maru, M. Asfaw, R. K. Sharma, and A. K. Nagpal; 129(4), 536-43 (2003).

Cross sections

Local Buckling of Fiber Reinforced Plastic Composite Structural Members with Open and Closed Cross Sections. —László P. Kollár; 129(11), 1503-13 (2003).

Cyclic loads
Tests of Cold-Formed Circular Tubular Braces under Cyclic Axial Loading. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 129(4), 507-14 (2003).
Experimental Investigation on European Welded Connections. — Elena Mele, Luis Calado, and Antonello De Luca; 129(10), 1301-11 (2003).
Effects of Loading Protocol on the Cyclic Response of Woodframe Shearwalls. — Kip Gatto and Chia-Ming Uang; 129(10), 1384-93 (2003).
Behavior of Shear Studs Subjected to Fully Reversed Cyclic Loading. — Scott A. Civjan and Prabhjeet Singh; 129(11), 1466-74 (2003).
Cyclic Load Tests and Analysis of Bolted Top-and-Seat Angle Connections. — Maria M. Garlock, James M. Ricles, and Richard Sause; 129(12), 1615-25 (2003).
Behavior of Roof Deck Diaphragms under Quasi-static Cyclic Loading. — Hesham S. Essa, Robert Tremblay, and Colin A. Rogers; 129(12), 1658-66 (2003).
Modeling Reinforced-Concrete Beam-Column Joints Subjected to Cyclic Loading. —Laura N. Lowes and Arash Altoontash; 129(12), 1686-97 (2003).

Cyclic strength
Cyclic Performance of Concrete-Backed Stone Masonry Walls. —Mohamed A. H. Abdel-Halim and Samer A. Barakat; 129(5), 596-605 (2003).
Behavior of Shear Studs Subjected to Fully Reversed Cyclic Loading. —Scott A. Civjan and Prabhjeet Singh; 129(11), 1466-74 (2003).

Cyclic tests
Experimental Study on Steel Shear Wall with Slits. —Toko Hitaka and Chiaki Matsui; 129(5), 586-95 (2003).
Cyclic Testing of Built-Up Steel Shear Links for the New Bay Bridge. —Cole C. McDaniel, Chia-Ming Uang, and Frieder Seible; 129(6), 801-9 (2003).

Damage
Application of Dynamic System Identification to Timber Bridges. —S. T. Peterson, D. I. McLean, and D. G. Pollock; 129(1), 116-24 (2003).
Nonlinear Vibration Characteristics of Damaged Concrete Beams. —S. A. Neild, M. S. Williams, and P. D. McFadden; 129(2), 260-8 (2003).

Damage accumulation
Optimal *S-N* Testing for Variable-Amplitude Fatigue Applications. —Loren D. Lutes, Shahram Sarkani, David P. Kihl, and Jeffrey E. Beach; 129(6), 829-37 (2003).

Damage assessment
Evaluation of Damage and P-Δ Effects for Systems Under Earthquake Excitation. —Eric B. Williamson; 129(8), 1036-46 (2003).

Damping
Experimental Seismic Study of Adjacent Buildings with Fluid Dampers. —Z. Yang, Y. L. Xu, and X. L. Lu; 129(2), 197-205 (2003).
Study on Damping Reduction Factor for Buildings under Earthquake Ground Motions. —Y. Y. Lin and K. C. Chang; 129(2), 206-14 (2003).
Accuracy of Time History Analysis of Impulses. —Shuenn-Yih Chang; 129(3), 357-72 (2003).
Damping in Cantilevered Traffic Signal Structures under Forced Vibration. —P. S. McManus, H. R. Hamilton, III, and J. A. Puckett; 129(3), 373-82 (2003).
Damping Evaluation Using Full-Scale Data of Buildings in Japan. — Naoki Satake, Ken-ichi Suda, Toshiharu Arakawa, Atsushi Sasaki, and Yukio Tamura; 129(4), 470-7 (2003).
Influence of Hysteretic Behavior on Equivalent Period and Damping of Structural Systems. — Wing-Pin Kwan and Sarah L. Billington; 129(5), 576-85 (2003).
Control of Seismically Excited Cable-Stayed Bridge Employing Magnetorheological Fluid Dampers. — Hyung-Jo Jung, Billie F. Spencer, Jr., and In-Won Lee; 129(7), 873-83 (2003).
Switching Oil Damper with Built-in Controller for Structural Control. — Haruhiko Kurino, Jun Tagami, Kan Shimizu, and Takuji Kobori; 129(7), 895-904 (2003).
Adaptive Fuzzy Control for Nonlinear Building-Magnetorheological Damper System. — Li Zhou, Chih-Chen Chang, and Li-Xin Wang; 129(7), 905-13 (2003).
Reliability of Applied Semiactive Structural Control System. —Narito Kurata and Takuji Kobori; 129(7), 914-21 (2003).
Fault Tolerance of Semiactive Seismic Isolation. —Henri Gavin, Cenk Alhan, and Natasha Oka; 129(7), 922-32 (2003).
Semiactive Structural-Control Based on Variable Slip-Force Level Dampers. —Akira Nishitani, Yoshihiro Nitta, and Yoshiki Ikeda; 129(7), 933-40 (2003).
Novel Semiactive Friction Controller for Linear Structures against Earthquakes. —W. L. He, A. K. Agrawal, and J. N. Yang; 129(7), 941-50 (2003).
Control of a Civil Structure Using an Electric Machine with Semiactive Capability. —J. T. Scruggs and W. D. Iwan; 129(7), 951-9 (2003).
Semiactive Tuned Liquid Column Dampers: Experimental Study. —Swaroop K. Yalla and Ahsan Kareem; 129(7), 960-71 (2003).
Active Multiple Tuned Mass Dampers: A New Control Strategy. —Chunxiang Li, Yanxia Liu, and Zhaomin Wang; 129(7), 972-7 (2003).
Advances in Ritz Vector Identification. —Thomas Boxoen and David C. Zimmerman; 129(8), 1131-40 (2003).
Efficacy of Tuned Mass Dampers for Bridge Flutter Control. —Xinzhong Chen and Ahsan Kareem; 129(10), 1291-300 (2003).
Design of Amplified Structural Damping Using Optimal Considerations. —Yuri Ribakov and Andrei M. Reinhorn; 129(10), 1422-7 (2003).
Tests to Structural Collapse of Single Degree of Freedom Frames Subjected to Earthquake Excitations. — Darren Vian and Michel Bruneau; 129(12), 1676-85 (2003).

Dams, concrete
Numerical Analysis of Multiple Discrete Cracks in Concrete Dams Using Extended Fictitious Crack Model. —Zihai Shi, Masaki Suzuki, and Masaaki Nakano; 129(3), 324-36 (2003).

Data analysis
Damping Evaluation Using Full-Scale Data of Buildings in Japan. —Naoki Satake, Ken-ichi Suda, Toshiharu Arakawa, Atsushi Sasaki, and Yukio Tamura; 129(4), 470-7 (2003).

Data collection
Load-Sharing and Redistribution in a One-Story Woodframe Building. — Phillip J. Paevere, Greg C. Foliente, and Bo Kasal; 129(9), 1275-84 (2003).

Databases
Aerodynamic Loads on Tall Buildings: Interactive Database. — Yin Zhou, Tracy Kijewski, and Ahsan Kareem; 129(3), 394-404 (2003).
Damping Evaluation Using Full-Scale Data of Buildings in Japan. — Naoki Satake, Ken-ichi Suda, Toshiharu Arakawa, Atsushi Sasaki, and Yukio Tamura; 129(4), 470-7 (2003).

Decks
Inelastic Seismic Response of Side Lap Fasteners for Steel Roof Deck Diaphragms. — Colin A. Rogers and Robert Tremblay; 129(12), 1637-46 (2003).
Behavior of Roof Deck Diaphragms under Quasi-static Cyclic Loading. — Hesham S. Essa, Robert Tremblay, and Colin A. Rogers; 129(12), 1658-66 (2003).

Deflection
Shear Connection Nonlinearity and Deflections of Steel–Concrete Composite Beams: A Simplified Method. —Ciro Faella, Enzo Martinelli, and Emidio Nigro; 129(1), 12-20 (2003).
Preliminary Analysis of High-Rise Braced Frames with Facade Riggers. —J. C. D. Hoenderkamp and H. H. Snijder; 129(5), 640-7 (2003).
Elastoplastic Large Deflection Analysis of Three-Dimensional Steel Frames. —Minoru Shugyo; 129(9), 1259-67 (2003).
Deflection of Metal Plate Connected Wood Trusses with Nontriangulated Openings. —Kathleen A. Wills Rittenburg and Sashi K. Kunnath; 129(11), 1546-58 (2003).

Deformation
Steel–Concrete Composite Beams Considering Shear Slip Effects. —Jianguo Nie and C. S. Cai; 129(4), 495-506 (2003).

Design
Early Cover Spalling in High-Strength Concrete Columns. — Sungjin Bae and Oguzhan Bayrak; 129(3), 314-23 (2003).
Shear Capacity of Fiber-Reinforced Polymer-Strengthened Reinforced Concrete Beams: Fiber Reinforced Polymer Rupture. —J. F. Chen and J. G. Teng; 129(5), 615-25 (2003).
Automated Design of Steel Frames Using Advanced Analysis and Object-Oriented Evolutionary Computation. —Christopher M. Foley and Daniel Schinler; 129(5), 648-60 (2003).
Flexural Design of Reinforced Concrete Frames by Genetic Algorithm. —C. Lee and J. Ahn; 129(6), 762-74 (2003).
Design of Retrofitting for Damaged Rectangular Hollow Sectioned Struts. —Medhat K. Boutros; 129(8), 1011-8 (2003).
Plastic Analysis and Design of Steel Plate Shear Walls. — Jeffrey Berman and Michel Bruneau; 129(11), 1448-56 (2003).

Design wind speed
Design Wind Speed Prediction. —Anne M. Dougherty, Ross B. Corotis, and Anna Segurson; 129(9), 1268-74 (2003).

Deterioration
Evaluation of Expected Life-Cycle Maintenance Cost of Deteriorating Structures. — Jung S. Kong and Dan M. Frangopol; 129(5), 682-91 (2003).
Life-Cycle Modeling of Corrosion-Affected Concrete Structures: Propagation. — C. Q. Li; 129(6), 753-61 (2003).
Digital techniques
Behavior of Reinforced Concrete Beams with Loss of Bond at Longitudinal Reinforcement. — Joakim Jeppsson and Sven Thelandersson; 129(10), 1376-83 (2003).
Dimensional analysis
Dimensional Analysis of Reinforced Concrete Beams Subjected to Pure Torsion. — D. R. Phatak and H. B. Dhonde; 129(11), 1559-63 (2003).
Displacement
Statistics of Single-Degree-of-Freedom Estimate of Displacement for Pushover Analysis of Buildings. — Anil K. Chopra, Rakesh K. Goel, and Chatpan Chintanapakdee; 129(4), 459-69 (2003).
Active Multiple Tuned Mass Dampers: A New Control Strategy. —Chunxiang Li, Yanxia Liu, and Zhaomin Wang; 129(7), 972-7 (2003).
Distortion
Accuracy of Time History Analysis of Impulses. —Shuenn-Yih Chang; 129(3), 357-72 (2003).
Domes, structural
Effects of Stiffeners on Nonlinear Stability of Self-Erecting Dome. —Vinasithamby Ragavan and Amde M. Amde; 129(1), 49-55 (2003).
Nonlinear Analysis as a Diagnostic Tool for the Strengthening of an Old Wooden Dome. —Alessandra Marini and Paolo Riva; 129(10), 1412-21 (2003).
Drift
Drift Limits of High-Strength Concrete Columns Subjected to Load Reversals. —Adolfo B. Matamoros and Mete A. Sozen; 129(3), 297-313 (2003).
Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. —S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).
Ductility
Structural Reliability/Redundancy under Earthquakes. — Y. K. Wen and S.-H. Song; 129(1), 56-67 (2003).
Retrofit of Reinforced Concrete Columns Using Partially Stiffened Steel Jackets. —Yan Xiao and Hui Wu; 129(6), 725-32 (2003).
Semiactive Structural-Control Based on Variable Slip-Force Level Dampers. —Akira Nishitani, Yoshihiro Nitta, and Yoshiki Ikeda; 129(7), 933-40 (2003).
Overstrength and Ductility Factors for Steel Frames Designed According to BS 5950. —T. Balendra and X. Huang; 129(8), 1019-35 (2003).
Improving the Strength and Ductility of Rectangular Reinforced Concrete Columns through Composite Partial Interaction: Tests. —Y. F. Wu, M. C. Griffith, and D. J. Oehlers; 129(9), 1183-90 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. I: Theory and Formulation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1199-207 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).
Steel Semirigid Column–Tree Moment Resisting Frame Seismic Behavior. — Kurt Michael McMullin and Abolhassan Astaneh-Asl; 129(9), 1243-9 (2003).
Effects of Material Toughness and Plate Thickness on Brittle Fracture of Steel Members. — Hitoshi Kuwamura, Jun Iyama, and Koji Matsui; 129(11), 1475-83 (2003).
Cross-Sectional Compactness and Bracing Requirements for HPS483W Girders. — S. J. Thomas and C. J. Earls; 129(12), 1569-83 (2003).
Structural Ductility in Hybrid High Performance Steel Beams. — N. Greco and C. J. Earls; 129(12), 1584-95 (2003).
Summary of a Large- and Small-Scale Unreinforced Masonry Infill Test Program. —R. C. Henderson, K. E. Fricke, W. D. Jones, J. E. Beavers, and R. M. Bennett; 129(12), 1667-75 (2003).
Dynamic loads
Effects of Finish Materials and Dynamic Loading on the Cyclic Response of Woodframe Shearwalls. — Chia-Ming Uang and Kip Gatto; 129(10), 1394-402 (2003).
Dynamic stability
Evaluation of Damage and P-Δ Effects for Systems Under Earthquake Excitation. —Eric B. Williamson; 129(8), 1036-46 (2003).
Dynamic Instability of Simple Structural Systems. —Eduardo Miranda and Sinan D. Akkar; 129(12), 1722-6 (2003).
Dynamic tests
Advances in Ritz Vector Identification. —Thomas Boxoen and David C. Zimmerman; 129(8), 1131-40 (2003).
Earthquake damage
Evaluation of Damage and P-Δ Effects for Systems Under Earthquake Excitation. —Eric B. Williamson; 129(8), 1036-46 (2003).
Damage Spectra: Characteristics and Applications to Seismic Risk Reduction. —Yousef Bozorgnia and Vitelmo V. Bertero; 129(10), 1330-40 (2003).
Earthquake engineering
Experimental Study on Steel Shear Wall with Slits. —Toko Hitaka and Chiaki Matsui; 129(5), 586-95 (2003).
Fault Tolerance of Semiactive Seismic Isolation. —Henri Gavin, Cenk Alhan, and Natasha Oka; 129(7), 922-32 (2003).
External Prestressing Concrete Columns for Improved Seismic Shear Resistance. —Murat Saatcioglu and Cem Yalcin; 129(8), 1057-70 (2003).
Earthquake excitation
Study on Damping Reduction Factor for Buildings under Earthquake Ground Motions. —Y. Y. Lin and K. C. Chang; 129(2), 206-14 (2003).
Earthquakes
Structural Reliability/Redundancy under Earthquakes. — Y. K. Wen and S.-H. Song; 129(1), 56-67 (2003).
Drift Limits of High-Strength Concrete Columns Subjected to Load Reversals. — Adolfo B. Matamoros and Mete A. Sozen; 129(3), 297-313 (2003).
Effect of Reduced Beam Section Frame Elements on Stiffness of Moment Frames. — Janice J. Chambers, Shaheed Almudhafar, and Frank Stenger; 129(3), 383-93 (2003).
Development and Application of Wood Shear Wall Reliability Model. — John W. van de Lindt and Matthew A. Walz; 129(3), 405-13 (2003).
Pseudo-Dynamic Testing of Unreinforced Masonry Building with Flexible Diaphragm. — Jocelyn Paquette and Michel Bruneau; 129(6), 708-16 (2003).
Applications of Some Semiactive Control Systems to Benchmark Cable-Stayed Bridge. — A. K. Agrawal, J. N. Yang, and W. L. He; 129(7), 884-94 (2003).
Switching Oil Damper with Built-in Controller for Structural Control. — Haruhiko Kurino, Jun Tagami, Kan Shimizu, and Takuji Kobori; 129(7), 895-904 (2003).
Novel Semiactive Friction Controller for Linear Structures against Earthquakes. —W. L. He, A. K. Agrawal, and J. N. Yang; 129(7), 941-50 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. I: Theory and Formulation. —Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1199-207 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. —Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).
Effects of Material Toughness and Plate Thickness on Brittle Fracture of Steel Members. —Hitoshi Kuwamura, Jun Iyama, and Koji Matsui; 129(11), 1475-83 (2003).
Tests to Structural Collapse of Single Degree of Freedom Frames Subjected to Earthquake Excitations. — Darren Vian and Michel Bruneau; 129(12), 1676-85 (2003).
Effective width
Models for Concentrated Load Performance Assessment of Isotropic Wood Floor Sheathing. —Wilfred H. Thomas; 129(8), 1080-6 (2003).
Eigenvalues
Form Finding of Sparse Structures with Continuum Topology Optimization. —Salam Rahmatalla and Colby C. Swan; 129(12), 1707-16 (2003).
Elasticity
Lateral Buckling Strengths of Steel Angle Section Beams. —N. S. Trahair; 129(6), 784-91 (2003).
Elastoplasticity
Nonlinear Elastoplastic Analysis of Semirigid Steel Frames at Elevated Temperature: MP Approach. —V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(5), 661-71 (2003).
Elastoplastic Large Deflection Analysis of Three-Dimensional Steel Frames. —Minoru Shugyo; 129(9), 1259-67 (2003).
Energy dissipation
Study on Damping Reduction Factor for Buildings under Earthquake Ground Motions. —Y. Y. Lin and K. C. Chang; 129(2), 206-14 (2003).
Energy-Dissipating Polymer Matrix Composite-

Infill Wall System for Seismic Retrofitting. — Amjad J. Aref and Woo-Young Jung; 129(4), 440-8 (2003).
Switching Oil Damper with Built-in Controller for Structural Control. — Haruhiko Kurino, Jun Tagami, Kan Shimizu, and Takuji Kobori; 129(7), 895-904 (2003).
Cyclic Load Tests and Analysis of Bolted Top-and-Seat Angle Connections. — Maria M. Garlock, James M. Ricles, and Richard Sause; 129(12), 1615-25 (2003).
Inelastic Seismic Response of Side Lap Fasteners for Steel Roof Deck Diaphragms. — Colin A. Rogers and Robert Tremblay; 129(12), 1637-46 (2003).
Inelastic Seismic Response of Frame Fasteners for Steel Roof Deck Diaphragms. — Colin A. Rogers and Robert Tremblay; 129(12), 1647-57 (2003).

Europe

Experimental Investigation on European Welded Connections. — Elena Mele, Luis Calado, and Antonello De Luca; 129(10), 1301-11 (2003).

Excitation

Identification of Simplified Models Using Adaptive Control Techniques. —Michael S. Wrobleski and Henry T. Y. Yang; 129(7), 989-97 (2003).

Experimentation

Experimental Investigation of Cold-Formed Stainless Steel Columns. —Ben Young and Yahua Liu; 129(2), 169-76 (2003).
Adaptive Wood Composite: Experiment. —Watanachai Smittakorn and Paul R. Heyliger; 129(5), 699-702 (2003).
Experimental Investigation on European Welded Connections. — Elena Mele, Luis Calado, and Antonello De Luca; 129(10), 1301-11 (2003).
Experimental Studies on the Properties of Constructional Steel at Elevated Temperatures. —Guo-Qiang Li, Shou-Chao Jiang, Ying-Zhi Yin, Kai Chen, and Ming-Fei Li; 129(12), 1717-21 (2003).

Fabrication

Experimental and Numerical Prediction of Collapse of Flatbar Stiffeners in Aluminum Panels. —Yufeng Zha and Torgeir Moan; 129(2), 160-8 (2003).

Failure modes

Ultimate Strength of Ribbed Slab Composite Beams with Web Openings. —J. W. Park, C. H. Kim, and S. C. Yang; 129(6), 810-7 (2003).
Experimental Investigation on European Welded Connections. — Elena Mele, Luis Calado, and Antonello De Luca; 129(10), 1301-11 (2003).
System Reliability Assessment by Method of Moments. — Yan-Gang Zhao and Alfredo H-S. Ang; 129(10), 1341-9 (2003).

Failures

Shear Compression Failure in Reinforced Concrete Deep Beams. —Prodromos D. Zararis; 129(4), 544-53 (2003).
Retrofit of Reinforced Concrete Columns Using Partially Stiffened Steel Jackets. —Yan Xiao and Hui Wu; 129(6), 725-32 (2003).
Failure Behavior and Separation Criterion for Strengthened Concrete Members with Steel Plates. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(9), 1191-8 (2003).

Fasteners

Inelastic Seismic Response of Side Lap Fasteners for Steel Roof Deck Diaphragms. — Colin A. Rogers and Robert Tremblay; 129(12), 1637-46 (2003).
Inelastic Seismic Response of Frame Fasteners for Steel Roof Deck Diaphragms. — Colin A. Rogers and Robert Tremblay; 129(12), 1647-57 (2003).
Behavior of Roof Deck Diaphragms under Quasi-static Cyclic Loading. — Hesham S. Essa, Robert Tremblay, and Colin A. Rogers; 129(12), 1658-66 (2003).

Fatigue

Fatigue Strength of Steel Girders Strengthened with Carbon Fiber Reinforced Polymer Patch. — M. Tavakkolizadeh and H. Saadatmanesh; 129(2), 186-96 (2003).
Damping in Cantilevered Traffic Signal Structures under Forced Vibration. — P. S. McManus, H. R. Hamilton, III, and J. A. Puckett; 129(3), 373-82 (2003).
Lap Splice Steel Connections with Stainless Steel Nails. —Maura Lecce and Jeffrey A. Packer; 129(9), 1250-8 (2003).
Behavior of Shear Studs Subjected to Fully Reversed Cyclic Loading. —Scott A. Civjan and Prabhjeet Singh; 129(11), 1466-74 (2003).

Fatigue life

Cyclic Load Tests and Analysis of Bolted Top-and-Seat Angle Connections. —Maria M. Garlock, James M. Ricles, and Richard Sause; 129(12), 1615-25 (2003).

Fatigue tests

Static and Fatigue Behavior of Reinforced Concrete Beams Strengthened with Steel Plates for Flexure. —Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(4), 527-35 (2003).
Optimal *S-N* Testing for Variable-Amplitude Fatigue Applications. —Loren D. Lutes, Shahram Sarkani, David P. Kihl, and Jeffrey E. Beach; 129(6), 829-37 (2003).

Fiber reinforced materials

Strengthening of Steel-Concrete Composite Girders Using Carbon Fiber Reinforced Polymers Sheets. — M. Tavakkolizadeh and H. Saadatmanesh; 129(1), 30-40 (2003).
Effect of Strength and Fiber Reinforcement on Fire Resistance of High-Strength Concrete Columns. —V. K. R. Kodur, Fu-Ping Cheng, Tien-Chih Wang, and M. A. Sultan; 129(2), 253-9 (2003).

Fiber reinforced plastics

Local Buckling of Composite Fiber-Reinforced Plastic Wide-Flange Sections. —Pizhong Qiao and Guiping Zou; 129(1), 125-9 (2003).
Shear Capacity of Fiber-Reinforced Polymer-Strengthened Reinforced Concrete Beams: Fiber Reinforced Polymer Rupture. —J. F. Chen and J. G. Teng; 129(5), 615-25 (2003).
Local Buckling of Fiber Reinforced Plastic Composite Structural Members with Open and Closed Cross Sections. —László P. Kollár; 129(11), 1503-13 (2003).

Fiber reinforced polymers

Fatigue Strength of Steel Girders Strengthened with Carbon Fiber Reinforced Polymer Patch. —M. Tavakkolizadeh and H. Saadatmanesh; 129(2), 186-96 (2003).
Energy-Dissipating Polymer Matrix Composite-Infill Wall System for Seismic Retrofitting. —Amjad J. Aref and Woo-Young Jung; 129(4), 440-8 (2003).
Toward Load and Resistance Factor Design for Fiber-Reinforced Polymer Composite Structures. — Bruce R. Ellingwood; 129(4), 449-58 (2003).
Shear Capacity of Fiber-Reinforced Polymer-Strengthened Reinforced Concrete Beams: Fiber Reinforced Polymer Rupture. — J. F. Chen and J. G. Teng; 129(5), 615-25 (2003).
Tension Stiffening and Crack Formation in Reinforced Concrete Members with Fiber-Reinforced Polymer Sheets. — Yuichi Sato and Frank J. Vecchio; 129(6), 717-24 (2003).
Poststrengthening of Concrete Slabs: Full-Scale Testing and Design Recommendations. — Werner Seim, Alvaro Vasquez, Vistasp Karbhari, and Frieder Seible; 129(6), 743-52 (2003).
Field Assessment of Unreinforced Masonry Walls Strengthened with Fiber Reinforced Polymer Laminates. — J. Gustavo Tumialan, Nestore Galati, and Antonio Nanni; 129(8), 1047-56 (2003).
Reliability of Fiber-Reinforced Polymer-Confined Reinforced Concrete Columns. —Dimitri V. Val; 129(8), 1122-30 (2003).
Punching Shear Strengthening of Reinforced Concrete Flat Plates Using Carbon Fiber Reinforced Polymers. —Baris Binici and Oguzhan Bayrak; 129(9), 1173-82 (2003).

Fills

Energy-Dissipating Polymer Matrix Composite-Infill Wall System for Seismic Retrofitting. —Amjad J. Aref and Woo-Young Jung; 129(4), 440-8 (2003).
Summary of a Large- and Small-Scale Unreinforced Masonry Infill Test Program. —R. C. Henderson, K. E. Fricke, W. D. Jones, J. E. Beavers, and R. M. Bennett; 129(12), 1667-75 (2003).

Finite element method

Shear Connection Nonlinearity and Deflections of Steel–Concrete Composite Beams: A Simplified Method. —Ciro Faella, Enzo Martinelli, and Emidio Nigro; 129(1), 12-20 (2003).
Moment Magnifier Method for Long-Term Behavior of Flat Plates Subjected to In-Plane Compression. — K. Choi, H. Park, and Y. Shin; 129(1), 87-95 (2003).
Tendon Model for Nonlinear Analysis of Externally Prestressed Concrete Structures. —Xiao-Han Wu and Xilin Lu; 129(1), 96-104 (2003).
Three-Strut Model for Concrete Masonry-Infilled Steel Frames. —Wael W. El-Dakhakhni, Mohamed Elgaaly, and Ahmad A. Hamid; 129(2), 177-85 (2003).
Reliability of Frame and Shear Wall Structural Systems. I: Static Loading. —Seung Y. Lee and Achintya Haldar; 129(2), 224-32 (2003).
Reliability of Frame and Shear Wall Structural Systems. II: Dynamic Loading. —Seung Y. Lee and Achintya Haldar; 129(2), 233-40 (2003).
Microplane Model for Reinforced-Concrete Planar Members in Tension-Compression. —Honggun Park and Hakjun Kim; 129(3), 337-45 (2003).
Effect of Reduced Beam Section Frame Elements on Stiffness of Moment Frames. —Janice J. Chambers, Shaheed Almudhafar, and Frank Stenger; 129(3), 383-93 (2003).

Lateral Stiffness of Brick Masonry Infilled Plane Frames. — P. G. Asteris; 129(8), 1071-9 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).
Cross-Sectional Compactness and Bracing Requirements for HPS483W Girders. — S. J. Thomas and C. J. Earls; 129(12), 1569-83 (2003).
Structural Ductility in Hybrid High Performance Steel Beams. — N. Greco and C. J. Earls; 129(12), 1584-95 (2003).
Parallel Processing Techniques in Structural Engineering Applications. — E. D. Sotelino; 129(12), 1698-706 (2003).

Finite elements

Exact Finite Element for Nonuniform Torsion of Open Sections. — Magdi Mohareb and Farhood Nowzartash; 129(2), 215-23 (2003).
Classification Approach for Reliability Analysis with Stochastic Finite-Element Modeling. — Jorge E. Hurtado and Diego A. Alvarez; 129(8), 1141-9 (2003).
Cracked Membrane Model: Finite Element Implementation. — Stephen J. Foster and Peter Marti; 129(9), 1155-63 (2003).
Steel–Concrete Composite Plate Girders Subject to Shear Loading. —N. E. Shanmugam and K. Baskar; 129(9), 1230-42 (2003).
Strength Curves for Metal Plates in Compression. —Paul Bezkorovainy, Tim Burns, and Kim J. R. Rasmussen; 129(11), 1433-40 (2003).

Finite strip method

Calculation of Moments on Top Slab in Single-Cell Box Girders. —Q. Z. Luo, J. Tang, and Q. S. Li; 129(1), 130-4 (2003).
Concrete Uniaxial Tensile Strength and Cylinder Splitting Test. —Zhuhai Lin and Laurence Wood; 129(5), 692-8 (2003).

Fire hazards

Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. I: Theoretical Development. — Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1093-102 (2003).
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. II: Validations. —Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1103-12 (2003).

Fire resistance

Concrete-Filled Hollow Structural Steel Columns after Exposure to ISO-834 Fire Standard. —Lin-Hai Han and Jing-si Huo; 129(1), 68-78 (2003).
Effect of Strength and Fiber Reinforcement on Fire Resistance of High-Strength Concrete Columns. —V. K. R. Kodur, Fu-Ping Cheng, Tien-Chih Wang, and M. A. Sultan; 129(2), 253-9 (2003).
Experimental Study and Calculation of Fire Resistance of Concrete-Filled Hollow Steel Columns. —Lin-Hai Han, Xiao-Ling Zhao, You-Fu Yang, and Jiu-Bin Feng; 129(3), 346-56 (2003).
Nonlinear Elastoplastic Analysis of Semirigid Steel Frames at Elevated Temperature: MP Approach. —V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(5), 661-71 (2003).
Fire Resistance of Four-Face Heated Reinforced Concrete Columns. —K. H. Tan and Y. Yao; 129(9), 1220-9 (2003).
Fire Resistance of Walls and Floors Using Light-Gauge Steel Shapes. — Y. Sakumoto, T. Hirakawa, H. Masuda, and K. Nakamura; 129(11), 1522-30 (2003).
Analytical Fire Resistance of Axially Restrained Steel Columns. — Z. F. Huang and K. H. Tan; 129(11), 1531-7 (2003).

Flanges

Local Buckling of Composite Fiber-Reinforced Plastic Wide-Flange Sections. — Pizhong Qiao and Guiping Zou; 129(1), 125-9 (2003).

Flexural strength

Flexural Design of Reinforced Concrete Frames Using a Genetic Algorithm. — Charles V. Camp, Shahram Pezeshk, and Håkan Hansson; 129(1), 105-15 (2003).
Retrofit of Reinforced Concrete Columns Using Partially Stiffened Steel Jackets. — Yan Xiao and Hui Wu; 129(6), 725-32 (2003).

Flexure

Strengthening of Steel-Concrete Composite Girders Using Carbon Fiber Reinforced Polymers Sheets. — M. Tavakkolizadeh and H. Saadatmanesh; 129(1), 30-40 (2003).
Fatigue Strength of Steel Girders Strengthened with Carbon Fiber Reinforced Polymer Patch. —M. Tavakkolizadeh and H. Saadatmanesh; 129(2), 186-96 (2003).

Floors

Fire Resistance of Walls and Floors Using Light-Gauge Steel Shapes. —Y. Sakumoto, T. Hirakawa, H. Masuda, and K. Nakamura; 129(11), 1522-30 (2003).

Flutter

Efficacy of Tuned Mass Dampers for Bridge Flutter Control. —Xinzhong Chen and Ahsan Kareem; 129(10), 1291-300 (2003).

Forces

Identification of Simplified Models Using Adaptive Control Techniques. —Michael S. Wrobleski and Henry T. Y. Yang; 129(7), 989-97 (2003).

Fractures

Shear Capacity of Fiber-Reinforced Polymer-Strengthened Reinforced Concrete Beams: Fiber Reinforced Polymer Rupture. —J. F. Chen and J. G. Teng; 129(5), 615-25 (2003).
Seismic Response of Concentrically Braced Steel Frames Made with Rectangular Hollow Bracing Members. —R. Tremblay, M.-H. Archambault, and A. Filiatrault; 129(12), 1626-36 (2003).

Framed structures

Load-Sharing and Redistribution in a One-Story Woodframe Building. —Phillip J. Paevere, Greg C. Foliente, and Bo Kasal; 129(9), 1275-84 (2003).

Frames

Flexural Design of Reinforced Concrete Frames Using a Genetic Algorithm. —Charles V. Camp, Shahram Pezeshk, and Håkan Hansson; 129(1), 105-15 (2003).
Effect of Reduced Beam Section Frame Elements on Stiffness of Moment Frames. —Janice J. Chambers, Shaheed Almudhafar, and Frank Stenger; 129(3), 383-93 (2003).
Nonlinear Elastoplastic Analysis of Semirigid Steel Frames at Elevated Temperature: MP Approach. —V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(5), 661-71 (2003).
Lateral Stiffness of Brick Masonry Infilled Plane Frames. — P. G. Asteris; 129(8), 1071-9 (2003).
Inelastic Seismic Response of Frame Fasteners for Steel Roof Deck Diaphragms. — Colin A. Rogers and Robert Tremblay; 129(12), 1647-57 (2003).

Frequency

Nonlinear Vibration Characteristics of Damaged Concrete Beams. — S. A. Neild, M. S. Williams, and P. D. McFadden; 129(2), 260-8 (2003).

Full-scale tests

Load-Sharing and Redistribution in a One-Story Woodframe Building. — Phillip J. Paevere, Greg C. Foliente, and Bo Kasal; 129(9), 1275-84 (2003).

Fuzzy sets

Adaptive Fuzzy Control for Nonlinear Building-Magnetorheological Damper System. — Li Zhou, Chih-Chen Chang, and Li-Xin Wang; 129(7), 905-13 (2003).

Geography

Wind Speeds in ASCE 7 Standard Peak-Gust Map: Assessment. — Emil Simiu, Roseanne Wilcox, Fahim Sadek, and James J. Filliben; 129(4), 427-39 (2003).

Geometry

Geometry of Submerged Funicular Arches in Cartesian Coordinates. —Y. H. Chai and S. K. Kunnath; 129(8), 1087-92 (2003).

Girders

Strengthening of Steel-Concrete Composite Girders Using Carbon Fiber Reinforced Polymers Sheets. — M. Tavakkolizadeh and H. Saadatmanesh; 129(1), 30-40 (2003).
Fatigue Strength of Steel Girders Strengthened with Carbon Fiber Reinforced Polymer Patch. —M. Tavakkolizadeh and H. Saadatmanesh; 129(2), 186-96 (2003).

Ground motion

Statistics of Single-Degree-of-Freedom Estimate of Displacement for Pushover Analysis of Buildings. — Anil K. Chopra, Rakesh K. Goel, and Chatpan Chintanapakdee; 129(4), 459-69 (2003).
Active Multiple Tuned Mass Dampers: A New Control Strategy. —Chunxiang Li, Yanxia Liu, and Zhaomin Wang; 129(7), 972-7 (2003).
Damage Spectra: Characteristics and Applications to Seismic Risk Reduction. —Yousef Bozorgnia and Vitelmo V. Bertero; 129(10), 1330-40 (2003).

Gypsum

Effects of Finish Materials and Dynamic Loading on the Cyclic Response of Woodframe Shearwalls. — Chia-Ming Uang and Kip Gatto; 129(10), 1394-402 (2003).

High strength concretes

Uniaxial Confinement Model for Normal- and High-Strength Concrete Columns. —Frédéric Légeron and Patrick Paultre; 129(2), 241-52 (2003).
Effect of Strength and Fiber Reinforcement on Fire Resistance of High-Strength Concrete Columns. —V. K. R. Kodur, Fu-Ping Cheng, Tien-Chih Wang, and M. A. Sultan; 129(2), 253-9 (2003).
Drift Limits of High-Strength Concrete Columns Subjected to Load Reversals. —Adolfo B. Matamoros and Mete A. Sozen; 129(3), 297-313 (2003).
Early Cover Spalling in High-Strength Concrete Columns. — Sungjin Bae and Oguzhan Bayrak; 129(3), 314-23 (2003).

High strength steel
Cross-Sectional Compactness and Bracing Requirements for HPS483W Girders. — S. J. Thomas and C. J. Earls; 129(12), 1569-83 (2003).
Structural Ductility in Hybrid High Performance Steel Beams. — N. Greco and C. J. Earls; 129(12), 1584-95 (2003).

Hinges
Steel Semirigid Column–Tree Moment Resisting Frame Seismic Behavior. — Kurt Michael McMullin and Abolhassan Astaneh-Asl; 129(9), 1243-9 (2003).

Historic sites
Hershey Arena: Anton Tedesko's Pioneering Form. — Edmond P. Saliklis and David P. Billington; 129(3), 278-85 (2003).

History
Accuracy of Time History Analysis of Impulses. — Shuenn-Yih Chang; 129(3), 357-72 (2003).

Hollow sections
Welded Tee-to-HSS Connections. — N. Kosteski and J. A. Packer; 129(2), 151-9 (2003).
Experimental Study and Calculation of Fire Resistance of Concrete-Filled Hollow Steel Columns. —Lin-Hai Han, Xiao-Ling Zhao, You-Fu Yang, and Jiu-Bin Feng; 129(3), 346-56 (2003).
Longitudinal Plate and Through Plate-to-Hollow Structural Section Welded Connections. —N. Kosteski and J. A. Packer; 129(4), 478-86 (2003).
Rotational Stiffness of Rectangular Hollow Sections Composite Joints. —L. A. P. Silva, L. F. N. Neves, and F. C. T. Gomes; 129(4), 487-94 (2003).
Design of Retrofitting for Damaged Rectangular Hollow Sectioned Struts. —Medhat K. Boutros; 129(8), 1011-8 (2003).

Honeycomb structures
Energy-Dissipating Polymer Matrix Composite-Infill Wall System for Seismic Retrofitting. —Amjad J. Aref and Woo-Young Jung; 129(4), 440-8 (2003).

Housing
Feasibility and Optimization of Rigidified Inflatable Structures for Housing. —Steven Van Dessel, Achille Messac, Anoop A. Mullur, and Amy A. Farina; 129(11), 1494-502 (2003).

Hybrid methods
"Convexifying" Linear Matrix Inequality Methods for Integrating Structure and Control Design. —Juan F. Camino, M. C. de Oliveira, and R. E. Skelton; 129(7), 978-88 (2003).

Hysteresis
Influence of Hysteretic Behavior on Equivalent Period and Damping of Structural Systems. —Wing-Pin Kwan and Sarah L. Billington; 129(5), 576-85 (2003).
Experimental Study on Steel Shear Wall with Slits. —Toko Hitaka and Chiaki Matsui; 129(5), 586-95 (2003).

Hysteretic systems
Damage Spectra: Characteristics and Applications to Seismic Risk Reduction. —Yousef Bozorgnia and Vitelmo V. Bertero; 129(10), 1330-40 (2003).
Dynamic Instability of Simple Structural Systems. —Eduardo Miranda and Sinan D. Akkar; 129(12), 1722-6 (2003).

Imaging techniques
Behavior of Reinforced Concrete Beams with Loss of Bond at Longitudinal Reinforcement. — Joakim Jeppsson and Sven Thelandersson; 129(10), 1376-83 (2003).

Inelastic action
Statistics of Single-Degree-of-Freedom Estimate of Displacement for Pushover Analysis of Buildings. — Anil K. Chopra, Rakesh K. Goel, and Chatpan Chintanapakdee; 129(4), 459-69 (2003).
Nonlinear Behavior of Heavy Class Steel Truss Bridges. — Razi S. Nagavi and A. Emin Aktan; 129(8), 1113-21 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. I: Theory and Formulation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1199-207 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).
Damage Spectra: Characteristics and Applications to Seismic Risk Reduction. —Yousef Bozorgnia and Vitelmo V. Bertero; 129(10), 1330-40 (2003).
Inelastic Seismic Response of Side Lap Fasteners for Steel Roof Deck Diaphragms. —Colin A. Rogers and Robert Tremblay; 129(12), 1637-46 (2003).
Inelastic Seismic Response of Frame Fasteners for Steel Roof Deck Diaphragms. —Colin A. Rogers and Robert Tremblay; 129(12), 1647-57 (2003).
Behavior of Roof Deck Diaphragms under Quasi-static Cyclic Loading. —Hesham S. Essa, Robert Tremblay, and Colin A. Rogers; 129(12), 1658-66 (2003).

Inflatable structures
Feasibility and Optimization of Rigidified Inflatable Structures for Housing. —Steven Van Dessel, Achille Messac, Anoop A. Mullur, and Amy A. Farina; 129(11), 1494-502 (2003).

Infrastructure
Life-Cycle Reliability-Based Maintenance Cost Optimization of Deteriorating Structures with Emphasis on Bridges. —Jung S. Kong and Dan M. Frangopol; 129(6), 818-28 (2003).

Interactions
Improving the Strength and Ductility of Rectangular Reinforced Concrete Columns through Composite Partial Interaction: Tests. —Y. F. Wu, M. C. Griffith, and D. J. Oehlers; 129(9), 1183-90 (2003).

Isotropic materials
Models for Concentrated Load Performance Assessment of Isotropic Wood Floor Sheathing. —Wilfred H. Thomas; 129(8), 1080-6 (2003).

Japan
Damping Evaluation Using Full-Scale Data of Buildings in Japan. —Naoki Satake, Ken-ichi Suda, Toshiharu Arakawa, Atsushi Sasaki, and Yukio Tamura; 129(4), 470-7 (2003).

Joints
Stress and Strain Concentration Factors of Completely Overlapped Tubular K(N) Joints. —W. M. Gho, T. C. Fung, and C. K. Soh; 129(1), 21-9 (2003).
Rotational Stiffness of Rectangular Hollow Sections Composite Joints. — L. A. P. Silva, L. F. N. Neves, and F. C. T. Gomes; 129(4), 487-94 (2003).
Models for Concentrated Load Performance Assessment of Isotropic Wood Floor Sheathing. — Wilfred H. Thomas; 129(8), 1080-6 (2003).
Elastoplastic Large Deflection Analysis of Three-Dimensional Steel Frames. — Minoru Shugyo; 129(9), 1259-67 (2003).
Modeling Reinforced-Concrete Beam-Column Joints Subjected to Cyclic Loading. — Laura N. Lowes and Arash Altoontash; 129(12), 1686-97 (2003).

Knowledge-based systems
Knowledge-Based System on Optimum Design of Liquid Retaining Structures with Genetic Algorithms. — K. W. Chau and F. Albermani; 129(10), 1312-21 (2003).

Laminates
Field Assessment of Unreinforced Masonry Walls Strengthened with Fiber Reinforced Polymer Laminates. — J. Gustavo Tumialan, Nestore Galati, and Antonio Nanni; 129(8), 1047-56 (2003).

Lateral forces
Dynamic Instability of Simple Structural Systems. —Eduardo Miranda and Sinan D. Akkar; 129(12), 1722-6 (2003).

Lateral loads
Lateral Stiffness of Brick Masonry Infilled Plane Frames. — P. G. Asteris; 129(8), 1071-9 (2003).
Summary of a Large- and Small-Scale Unreinforced Masonry Infill Test Program. —R. C. Henderson, K. E. Fricke, W. D. Jones, J. E. Beavers, and R. M. Bennett; 129(12), 1667-75 (2003).

Lateral stability
Lateral-Torsional Buckling of Stepped Beams. —Jong S. Park and J. Michael Stallings; 129(11), 1457-65 (2003).

Layered systems
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. I: Theoretical Development. — Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1093-102 (2003).

Life cycles
Evaluation of Expected Life-Cycle Maintenance Cost of Deteriorating Structures. —Jung S. Kong and Dan M. Frangopol; 129(5), 682-91 (2003).
Life-Cycle Modeling of Corrosion-Affected Concrete Structures: Propagation. —C. Q. Li; 129(6), 753-61 (2003).
Life-Cycle Reliability-Based Maintenance Cost Optimization of Deteriorating Structures with Emphasis on Bridges. —Jung S. Kong and Dan M. Frangopol; 129(6), 818-28 (2003).

Limit analysis
Cap Model for Limit Analysis and Strengthening of Masonry Structures. —Agustín Orduña and Paulo B. Lourenço; 129(10), 1367-75 (2003).
Dimensional Analysis of Reinforced Concrete Beams Subjected to Pure Torsion. —D. R. Phatak and H. B. Dhonde; 129(11), 1559-63 (2003).

Limit states
Reliability of Frame and Shear Wall Structural Systems. I: Static Loading. —Seung Y. Lee and Achintya Haldar; 129(2), 224-32 (2003).

Reliability of Frame and Shear Wall Structural Systems. II: Dynamic Loading. — Seung Y. Lee and Achintya Haldar; 129(2), 233-40 (2003).
Toward Load and Resistance Factor Design for Fiber-Reinforced Polymer Composite Structures. — Bruce R. Ellingwood; 129(4), 449-58 (2003).

Linear programming

Plastic Limit Temperatures of Flexibly Connected Steel Frames: A Linear Programming Problem. — V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(1), 79-86 (2003).

Liquids

Knowledge-Based System on Optimum Design of Liquid Retaining Structures with Genetic Algorithms. — K. W. Chau and F. Albermani; 129(10), 1312-21 (2003).

Load and resistance factor design

Toward Load and Resistance Factor Design for Fiber-Reinforced Polymer Composite Structures. — Bruce R. Ellingwood; 129(4), 449-58 (2003).

Load distribution

Load-Sharing and Redistribution in a One-Story Woodframe Building. —Phillip J. Paevere, Greg C. Foliente, and Bo Kasal; 129(9), 1275-84 (2003).

Load transfer

Effect of Creep and Shrinkage on RC Frames with High Beam Stiffness. —Savita Maru, M. Asfaw, R. K. Sharma, and A. K. Nagpal; 129(4), 536-43 (2003).

Maintenance

Evaluation of Expected Life-Cycle Maintenance Cost of Deteriorating Structures. —Jung S. Kong and Dan M. Frangopol; 129(5), 682-91 (2003).

Maintenance costs

Life-Cycle Reliability-Based Maintenance Cost Optimization of Deteriorating Structures with Emphasis on Bridges. —Jung S. Kong and Dan M. Frangopol; 129(6), 818-28 (2003).

Masonry

Pseudo-Dynamic Testing of Unreinforced Masonry Building with Flexible Diaphragm. —Jocelyn Paquette and Michel Bruneau; 129(6), 708-16 (2003).
Field Assessment of Unreinforced Masonry Walls Strengthened with Fiber Reinforced Polymer Laminates. — J. Gustavo Tumialan, Nestore Galati, and Antonio Nanni; 129(8), 1047-56 (2003).
Cap Model for Limit Analysis and Strengthening of Masonry Structures. —Agustín Orduña and Paulo B. Lourenço; 129(10), 1367-75 (2003).
Summary of a Large- and Small-Scale Unreinforced Masonry Infill Test Program. —R. C. Henderson, K. E. Fricke, W. D. Jones, J. E. Beavers, and R. M. Bennett; 129(12), 1667-75 (2003).

Material properties

Experimental Studies on the Properties of Constructional Steel at Elevated Temperatures. —Guo-Qiang Li, Shou-Chao Jiang, Ying-Zhi Yin, Kai Chen, and Ming-Fei Li; 129(12), 1717-21 (2003).

Mathematical programming

Nonlinear Elastoplastic Analysis of Semirigid Steel Frames at Elevated Temperature: MP Approach. —V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(5), 661-71 (2003).

Membranes

Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. I: Theoretical Development. — Zhaohui Huang, Ian W. Burges , and Roger J. Plank; 129(8), 1093-102 (2003).
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. II: Validations. — Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1103-12 (2003).
Cracked Membrane Model: Finite Element Implementation. — Stephen J. Foster and Peter Marti; 129(9), 1155-63 (2003).

Metals

Strength Curves for Metal Plates in Compression. — Paul Bezkorovainy, Tim Burns, and Kim J. R. Rasmussen; 129(11), 1433-40 (2003).

Meteorology

Wind Speeds in ASCE 7 Standard Peak-Gust Map: Assessment. — Emil Simiu, Roseanne Wilcox, Fahim Sadek, and James J. Filliben; 129(4), 427-39 (2003).

Missouri

Phase I Benchmark Control Problem for Seismic Response of Cable-Stayed Bridges. —S. J. Dyke, J. M. Caicedo, G. Turan, L. A. Bergman, and S. Hague; 129(7), 857-72 (2003).
Field Assessment of Unreinforced Masonry Walls Strengthened with Fiber Reinforced Polymer Laminates. — J. Gustavo Tumialan, Nestore Galati, and Antonio Nanni; 129(8), 1047-56 (2003).

Model analysis

Deflection of Metal Plate Connected Wood Trusses with Nontriangulated Openings. —Kathleen A. Wills Rittenburg and Sashi K. Kunnath; 129(11), 1546-58 (2003).

Models

Three-Strut Model for Concrete Masonry-Infilled Steel Frames. —Wael W. El-Dakhakhni, Mohamed Elgaaly, and Ahmad A. Hamid; 129(2), 177-85 (2003).
Uniaxial Confinement Model for Normal- and High-Strength Concrete Columns. —Frédéric Légeron and Patrick Paultre; 129(2), 241-52 (2003).
Microplane Model for Reinforced-Concrete Planar Members in Tension-Compression. —Honggun Park and Hakjun Kim; 129(3), 337-45 (2003).
Neural Network Modeling of Confined Compressive Strength and Strain of Circular Concrete Columns. — Andres W. C. Oreta and Kazuhiko Kawashima; 129(4), 554-61 (2003).
Life-Cycle Modeling of Corrosion-Affected Concrete Structures: Propagation. —C. Q. Li; 129(6), 753-61 (2003).
Modeling Confinement Efficiency of Reinforced Concrete Columns with Rectilinear Transverse Steel Using Artificial Neural Networks. —Chao-Wei Tang, How-Ji Chen, and Tsong Yen; 129(6), 775-83 (2003).
Identification of Simplified Models Using Adaptive Control Techniques. —Michael S. Wrobleski and Henry T. Y. Yang; 129(7), 989-97 (2003).
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. I: Theoretical Development. — Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1093-102 (2003).
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. II: Validations. — Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1103-12 (2003).
Classification Approach for Reliability Analysis with Stochastic Finite-Element Modeling. — Jorge E. Hurtado and Diego A. Alvarez; 129(8), 1141-9 (2003).
Modeling Reinforced-Concrete Beam-Column Joints Subjected to Cyclic Loading. — Laura N. Lowes and Arash Altoontash; 129(12), 1686-97 (2003).

Moments

Lateral Buckling Strengths of Steel Angle Section Beams. — N. S. Trahair; 129(6), 784-91 (2003).
System Reliability Assessment by Method of Moments. — Yan-Gang Zhao and Alfredo H-S. Ang; 129(10), 1341-9 (2003).

Monte Carlo method

Classification Approach for Reliability Analysis with Stochastic Finite-Element Modeling. — Jorge E. Hurtado and Diego A. Alvarez; 129(8), 1141-9 (2003).

Nails

Lap Splice Steel Connections with Stainless Steel Nails. —Maura Lecce and Jeffrey A. Packer; 129(9), 1250-8 (2003).
Behavior of Roof Deck Diaphragms under Quasi-static Cyclic Loading. —Hesham S. Essa, Robert Tremblay, and Colin A. Rogers; 129(12), 1658-66 (2003).

Neural networks

Neural Network Modeling of Confined Compressive Strength and Strain of Circular Concrete Columns. — Andres W. C. Oreta and Kazuhiko Kawashima; 129(4), 554-61 (2003).
Combining Dynamic Relaxation Method with Artificial Neural Networks to Enhance Simulation of Tensegrity Structures. —Bernd Domer, Etienne Fest, Vikram Lalit, and Ian F. C. Smith; 129(5), 672-81 (2003).
Modeling Confinement Efficiency of Reinforced Concrete Columns with Rectilinear Transverse Steel Using Artificial Neural Networks. —Chao-Wei Tang, How-Ji Chen, and Tsong Yen; 129(6), 775-83 (2003).

Noise

Advances in Ritz Vector Identification. —Thomas Boxoen and David C. Zimmerman; 129(8), 1131-40 (2003).

Nondestructive tests

Application of Dynamic System Identification to Timber Bridges. —S. T. Peterson, D. I. McLean, and D. G. Pollock; 129(1), 116-24 (2003).
Nondestructive Crack Detection Algorithm for Full-Scale Bridges. —Jeong-Tae Kim and Norris Stubbs; 129(10), 1358-66 (2003).

Nonlinear analysis

Tendon Model for Nonlinear Analysis of Externally Prestressed Concrete Structures. —Xiao-Han Wu and Xilin Lu; 129(1), 96-104 (2003).
Nonlinear Elastoplastic Analysis of Semirigid Steel Frames at Elevated Temperature: MP Approach. —V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(5), 661-71 (2003).
Evaluation of Damage and P-Δ Effects for Systems Under Earthquake Excitation. —Eric B. Williamson; 129(8), 1036-46 (2003).
Nonlinear Behavior of Heavy Class Steel Truss Bridges. — Razi S. Nagavi and A. Emin Aktan; 129(8), 1113-21 (2003).

Steel–Concrete Composite Plate Girders Subject to Shear Loading. — N. E. Shanmugam and K. Baskar; 129(9), 1230-42 (2003).
Nonlinear Analysis of Axially Loaded Concrete-Filled Tube Columns with Confinement Effect. — Hsuan-Teh Hu, Chiung-Shiann Huang, Ming-Hsien Wu, and Yih-Min Wu; 129(10), 1322-9 (2003).
Nonlinear Analysis as a Diagnostic Tool for the Strengthening of an Old Wooden Dome. — Alessandra Marini and Paolo Riva; 129(10), 1412-21 (2003).

Nonlinear systems
Adaptive Fuzzy Control for Nonlinear Building-Magnetorheological Damper System. — Li Zhou, Chih-Chen Chang, and Li-Xin Wang; 129(7), 905-13 (2003).

Numerical analysis
Numerical Analysis of Multiple Discrete Cracks in Concrete Dams Using Extended Fictitious Crack Model. — Zihai Shi, Masaki Suzuki, and Masaaki Nakano; 129(3), 324-36 (2003).
Influence of Bond Slip on Crack Spacing in Numerical Modeling of Reinforced Concrete. —G. Chen and G. Baker; 129(11), 1514-21 (2003).

Optimization
Flexural Design of Reinforced Concrete Frames by Genetic Algorithm. —C. Lee and J. Ahn; 129(6), 762-74 (2003).
Design of Amplified Structural Damping Using Optimal Considerations. —Yuri Ribakov and Andrei M. Reinhorn; 129(10), 1422-7 (2003).
Feasibility and Optimization of Rigidified Inflatable Structures for Housing. —Steven Van Dessel, Achille Messac, Anoop A. Mullur, and Amy A. Farina; 129(11), 1494-502 (2003).
Form Finding of Sparse Structures with Continuum Topology Optimization. —Salam Rahmatalla and Colby C. Swan; 129(12), 1707-16 (2003).

Panels
Models for Concentrated Load Performance Assessment of Isotropic Wood Floor Sheathing. —Wilfred H. Thomas; 129(8), 1080-6 (2003).
New Design Rule for Intermediate Transverse Stiffeners Attached on Web Panels. —Sung C. Lee, Chai H. Yoo, and Dong Y. Yoon; 129(12), 1607-14 (2003).

Parallel processing
Parallel Processing Techniques in Structural Engineering Applications. —E. D. Sotelino; 129(12), 1698-706 (2003).

Parameters
Nonlinear Analysis of Axially Loaded Concrete-Filled Tube Columns with Confinement Effect. —Hsuan-Teh Hu, Chiung-Shiann Huang, Ming-Hsien Wu, and Yih-Min Wu; 129(10), 1322-9 (2003).

Passive control
Applications of Some Semiactive Control Systems to Benchmark Cable-Stayed Bridge. —A. K. Agrawal, J. N. Yang, and W. L. He; 129(7), 884-94 (2003).
"Convexifying" Linear Matrix Inequality Methods for Integrating Structure and Control Design. —Juan F. Camino, M. C. de Oliveira, and R. E. Skelton; 129(7), 978-88 (2003).

Performance evaluation
Damage Spectra: Characteristics and Applications to Seismic Risk Reduction. — Yousef Bozorgnia and Vitelmo V. Bertero; 129(10), 1330-40 (2003).

Plane strain
Cracked Membrane Model: Finite Element Implementation. — Stephen J. Foster and Peter Marti; 129(9), 1155-63 (2003).

Plastic analysis
Plastic Limit Temperatures of Flexibly Connected Steel Frames: A Linear Programming Problem. — V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(1), 79-86 (2003).
Plastic Analysis and Design of Steel Plate Shear Walls. — Jeffrey Berman and Michel Bruneau; 129(11), 1448-56 (2003).

Plastic hinges
Elastoplastic Large Deflection Analysis of Three-Dimensional Steel Frames. — Minoru Shugyo; 129(9), 1259-67 (2003).

Plasticity
Plastic Resistance of Pipe Sections: Upper Bound Solution. — Magdi Mohareb; 129(1), 41-8 (2003).
Design of Retrofitting for Damaged Rectangular Hollow Sectioned Struts. —Medhat K. Boutros; 129(8), 1011-8 (2003).

Plate girders
Steel–Concrete Composite Plate Girders Subject to Shear Loading. —N. E. Shanmugam and K. Baskar; 129(9), 1230-42 (2003).

Plates
Moment Magnifier Method for Long-Term Behavior of Flat Plates Subjected to In-Plane Compression. — K. Choi, H. Park, and Y. Shin; 129(1), 87-95 (2003).
Calculation of Moments on Top Slab in Single-Cell Box Girders. —Q. Z. Luo, J. Tang, and Q. S. Li; 129(1), 130-4 (2003).
Welded Tee-to-HSS Connections. —N. Kosteski and J. A. Packer; 129(2), 151-9 (2003).
Experimental and Numerical Prediction of Collapse of Flatbar Stiffeners in Aluminum Panels. —Yufeng Zha and Torgeir Moan; 129(2), 160-8 (2003).
Longitudinal Plate and Through Plate-to-Hollow Structural Section Welded Connections. —N. Kosteski and J. A. Packer; 129(4), 478-86 (2003).
Behavior and Modeling of a Bolt Bearing on a Single Plate. —Clinton O. Rex and W. Samuel Easterling; 129(6), 792-800 (2003).
Punching Shear Strengthening of Reinforced Concrete Flat Plates Using Carbon Fiber Reinforced Polymers. —Baris Binici and Oguzhan Bayrak; 129(9), 1173-82 (2003).
Steel Semirigid Column–Tree Moment Resisting Frame Seismic Behavior. —Kurt Michael McMullin and Abolhassan Astaneh-Asl; 129(9), 1243-9 (2003).
Nondestructive Crack Detection Algorithm for Full-Scale Bridges. —Jeong-Tae Kim and Norris Stubbs; 129(10), 1358-66 (2003).
Strength Curves for Metal Plates in Compression. —Paul Bezkorovainy, Tim Burns, and Kim J. R. Rasmussen; 129(11), 1433-40 (2003).
Ultimate Compressive Strength of Aluminum Plate Elements. —Yugang Xiao and Craig C. Menzemer; 129(11), 1441-7 (2003).
Plastic Analysis and Design of Steel Plate Shear Walls. — Jeffrey Berman and Michel Bruneau; 129(11), 1448-56 (2003).
Effects of Material Toughness and Plate Thickness on Brittle Fracture of Steel Members. — Hitoshi Kuwamura, Jun Iyama, and Koji Matsui; 129(11), 1475-83 (2003).
Deflection of Metal Plate Connected Wood Trusses with Nontriangulated Openings. — Kathleen A. Wills Rittenburg and Sashi K. Kunnath; 129(11), 1546-58 (2003).

Polymers
Strengthening of Steel-Concrete Composite Girders Using Carbon Fiber Reinforced Polymers Sheets. — M. Tavakkolizadeh and H. Saadatmanesh; 129(1), 30-40 (2003).

Postbuckling
New Design Rule for Intermediate Transverse Stiffeners Attached on Web Panels. — Sung C. Lee, Chai H. Yoo, and Dong Y. Yoon; 129(12), 1607-14 (2003).

Power loss
Reliability of Applied Semiactive Structural Control System. —Narito Kurata and Takuji Kobori; 129(7), 914-21 (2003).

Probabilistic models
Probabilistic Model for Marine Corrosion of Steel for Structural Reliability Assessment. —Robert E. Melchers; 129(11), 1484-93 (2003).

Probability
Structural Reliability/Redundancy under Earthquakes. — Y. K. Wen and S.-H. Song; 129(1), 56-67 (2003).

Random vibration
Aerodynamic Loads on Tall Buildings: Interactive Database. —Yin Zhou, Tracy Kijewski, and Ahsan Kareem; 129(3), 394-404 (2003).

Redundancy
Nonlinear Behavior of Heavy Class Steel Truss Bridges. — Razi S. Nagavi and A. Emin Aktan; 129(8), 1113-21 (2003).

Regression analysis
Dynamic Instability of Simple Structural Systems. —Eduardo Miranda and Sinan D. Akkar; 129(12), 1722-6 (2003).

Rehabilitation
Evaluation of Expected Life-Cycle Maintenance Cost of Deteriorating Structures. —Jung S. Kong and Dan M. Frangopol; 129(5), 682-91 (2003).
Nonlinear Analysis as a Diagnostic Tool for the Strengthening of an Old Wooden Dome. —Alessandra Marini and Paolo Riva; 129(10), 1412-21 (2003).

Reinforcement
Seismic Retrofit of Shear Walls with Headed Bars and Carbon Fiber Wrap. —James Paterson and Denis Mitchell; 129(5), 606-14 (2003).
Field Assessment of Unreinforced Masonry Walls Strengthened with Fiber Reinforced Polymer Laminates. — J. Gustavo Tumialan, Nestore Galati, and Antonio Nanni; 129(8), 1047-56 (2003).

Relaxation, mechanics
Combining Dynamic Relaxation Method with Artificial Neural Networks to Enhance Simulation of Tensegrity Structures. —Bernd Domer, Etienne Fest, Vikram Lalit, and Ian F. C. Smith; 129(5), 672-81 (2003).

Reliability
Development and Application of Wood Shear Wall Reliability Model. — John W. van de Lindt and Matthew A. Walz; 129(3), 405-13 (2003).
Toward Load and Resistance Factor Design for Fiber-Reinforced Polymer Composite Structures. — Bruce R. Ellingwood; 129(4), 449-58 (2003).
Life-Cycle Modeling of Corrosion-Affected Concrete Structures: Propagation. — C. Q. Li; 129(6), 753-61 (2003).
Reliability of Applied Semiactive Structural Control System. — Narito Kurata and Takuji Kobori; 129(7), 914-21 (2003).
Reliability of Fiber-Reinforced Polymer-Confined Reinforced Concrete Columns. — Dimitri V. Val; 129(8), 1122-30 (2003).

Reliability analysis
Reliability of Frame and Shear Wall Structural Systems. II: Dynamic Loading. — Seung Y. Lee and Achintya Haldar; 129(2), 233-40 (2003).
Cold-Formed Steel Channels Subjected to Concentrated Bearing Load. — Ben Young and Gregory J. Hancock; 129(8), 1003-10 (2003).
Classification Approach for Reliability Analysis with Stochastic Finite-Element Modeling. —Jorge E. Hurtado and Diego A. Alvarez; 129(8), 1141-9 (2003).

Residual stress
Strength of Concrete Filled Steel Box Columns Incorporating Interaction Buckling. —Mohanad Mursi and Brian Uy; 129(5), 626-39 (2003).

Retrofitting
Strengthening of Steel-Concrete Composite Girders Using Carbon Fiber Reinforced Polymers Sheets. — M. Tavakkolizadeh and H. Saadatmanesh; 129(1), 30-40 (2003).
Fatigue Strength of Steel Girders Strengthened with Carbon Fiber Reinforced Polymer Patch. —M. Tavakkolizadeh and H. Saadatmanesh; 129(2), 186-96 (2003).
Energy-Dissipating Polymer Matrix Composite-Infill Wall System for Seismic Retrofitting. —Amjad J. Aref and Woo-Young Jung; 129(4), 440-8 (2003).
Seismic Retrofit of Shear Walls with Headed Bars and Carbon Fiber Wrap. —James Paterson and Denis Mitchell; 129(5), 606-14 (2003).
Retrofit of Reinforced Concrete Columns Using Partially Stiffened Steel Jackets. —Yan Xiao and Hui Wu; 129(6), 725-32 (2003).
Design of Retrofitting for Damaged Rectangular Hollow Sectioned Struts. —Medhat K. Boutros; 129(8), 1011-8 (2003).
External Prestressing Concrete Columns for Improved Seismic Shear Resistance. —Murat Saatcioglu and Cem Yalcin; 129(8), 1057-70 (2003).

Rigidity
Feasibility and Optimization of Rigidified Inflatable Structures for Housing. —Steven Van Dessel, Achille Messac, Anoop A. Mullur, and Amy A. Farina; 129(11), 1494-502 (2003).

Rods
Experimental Seismic Study of Adjacent Buildings with Fluid Dampers. —Z. Yang, Y. L. Xu, and X. L. Lu; 129(2), 197-205 (2003).

Roofs
Hershey Arena: Anton Tedesko's Pioneering Form. —Edmond P. Saliklis and David P. Billington; 129(3), 278-85 (2003).
Statistics of Single-Degree-of-Freedom Estimate of Displacement for Pushover Analysis of Buildings. — Anil K. Chopra, Rakesh K. Goel, and Chatpan Chintanapakdee; 129(4), 459-69 (2003).
Inelastic Seismic Response of Side Lap Fasteners for Steel Roof Deck Diaphragms. — Colin A. Rogers and Robert Tremblay; 129(12), 1637-46 (2003).
Inelastic Seismic Response of Frame Fasteners for Steel Roof Deck Diaphragms. — Colin A. Rogers and Robert Tremblay; 129(12), 1647-57 (2003).

Rotation
Testing of Steel Pipes Under Bending, Twist, and Shear. — Istemi Faruk Ozkan and Magdi Mohareb; 129(10), 1350-7 (2003).

San Francisco
Cyclic Testing of Built-Up Steel Shear Links for the New Bay Bridge. — Cole C. McDaniel, Chia-Ming Uang, and Frieder Seible; 129(6), 801-9 (2003).

Seismic analysis
Influence of Hysteretic Behavior on Equivalent Period and Damping of Structural Systems. —Wing-Pin Kwan and Sarah L. Billington; 129(5), 576-85 (2003).

Seismic design
Seismic Retrofit of Shear Walls with Headed Bars and Carbon Fiber Wrap. —James Paterson and Denis Mitchell; 129(5), 606-14 (2003).
Active Multiple Tuned Mass Dampers: A New Control Strategy. —Chunxiang Li, Yanxia Liu, and Zhaomin Wang; 129(7), 972-7 (2003).
Overstrength and Ductility Factors for Steel Frames Designed According to BS 5950. —T. Balendra and X. Huang; 129(8), 1019-35 (2003).
Steel Semirigid Column–Tree Moment Resisting Frame Seismic Behavior. —Kurt Michael McMullin and Abolhassan Astaneh-Asl; 129(9), 1243-9 (2003).
Damage Spectra: Characteristics and Applications to Seismic Risk Reduction. —Yousef Bozorgnia and Vitelmo V. Bertero; 129(10), 1330-40 (2003).

Seismic effects
Damage Spectra: Characteristics and Applications to Seismic Risk Reduction. —Yousef Bozorgnia and Vitelmo V. Bertero; 129(10), 1330-40 (2003).
Dynamic Instability of Simple Structural Systems. —Eduardo Miranda and Sinan D. Akkar; 129(12), 1722-6 (2003).

Seismic isolation
Fault Tolerance of Semiactive Seismic Isolation. —Henri Gavin, Cenk Alhan, and Natasha Oka; 129(7), 922-32 (2003).

Seismic response
Experimental Seismic Study of Adjacent Buildings with Fluid Dampers. —Z. Yang, Y. L. Xu, and X. L. Lu; 129(2), 197-205 (2003).
Quasi-Static Reversed Cyclic Response of Level and Stepped Cripple Walls. —Y. H. Chai, Tara C. Hutchinson, and Steven M. Vukazich; 129(5), 567-75 (2003).
Influence of Hysteretic Behavior on Equivalent Period and Damping of Structural Systems. —Wing-Pin Kwan and Sarah L. Billington; 129(5), 576-85 (2003).
Pseudo-Dynamic Testing of Unreinforced Masonry Building with Flexible Diaphragm. — Jocelyn Paquette and Michel Bruneau; 129(6), 708-16 (2003).
Phase I Benchmark Control Problem for Seismic Response of Cable-Stayed Bridges. — S. J. Dyke, J. M. Caicedo, G. Turan, L. A. Bergman, and S. Hague; 129(7), 857-72 (2003).
Lateral Stiffness of Brick Masonry Infilled Plane Frames. — P. G. Asteris; 129(8), 1071-9 (2003).
Effects of Finish Materials and Dynamic Loading on the Cyclic Response of Woodframe Shearwalls. — Chia-Ming Uang and Kip Gatto; 129(10), 1394-402 (2003).
Design of Amplified Structural Damping Using Optimal Considerations. — Yuri Ribakov and Andrei M. Reinhorn; 129(10), 1422-7 (2003).
Seismic Response of Concentrically Braced Steel Frames Made with Rectangular Hollow Bracing Members. — R. Tremblay, M.-H. Archambault, and A. Filiatrault; 129(12), 1626-36 (2003).
Inelastic Seismic Response of Side Lap Fasteners for Steel Roof Deck Diaphragms. —Colin A. Rogers and Robert Tremblay; 129(12), 1637-46 (2003).
Inelastic Seismic Response of Frame Fasteners for Steel Roof Deck Diaphragms. —Colin A. Rogers and Robert Tremblay; 129(12), 1647-57 (2003).
Behavior of Roof Deck Diaphragms under Quasi-static Cyclic Loading. —Hesham S. Essa, Robert Tremblay, and Colin A. Rogers; 129(12), 1658-66 (2003).

Seismic stability
Seismic Performance of Precast Reinforced and Prestressed Concrete Walls. —Tony Holden, Jose Restrepo, and John B. Mander; 129(3), 286-96 (2003).
Control of Seismically Excited Cable-Stayed Bridge Employing Magnetorheological Fluid Dampers. — Hyung-Jo Jung, Billie F. Spencer, Jr., and In-Won Lee; 129(7), 873-83 (2003).

Sensitivity analysis
Form Finding of Sparse Structures with Continuum Topology Optimization. —Salam Rahmatalla and Colby C. Swan; 129(12), 1707-16 (2003).

Service loads
Optimal *S-N* Testing for Variable-Amplitude Fatigue Applications. —Loren D. Lutes, Shahram Sarkani, David P. Kihl, and Jeffrey E. Beach; 129(6), 829-37 (2003).

Serviceability
Toward Load and Resistance Factor Design for Fiber-Reinforced Polymer Composite Structures. — Bruce R. Ellingwood; 129(4), 449-58 (2003).
Probabilistic Model for Marine Corrosion of Steel for Structural Reliability Assessment. —Robert E. Melchers; 129(11), 1484-93 (2003).

Shape
Geometry of Submerged Funicular Arches in Cartesian Coordinates. —Y. H. Chai and S. K. Kunnath; 129(8), 1087-92 (2003).

Shear
Testing of Steel Pipes Under Bending, Twist, and Shear. —Istemi Faruk Ozkan and Magdi Mohareb; 129(10), 1350-7 (2003).
Behavior of Reinforced Concrete Beams with Loss

of Bond at Longitudinal Reinforcement. — Joakim Jeppsson and Sven Thelandersson; 129(10), 1376-83 (2003).

Shear distribution

Lateral Stiffness of Brick Masonry Infilled Plane Frames. — P. G. Asteris; 129(8), 1071-9 (2003).

Shear forces

Plastic Resistance of Pipe Sections: Upper Bound Solution. — Magdi Mohareb; 129(1), 41-8 (2003).

Shear resistance

External Prestressing Concrete Columns for Improved Seismic Shear Resistance. — Murat Saatcioglu and Cem Yalcin; 129(8), 1057-70 (2003).

Alternative Shear Reinforcement for Reinforced Concrete Flat Slabs. — K. Pilakoutas and X. Li; 129(9), 1164-72 (2003).

Shear strength

Shear Compression Failure in Reinforced Concrete Deep Beams. — Prodromos D. Zararis; 129(4), 544-53 (2003).

Seismic Retrofit of Shear Walls with Headed Bars and Carbon Fiber Wrap. — James Paterson and Denis Mitchell; 129(5), 606-14 (2003).

Shear Capacity of Fiber-Reinforced Polymer-Strengthened Reinforced Concrete Beams: Fiber Reinforced Polymer Rupture. —J. F. Chen and J. G. Teng; 129(5), 615-25 (2003).

Retrofit of Reinforced Concrete Columns Using Partially Stiffened Steel Jackets. —Yan Xiao and Hui Wu; 129(6), 725-32 (2003).

Punching Shear Strengthening of Reinforced Concrete Flat Plates Using Carbon Fiber Reinforced Polymers. —Baris Binici and Oguzhan Bayrak; 129(9), 1173-82 (2003).

New Design Rule for Intermediate Transverse Stiffeners Attached on Web Panels. —Sung C. Lee, Chai H. Yoo, and Dong Y. Yoon; 129(12), 1607-14 (2003).

Shear stress

Failure Behavior and Separation Criterion for Strengthened Concrete Members with Steel Plates. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(9), 1191-8 (2003).

Shear walls

Reliability of Frame and Shear Wall Structural Systems. I: Static Loading. —Seung Y. Lee and Achintya Haldar; 129(2), 224-32 (2003).

Reliability of Frame and Shear Wall Structural Systems. II: Dynamic Loading. —Seung Y. Lee and Achintya Haldar; 129(2), 233-40 (2003).

Development and Application of Wood Shear Wall Reliability Model. —John W. van de Lindt and Matthew A. Walz; 129(3), 405-13 (2003).

Experimental Study on Steel Shear Wall with Slits. —Toko Hitaka and Chiaki Matsui; 129(5), 586-95 (2003).

Seismic Retrofit of Shear Walls with Headed Bars and Carbon Fiber Wrap. —James Paterson and Denis Mitchell; 129(5), 606-14 (2003).

Effects of Loading Protocol on the Cyclic Response of Woodframe Shearwalls. —Kip Gatto and Chia-Ming Uang; 129(10), 1384-93 (2003).

Effects of Finish Materials and Dynamic Loading on the Cyclic Response of Woodframe Shearwalls. — Chia-Ming Uang and Kip Gatto; 129(10), 1394-402 (2003).

Plastic Analysis and Design of Steel Plate Shear Walls. — Jeffrey Berman and Michel Bruneau; 129(11), 1448-56 (2003).

Sheets

Tension Stiffening and Crack Formation in Reinforced Concrete Members with Fiber-Reinforced Polymer Sheets. — Yuichi Sato and Frank J. Vecchio; 129(6), 717-24 (2003).

Shrinkage

Effect of Creep and Shrinkage on RC Frames with High Beam Stiffness. — Savita Maru, M. Asfaw, R. K. Sharma, and A. K. Nagpal; 129(4), 536-43 (2003).

Simulation

Reliability of Frame and Shear Wall Structural Systems. I: Static Loading. — Seung Y. Lee and Achintya Haldar; 129(2), 224-32 (2003).

Combining Dynamic Relaxation Method with Artificial Neural Networks to Enhance Simulation of Tensegrity Structures. — Bernd Domer, Etienne Fest, Vikram Lalit, and Ian F. C. Smith; 129(5), 672-81 (2003).

Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. —Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).

Singapore

Overstrength and Ductility Factors for Steel Frames Designed According to BS 5950. —T. Balendra and X. Huang; 129(8), 1019-35 (2003).

Size effect

Effects of Material Toughness and Plate Thickness on Brittle Fracture of Steel Members. —Hitoshi Kuwamura, Jun Iyama, and Koji Matsui; 129(11), 1475-83 (2003).

Slabs

Moment Magnifier Method for Long-Term Behavior of Flat Plates Subjected to In-Plane Compression. — K. Choi, H. Park, and Y. Shin; 129(1), 87-95 (2003).

Ultimate Strength of Ribbed Slab Composite Beams with Web Openings. —J. W. Park, C. H. Kim, and S. C. Yang; 129(6), 810-7 (2003).

Connectors for Timber–Lightweight Concrete Composite Structures. —Eric Steinberg, Ricky Selle, and Thorsten Faust; 129(11), 1538-45 (2003).

Slip

Steel–Concrete Composite Beams Considering Shear Slip Effects. —Jianguo Nie and C. S. Cai; 129(4), 495-506 (2003).

Influence of Bond Slip on Crack Spacing in Numerical Modeling of Reinforced Concrete. —G. Chen and G. Baker; 129(11), 1514-21 (2003).

Space structures

Adjustable Tensegrity Structures. —Etienne Fest, Kristina Shea, Bernd Domer, and Ian F. C. Smith; 129(4), 515-26 (2003).

Splitting

Concrete Uniaxial Tensile Strength and Cylinder Splitting Test. —Zhuhai Lin and Laurence Wood; 129(5), 692-8 (2003).

Stability

Effects of Stiffeners on Nonlinear Stability of Self-Erecting Dome. —Vinasithamby Ragavan and Amde M. Amde; 129(1), 49-55 (2003).

Stability analysis

Lateral-Torsional Buckling of Stepped Beams. — Jong S. Park and J. Michael Stallings; 129(11), 1457-65 (2003).

Stainless steel

Experimental Investigation of Cold-Formed Stainless Steel Columns. — Ben Young and Yahua Liu; 129(2), 169-76 (2003).

Lap Splice Steel Connections with Stainless Steel Nails. — Maura Lecce and Jeffrey A. Packer; 129(9), 1250-8 (2003).

Strength Curves for Metal Plates in Compression. — Paul Bezkorovainy, Tim Burns, and Kim J. R. Rasmussen; 129(11), 1433-40 (2003).

Static loads

Reliability of Frame and Shear Wall Structural Systems. I: Static Loading. — Seung Y. Lee and Achintya Haldar; 129(2), 224-32 (2003).

Static tests

Static and Fatigue Behavior of Reinforced Concrete Beams Strengthened with Steel Plates for Flexure. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(4), 527-35 (2003).

Statics

Lap Splice Steel Connections with Stainless Steel Nails. —Maura Lecce and Jeffrey A. Packer; 129(9), 1250-8 (2003).

Statistical analysis

Design Wind Speed Prediction. —Anne M. Dougherty, Ross B. Corotis, and Anna Segurson; 129(9), 1268-74 (2003).

Statistics

Wind Speeds in ASCE 7 Standard Peak-Gust Map: Assessment. —Emil Simiu, Roseanne Wilcox, Fahim Sadek, and James J. Filliben; 129(4), 427-39 (2003).

Probabilistic Model for Marine Corrosion of Steel for Structural Reliability Assessment. —Robert E. Melchers; 129(11), 1484-93 (2003).

Steel

Shear Connection Nonlinearity and Deflections of Steel–Concrete Composite Beams: A Simplified Method. —Ciro Faella, Enzo Martinelli, and Emidio Nigro; 129(1), 12-20 (2003).

Strengthening of Steel-Concrete Composite Girders Using Carbon Fiber Reinforced Polymers Sheets. — M. Tavakkolizadeh and H. Saadatmanesh; 129(1), 30-40 (2003).

Long-Term Behavior and Strength of Partially Encased Composite Columns Made with Built-Up Steel Shapes. —Thierry Chicoine, Bruno Massicotte, and Robert Tremblay; 129(2), 141-50 (2003).

Welded Tee-to-HSS Connections. —N. Kosteski and J. A. Packer; 129(2), 151-9 (2003).

Fatigue Strength of Steel Girders Strengthened with Carbon Fiber Reinforced Polymer Patch. —M. Tavakkolizadeh and H. Saadatmanesh; 129(2), 186-96 (2003).

Longitudinal Plate and Through Plate-to-Hollow Structural Section Welded Connections. —N. Kosteski and J. A. Packer; 129(4), 478-86 (2003).

Experimental Study on Steel Shear Wall with Slits. —Toko Hitaka and Chiaki Matsui; 129(5), 586-95 (2003).

Modeling Confinement Efficiency of Reinforced Concrete Columns with Rectilinear Transverse

Steel Using Artificial Neural Networks. — Chao-Wei Tang, How-Ji Chen, and Tsong Yen; 129(6), 775-83 (2003).
Lateral Buckling Strengths of Steel Angle Section Beams. — N. S. Trahair; 129(6), 784-91 (2003).
Plastic Analysis and Design of Steel Plate Shear Walls. — Jeffrey Berman and Michel Bruneau; 129(11), 1448-56 (2003).
Probabilistic Model for Marine Corrosion of Steel for Structural Reliability Assessment. — Robert E. Melchers; 129(11), 1484-93 (2003).
Experimental Studies on the Properties of Constructional Steel at Elevated Temperatures. — Guo-Qiang Li, Shou-Chao Jiang, Ying-Zhi Yin, Kai Chen, and Ming-Fei Li; 129(12), 1717-21 (2003).

Steel beams

Local Web Buckling Strength of Coped Steel I Beams. — Michael C. H. Yam, Angus C. C. Lam, V. P. Iu, and J. J. R. Cheng; 129(1), 3-11 (2003).
Local Buckling Tests on Cold-Formed Steel Beams. — Cheng Yu and Benjamin W. Schafer; 129(12), 1596-606 (2003).

Steel columns

Concrete-Filled Hollow Structural Steel Columns after Exposure to ISO-834 Fire Standard. —Lin-Hai Han and Jing-si Huo; 129(1), 68-78 (2003).
Experimental Investigation of Cold-Formed Stainless Steel Columns. —Ben Young and Yahua Liu; 129(2), 169-76 (2003).
Experimental Study and Calculation of Fire Resistance of Concrete-Filled Hollow Steel Columns. —Lin-Hai Han, Xiao-Ling Zhao, You-Fu Yang, and Jiu-Bin Feng; 129(3), 346-56 (2003).
Strength of Concrete Filled Steel Box Columns Incorporating Interaction Buckling. —Mohanad Mursi and Brian Uy; 129(5), 626-39 (2003).
Analytical Fire Resistance of Axially Restrained Steel Columns. —Z. F. Huang and K. H. Tan; 129(11), 1531-7 (2003).

Steel construction

Strength of Concrete Filled Steel Box Columns Incorporating Interaction Buckling. —Mohanad Mursi and Brian Uy; 129(5), 626-39 (2003).

Steel frames

Plastic Limit Temperatures of Flexibly Connected Steel Frames: A Linear Programming Problem. —V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(1), 79-86 (2003).
Three-Strut Model for Concrete Masonry-Infilled Steel Frames. —Wael W. El-Dakhakhni, Mohamed Elgaaly, and Ahmad A. Hamid; 129(2), 177-85 (2003).
Reliability of Frame and Shear Wall Structural Systems. I: Static Loading. —Seung Y. Lee and Achintya Haldar; 129(2), 224-32 (2003).
Reliability of Frame and Shear Wall Structural Systems. II: Dynamic Loading. —Seung Y. Lee and Achintya Haldar; 129(2), 233-40 (2003).
Automated Design of Steel Frames Using Advanced Analysis and Object-Oriented Evolutionary Computation. —Christopher M. Foley and Daniel Schinler; 129(5), 648-60 (2003).
Nonlinear Elastoplastic Analysis of Semirigid Steel Frames at Elevated Temperature: MP Approach. —V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(5), 661-71 (2003).
Overstrength and Ductility Factors for Steel Frames Designed According to BS 5950. — T. Balendra and X. Huang; 129(8), 1019-35 (2003).
Steel Semirigid Column–Tree Moment Resisting Frame Seismic Behavior. — Kurt Michael McMullin and Abolhassan Astaneh-Asl; 129(9), 1243-9 (2003).
Elastoplastic Large Deflection Analysis of Three-Dimensional Steel Frames. — Minoru Shugyo; 129(9), 1259-67 (2003).
Fire Resistance of Walls and Floors Using Light-Gauge Steel Shapes. — Y. Sakumoto, T. Hirakawa, H. Masuda, and K. Nakamura; 129(11), 1522-30 (2003).
Seismic Response of Concentrically Braced Steel Frames Made with Rectangular Hollow Bracing Members. — R. Tremblay, M.-H. Archambault, and A. Filiatrault; 129(12), 1626-36 (2003).
Summary of a Large- and Small-Scale Unreinforced Masonry Infill Test Program. — R. C. Henderson, K. E. Fricke, W. D. Jones, J. E. Beavers, and R. M. Bennett; 129(12), 1667-75 (2003).

Steel pipes

Plastic Resistance of Pipe Sections: Upper Bound Solution. —Magdi Mohareb; 129(1), 41-8 (2003).
Testing of Steel Pipes Under Bending, Twist, and Shear. —Istemi Faruk Ozkan and Magdi Mohareb; 129(10), 1350-7 (2003).

Steel plates

Static and Fatigue Behavior of Reinforced Concrete Beams Strengthened with Steel Plates for Flexure. —Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(4), 527-35 (2003).
Failure Behavior and Separation Criterion for Strengthened Concrete Members with Steel Plates. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(9), 1191-8 (2003).

Steel structures

Rotational Stiffness of Rectangular Hollow Sections Composite Joints. —L. A. P. Silva, L. F. N. Neves, and F. C. T. Gomes; 129(4), 487-94 (2003).
Effects of Material Toughness and Plate Thickness on Brittle Fracture of Steel Members. —Hitoshi Kuwamura, Jun Iyama, and Koji Matsui; 129(11), 1475-83 (2003).
Inelastic Seismic Response of Side Lap Fasteners for Steel Roof Deck Diaphragms. —Colin A. Rogers and Robert Tremblay; 129(12), 1637-46 (2003).
Inelastic Seismic Response of Frame Fasteners for Steel Roof Deck Diaphragms. —Colin A. Rogers and Robert Tremblay; 129(12), 1647-57 (2003).

Stiffening

Effects of Stiffeners on Nonlinear Stability of Self-Erecting Dome. —Vinasithamby Ragavan and Amde M. Amde; 129(1), 49-55 (2003).
Compression Tests of Channels with Inclined Simple Edge Stiffeners. —Ben Young and Gregory J. Hancock; 129(10), 1403-11 (2003).
New Design Rule for Intermediate Transverse Stiffeners Attached on Web Panels. —Sung C. Lee, Chai H. Yoo, and Dong Y. Yoon; 129(12), 1607-14 (2003).

Stiffness

Effect of Reduced Beam Section Frame Elements on Stiffness of Moment Frames. — Janice J. Chambers, Shaheed Almudhafar, and Frank Stenger; 129(3), 383-93 (2003).
Rotational Stiffness of Rectangular Hollow Sections Composite Joints. — L. A. P. Silva, L. F. N. Neves, and F. C. T. Gomes; 129(4), 487-94 (2003).
Effect of Creep and Shrinkage on RC Frames with High Beam Stiffness. — Savita Maru, M. Asfaw, R. K. Sharma, and A. K. Nagpal; 129(4), 536-43 (2003).
Lateral Stiffness of Brick Masonry Infilled Plane Frames. — P. G. Asteris; 129(8), 1071-9 (2003).
Cyclic Load Tests and Analysis of Bolted Top-and-Seat Angle Connections. — Maria M. Garlock, James M. Ricles, and Richard Sause; 129(12), 1615-25 (2003).

Stochastic models

Design Wind Speed Prediction. — Anne M. Dougherty, Ross B. Corotis, and Anna Segurson; 129(9), 1268-74 (2003).

Strain

Stress and Strain Concentration Factors of Completely Overlapped Tubular K(N) Joints. —W. M. Gho, T. C. Fung, and C. K. Soh; 129(1), 21-9 (2003).
Neural Network Modeling of Confined Compressive Strength and Strain of Circular Concrete Columns. — Andres W. C. Oreta and Kazuhiko Kawashima; 129(4), 554-61 (2003).
Influence of Bond Slip on Crack Spacing in Numerical Modeling of Reinforced Concrete. —G. Chen and G. Baker; 129(11), 1514-21 (2003).

Strength

Local Web Buckling Strength of Coped Steel I Beams. — Michael C. H. Yam, Angus C. C. Lam, V. P. Iu, and J. J. R. Cheng; 129(1), 3-11 (2003).
Long-Term Behavior and Strength of Partially Encased Composite Columns Made with Built-Up Steel Shapes. —Thierry Chicoine, Bruno Massicotte, and Robert Tremblay; 129(2), 141-50 (2003).
Improving the Strength and Ductility of Rectangular Reinforced Concrete Columns through Composite Partial Interaction: Tests. —Y. F. Wu, M. C. Griffith, and D. J. Oehlers; 129(9), 1183-90 (2003).

Stress

Stress and Strain Concentration Factors of Completely Overlapped Tubular K(N) Joints. —W. M. Gho, T. C. Fung, and C. K. Soh; 129(1), 21-9 (2003).

Structural analysis

Evaluation of Expected Life-Cycle Maintenance Cost of Deteriorating Structures. —Jung S. Kong and Dan M. Frangopol; 129(5), 682-91 (2003).

Structural control

Switching Oil Damper with Built-in Controller for Structural Control. —Haruhiko Kurino, Jun Tagami, Kan Shimizu, and Takuji Kobori; 129(7), 895-904 (2003).
Semiactive Structural-Control Based on Variable Slip-Force Level Dampers. —Akira Nishitani, Yoshihiro Nitta, and Yoshiki Ikeda; 129(7), 933-40 (2003).
Novel Semiactive Friction Controller for Linear

Structures against Earthquakes. — W. L. He, A. K. Agrawal, and J. N. Yang; 129(7), 941-50 (2003).
Control of a Civil Structure Using an Electric Machine with Semiactive Capability. — J. T. Scruggs and W. D. Iwan; 129(7), 951-9 (2003).
Semiactive Tuned Liquid Column Dampers: Experimental Study. — Swaroop K. Yalla and Ahsan Kareem; 129(7), 960-71 (2003).
"Convexifying" Linear Matrix Inequality Methods for Integrating Structure and Control Design. — Juan F. Camino, M. C. de Oliveira, and R. E. Skelton; 129(7), 978-88 (2003).
Identification of Simplified Models Using Adaptive Control Techniques. — Michael S. Wrobleski and Henry T. Y. Yang; 129(7), 989-97 (2003).

Structural design
Cold-Formed Steel Channels Subjected to Concentrated Bearing Load. — Ben Young and Gregory J. Hancock; 129(8), 1003-10 (2003).
Knowledge-Based System on Optimum Design of Liquid Retaining Structures with Genetic Algorithms. — K. W. Chau and F. Albermani; 129(10), 1312-21 (2003).

Structural engineering
Hershey Arena: Anton Tedesko's Pioneering Form. —Edmond P. Saliklis and David P. Billington; 129(3), 278-85 (2003).
Parallel Processing Techniques in Structural Engineering Applications. —E. D. Sotelino; 129(12), 1698-706 (2003).

Structural members
Microplane Model for Reinforced-Concrete Planar Members in Tension-Compression. —Honggun Park and Hakjun Kim; 129(3), 337-45 (2003).

Structural reliability
Structural Reliability/Redundancy under Earthquakes. — Y. K. Wen and S.-H. Song; 129(1), 56-67 (2003).
Classification Approach for Reliability Analysis with Stochastic Finite-Element Modeling. —Jorge E. Hurtado and Diego A. Alvarez; 129(8), 1141-9 (2003).
System Reliability Assessment by Method of Moments. — Yan-Gang Zhao and Alfredo H-S. Ang; 129(10), 1341-9 (2003).
Probabilistic Model for Marine Corrosion of Steel for Structural Reliability Assessment. —Robert E. Melchers; 129(11), 1484-93 (2003).

Structural response
Design of Amplified Structural Damping Using Optimal Considerations. —Yuri Ribakov and Andrei M. Reinhorn; 129(10), 1422-7 (2003).

Structural safety
Design Wind Speed Prediction. —Anne M. Dougherty, Ross B. Corotis, and Anna Segurson; 129(9), 1268-74 (2003).

Structural stability
Dynamic Instability of Simple Structural Systems. —Eduardo Miranda and Sinan D. Akkar; 129(12), 1722-6 (2003).

Structural strength
Cap Model for Limit Analysis and Strengthening of Masonry Structures. —Agustín Orduña and Paulo B. Lourenço; 129(10), 1367-75 (2003).

Struts
Design of Retrofitting for Damaged Rectangular Hollow Sectioned Struts. —Medhat K. Boutros; 129(8), 1011-8 (2003).

Studs
Behavior of Shear Studs Subjected to Fully Reversed Cyclic Loading. — Scott A. Civjan and Prabhjeet Singh; 129(11), 1466-74 (2003).

Submerging
Geometry of Submerged Funicular Arches in Cartesian Coordinates. — Y. H. Chai and S. K. Kunnath; 129(8), 1087-92 (2003).

System analysis
Advances in Ritz Vector Identification. — Thomas Boxoen and David C. Zimmerman; 129(8), 1131-40 (2003).

Technology transfer
Hershey Arena: Anton Tedesko's Pioneering Form. — Edmond P. Saliklis and David P. Billington; 129(3), 278-85 (2003).

Temperature
Plastic Limit Temperatures of Flexibly Connected Steel Frames: A Linear Programming Problem. — V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(1), 79-86 (2003).
Effect of Strength and Fiber Reinforcement on Fire Resistance of High-Strength Concrete Columns. —V. K. R. Kodur, Fu-Ping Cheng, Tien-Chih Wang, and M. A. Sultan; 129(2), 253-9 (2003).
Analytical Fire Resistance of Axially Restrained Steel Columns. —Z. F. Huang and K. H. Tan; 129(11), 1531-7 (2003).
Experimental Studies on the Properties of Constructional Steel at Elevated Temperatures. —Guo-Qiang Li, Shou-Chao Jiang, Ying-Zhi Yin, Kai Chen, and Ming-Fei Li; 129(12), 1717-21 (2003).

Tendons
Tendon Model for Nonlinear Analysis of Externally Prestressed Concrete Structures. —Xiao-Han Wu and Xilin Lu; 129(1), 96-104 (2003).

Tensile strength
Concrete Uniaxial Tensile Strength and Cylinder Splitting Test. —Zhuhai Lin and Laurence Wood; 129(5), 692-8 (2003).

Tension
Microplane Model for Reinforced-Concrete Planar Members in Tension-Compression. —Honggun Park and Hakjun Kim; 129(3), 337-45 (2003).
Adjustable Tensegrity Structures. —Etienne Fest, Kristina Shea, Bernd Domer, and Ian F. C. Smith; 129(4), 515-26 (2003).
Tension Stiffening and Crack Formation in Reinforced Concrete Members with Fiber-Reinforced Polymer Sheets. —Yuichi Sato and Frank J. Vecchio; 129(6), 717-24 (2003).
New Design Rule for Intermediate Transverse Stiffeners Attached on Web Panels. —Sung C. Lee, Chai H. Yoo, and Dong Y. Yoon; 129(12), 1607-14 (2003).

Tension structures
Combining Dynamic Relaxation Method with Artificial Neural Networks to Enhance Simulation of Tensegrity Structures. —Bernd Domer, Etienne Fest, Vikram Lalit, and Ian F. C. Smith; 129(5), 672-81 (2003).

Tests
Adjustable Tensegrity Structures. —Etienne Fest, Kristina Shea, Bernd Domer, and Ian F. C. Smith; 129(4), 515-26 (2003).
Pseudo-Dynamic Testing of Unreinforced Masonry Building with Flexible Diaphragm. —Jocelyn Paquette and Michel Bruneau; 129(6), 708-16 (2003).
Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. — S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).
Poststrengthening of Concrete Slabs: Full-Scale Testing and Design Recommendations. — Werner Seim, Alvaro Vasquez, Vistasp Karbhari, and Frieder Seible; 129(6), 743-52 (2003).
Alternative Shear Reinforcement for Reinforced Concrete Flat Slabs. — K. Pilakoutas and X. Li; 129(9), 1164-72 (2003).
Testing of Steel Pipes Under Bending, Twist, and Shear. — Istemi Faruk Ozkan and Magdi Mohareb; 129(10), 1350-7 (2003).
Summary of a Large- and Small-Scale Unreinforced Masonry Infill Test Program. — R. C. Henderson, K. E. Fricke, W. D. Jones, J. E. Beavers, and R. M. Bennett; 129(12), 1667-75 (2003).

Thermal factors
Nonlinear Elastoplastic Analysis of Semirigid Steel Frames at Elevated Temperature: MP Approach. —V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(5), 661-71 (2003).

Thin shell structures
Hershey Arena: Anton Tedesko's Pioneering Form. —Edmond P. Saliklis and David P. Billington; 129(3), 278-85 (2003).

Thin wall structures
Local Buckling Tests on Cold-Formed Steel Beams. — Cheng Yu and Benjamin W. Schafer; 129(12), 1596-606 (2003).

Time series analysis
Design Wind Speed Prediction. —Anne M. Dougherty, Ross B. Corotis, and Anna Segurson; 129(9), 1268-74 (2003).

Torsion
Exact Finite Element for Nonuniform Torsion of Open Sections. —Magdi Mohareb and Farhood Nowzartash; 129(2), 215-23 (2003).
Dimensional Analysis of Reinforced Concrete Beams Subjected to Pure Torsion. —D. R. Phatak and H. B. Dhonde; 129(11), 1559-63 (2003).

Toughness
Effects of Material Toughness and Plate Thickness on Brittle Fracture of Steel Members. —Hitoshi Kuwamura, Jun Iyama, and Koji Matsui; 129(11), 1475-83 (2003).

Traffic signals
Damping in Cantilevered Traffic Signal Structures under Forced Vibration. —P. S. McManus, H. R. Hamilton, III, and J. A. Puckett; 129(3), 373-82 (2003).

Trusses
Nonlinear Behavior of Heavy Class Steel Truss Bridges. — Razi S. Nagavi and A. Emin Aktan; 129(8), 1113-21 (2003).
Deflection of Metal Plate Connected Wood Trusses with Nontriangulated Openings. —Kathleen A. Wills Rittenburg and Sashi K. Kunnath; 129(11), 1546-58 (2003).

Tubes
Welded Tee-to-HSS Connections. —N. Kosteski and J. A. Packer; 129(2), 151-9 (2003).
Longitudinal Plate and Through Plate-to-Hollow Structural Section Welded Connections. —N. Kosteski and J. A. Packer; 129(4), 478-86 (2003).

Tests of Cold-Formed Circular Tubular Braces under Cyclic Axial Loading. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 129(4), 507-14 (2003).
Lap Splice Steel Connections with Stainless Steel Nails. — Maura Lecce and Jeffrey A. Packer; 129(9), 1250-8 (2003).

Turbulence
Aerodynamic Loads on Tall Buildings: Interactive Database. — Yin Zhou, Tracy Kijewski, and Ahsan Kareem; 129(3), 394-404 (2003).

Ultimate loads
Steel–Concrete Composite Plate Girders Subject to Shear Loading. — N. E. Shanmugam and K. Baskar; 129(9), 1230-42 (2003).

Ultimate strength
Experimental and Numerical Prediction of Collapse of Flatbar Stiffeners in Aluminum Panels. — Yufeng Zha and Torgeir Moan; 129(2), 160-8 (2003).
Ultimate Strength of Ribbed Slab Composite Beams with Web Openings. — J. W. Park, C. H. Kim, and S. C. Yang; 129(6), 810-7 (2003).

Uplift pressure
Numerical Analysis of Multiple Discrete Cracks in Concrete Dams Using Extended Fictitious Crack Model. — Zihai Shi, Masaki Suzuki, and Masaaki Nakano; 129(3), 324-36 (2003).

Validation
Alternative Shear Reinforcement for Reinforced Concrete Flat Slabs. — K. Pilakoutas and X. Li; 129(9), 1164-72 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).

Vibration
Nonlinear Vibration Characteristics of Damaged Concrete Beams. — S. A. Neild, M. S. Williams, and P. D. McFadden; 129(2), 260-8 (2003).
Damping in Cantilevered Traffic Signal Structures under Forced Vibration. — P. S. McManus, H. R. Hamilton, III, and J. A. Puckett; 129(3), 373-82 (2003).
Semiactive Structural-Control Based on Variable Slip-Force Level Dampers. — Akira Nishitani, Yoshihiro Nitta, and Yoshiki Ikeda; 129(7), 933-40 (2003).
Control of a Civil Structure Using an Electric Machine with Semiactive Capability. — J. T. Scruggs and W. D. Iwan; 129(7), 951-9 (2003).
Active Multiple Tuned Mass Dampers: A New Control Strategy. — Chunxiang Li, Yanxia Liu, and Zhaomin Wang; 129(7), 972-7 (2003).

Vibration control
Fault Tolerance of Semiactive Seismic Isolation. — Henri Gavin, Cenk Alhan, and Natasha Oka; 129(7), 922-32 (2003).

Vibration tests
Application of Dynamic System Identification to Timber Bridges. — S. T. Peterson, D. I. McLean, and D. G. Pollock; 129(1), 116-24 (2003).

Walls
Seismic Performance of Precast Reinforced and Prestressed Concrete Walls. — Tony Holden, Jose Restrepo, and John B. Mander; 129(3), 286-96 (2003).
Energy-Dissipating Polymer Matrix Composite-Infill Wall System for Seismic Retrofitting. — Amjad J. Aref and Woo-Young Jung; 129(4), 440-8 (2003).
Quasi-Static Reversed Cyclic Response of Level and Stepped Cripple Walls. — Y. H. Chai, Tara C. Hutchinson, and Steven M. Vukazich; 129(5), 567-75 (2003).
Cyclic Performance of Concrete-Backed Stone Masonry Walls. — Mohamed A. H. Abdel-Halim and Samer A. Barakat; 129(5), 596-605 (2003).
Field Assessment of Unreinforced Masonry Walls Strengthened with Fiber Reinforced Polymer Laminates. — J. Gustavo Tumialan, Nestore Galati, and Antonio Nanni; 129(8), 1047-56 (2003).
Fire Resistance of Walls and Floors Using Light-Gauge Steel Shapes. — Y. Sakumoto, T. Hirakawa, H. Masuda, and K. Nakamura; 129(11), 1522-30 (2003).

Warpage
Elastoplastic Large Deflection Analysis of Three-Dimensional Steel Frames. — Minoru Shugyo; 129(9), 1259-67 (2003).

Webs
Ultimate Strength of Ribbed Slab Composite Beams with Web Openings. — J. W. Park, C. H. Kim, and S. C. Yang; 129(6), 810-7 (2003).

Welds
Ultimate Compressive Strength of Aluminum Plate Elements. — Yugang Xiao and Craig C. Menzemer; 129(11), 1441-7 (2003).

Wind forces
Wind Speeds in ASCE 7 Standard Peak-Gust Map: Assessment. — Emil Simiu, Roseanne Wilcox, Fahim Sadek, and James J. Filliben; 129(4), 427-39 (2003).
Switching Oil Damper with Built-in Controller for Structural Control. — Haruhiko Kurino, Jun Tagami, Kan Shimizu, and Takuji Kobori; 129(7), 895-904 (2003).
Semiactive Tuned Liquid Column Dampers: Experimental Study. — Swaroop K. Yalla and Ahsan Kareem; 129(7), 960-71 (2003).

Wind loads
Aerodynamic Loads on Tall Buildings: Interactive Database. — Yin Zhou, Tracy Kijewski, and Ahsan Kareem; 129(3), 394-404 (2003).
Design Wind Speed Prediction. — Anne M. Dougherty, Ross B. Corotis, and Anna Segurson; 129(9), 1268-74 (2003).
Efficacy of Tuned Mass Dampers for Bridge Flutter Control. — Xinzhong Chen and Ahsan Kareem; 129(10), 1291-300 (2003).

Wind speeds
Wind Speeds in ASCE 7 Standard Peak-Gust Map: Assessment. — Emil Simiu, Roseanne Wilcox, Fahim Sadek, and James J. Filliben; 129(4), 427-39 (2003).

Wind tunnels
Aerodynamic Loads on Tall Buildings: Interactive Database. — Yin Zhou, Tracy Kijewski, and Ahsan Kareem; 129(3), 394-404 (2003).

Wood
Development and Application of Wood Shear Wall Reliability Model. — John W. van de Lindt and Matthew A. Walz; 129(3), 405-13 (2003).
Adaptive Wood Composite: Experiment. — Watanachai Smittakorn and Paul R. Heyliger; 129(5), 699-702 (2003).
Effects of Finish Materials and Dynamic Loading on the Cyclic Response of Woodframe Shearwalls. — Chia-Ming Uang and Kip Gatto; 129(10), 1394-402 (2003).
Connectors for Timber–Lightweight Concrete Composite Structures. — Eric Steinberg, Ricky Selle, and Thorsten Faust; 129(11), 1538-45 (2003).

Wood floors
Models for Concentrated Load Performance Assessment of Isotropic Wood Floor Sheathing. — Wilfred H. Thomas; 129(8), 1080-6 (2003).

Wooden structures
Load-Sharing and Redistribution in a One-Story Woodframe Building. — Phillip J. Paevere, Greg C. Foliente, and Bo Kasal; 129(9), 1275-84 (2003).
Effects of Loading Protocol on the Cyclic Response of Woodframe Shearwalls. — Kip Gatto and Chia-Ming Uang; 129(10), 1384-93 (2003).
Nonlinear Analysis as a Diagnostic Tool for the Strengthening of an Old Wooden Dome. — Alessandra Marini and Paolo Riva; 129(10), 1412-21 (2003).
Deflection of Metal Plate Connected Wood Trusses with Nontriangulated Openings. — Kathleen A. Wills Rittenburg and Sashi K. Kunnath; 129(11), 1546-58 (2003).

Author Index

Abdel-Halim, Mohamed A. H.
Cyclic Performance of Concrete-Backed Stone Masonry Walls. —Mohamed A. H. Abdel-Halim and Samer A. Barakat; 129(5), 596-605 (2003).

Adeli, Hojjat
Closure to "Neural Network Model for Uplift Load Capacity of Metal Roof Panels" by Gene F. Sirca Jr. and Hojjat Adeli. —Gene F. Sirca, Jr., and Hojjat Adeli; 129(4), 562-3 (2003).

Agrawal, A. K.
Applications of Some Semiactive Control Systems to Benchmark Cable-Stayed Bridge. —A. K. Agrawal, J. N. Yang, and W. L. He; 129(7), 884-94 (2003).
Novel Semiactive Friction Controller for Linear Structures against Earthquakes. —W. L. He, A. K. Agrawal, and J. N. Yang; 129(7), 941-50 (2003).

Ahn, J.
Flexural Design of Reinforced Concrete Frames by Genetic Algorithm. —C. Lee and J. Ahn; 129(6), 762-74 (2003).

Akkar, Sinan D.
Dynamic Instability of Simple Structural Systems. —Eduardo Miranda and Sinan D. Akkar; 129(12), 1722-6 (2003).

Aktan, A. Emin
Nonlinear Behavior of Heavy Class Steel Truss Bridges. — Razi S. Nagavi and A. Emin Aktan; 129(8), 1113-21 (2003).

Albermani, F.
Knowledge-Based System on Optimum Design of Liquid Retaining Structures with Genetic Algorithms. — K. W. Chau and F. Albermani; 129(10), 1312-21 (2003).

Alhan, Cenk
Fault Tolerance of Semiactive Seismic Isolation. —Henri Gavin, Cenk Alhan, and Natasha Oka; 129(7), 922-32 (2003).

Almudhafar, Shaheed
Effect of Reduced Beam Section Frame Elements on Stiffness of Moment Frames. —Janice J. Chambers, Shaheed Almudhafar, and Frank Stenger; 129(3), 383-93 (2003).

Altoontash, Arash
Modeling Reinforced-Concrete Beam-Column Joints Subjected to Cyclic Loading. —Laura N. Lowes and Arash Altoontash; 129(12), 1686-97 (2003).

Alvarez, Diego A.
Classification Approach for Reliability Analysis with Stochastic Finite-Element Modeling. —Jorge E Hurtado and Diego A. Alvarez; 129(8), 1141-9 (2003).

Amde, Amde M.
Effects of Stiffeners on Nonlinear Stability of Self-Erecting Dome. —Vinasithamby Ragavan and Amde M. Amde; 129(1), 49-55 (2003).

Ang, Alfredo H-S.
System Reliability Assessment by Method of Moments. — Yan-Gang Zhao and Alfredo H-S. Ang; 129(10), 1341-9 (2003).

Arakawa, Toshiharu
Damping Evaluation Using Full-Scale Data of Buildings in Japan. — Naoki Satake, Ken-ichi Suda, Toshiharu Arakawa, Atsushi Sasaki, and Yukio Tamura; 129(4), 470-7 (2003).

Archambault, M.-H.
Seismic Response of Concentrically Braced Steel Frames Made with Rectangular Hollow Bracing Members. — R. Tremblay, M.-H. Archambault, and A. Filiatrault; 129(12), 1626-36 (2003).

Aref, Amjad J.
Energy-Dissipating Polymer Matrix Composite-Infill Wall System for Seismic Retrofitting. — Amjad J. Aref and Woo-Young Jung; 129(4), 440-8 (2003).

Asfaw, M.
Effect of Creep and Shrinkage on RC Frames with High Beam Stiffness. — Savita Maru, M. Asfaw, R. K. Sharma, and A. K. Nagpal; 129(4), 536-43 (2003).

Astaneh-Asl, Abolhassan
Steel Semirigid Column–Tree Moment Resisting Frame Seismic Behavior. —Kurt Michael McMullin and Abolhassan Astaneh-Asl; 129(9), 1243-9 (2003).

Asteris, P. G.
Lateral Stiffness of Brick Masonry Infilled Plane Frames. — P. G. Asteris; 129(8), 1071-9 (2003).

Ayoub, Ashraf
Discussion of "Reinforced Concrete Frame Element with Bond Interfaces. II: State Determinations and Numerical Validation" by Suchart Limkatanyu and Enrico Spacone. —Ashraf Ayoub and Filip C. Filippou; 129(10), 1428-9 (2003).

Bae, Sungjin
Early Cover Spalling in High-Strength Concrete Columns. — Sungjin Bae and Oguzhan Bayrak; 129(3), 314-23 (2003).

Baker, G.
Influence of Bond Slip on Crack Spacing in Numerical Modeling of Reinforced Concrete. —G. Chen and G. Baker; 129(11), 1514-21 (2003).

Balendra, T.
Overstrength and Ductility Factors for Steel Frames Designed According to BS 5950. —T. Balendra and X. Huang; 129(8), 1019-35 (2003).

Balkaya, Can
Closure to "Behavior and Modeling of Nonprismatic Members Having T-Sections" by Can Balkaya. — Can Balkaya; 129(3), 419-21 (2003).

Barakat, Samer A.
Cyclic Performance of Concrete-Backed Stone Masonry Walls. — Mohamed A. H. Abdel-Halim and Samer A. Barakat; 129(5), 596-605 (2003).

Baskar, K.
Steel–Concrete Composite Plate Girders Subject to Shear Loading. — N. E. Shanmugam and K. Baskar; 129(9), 1230-42 (2003).

Bayrak, Oguzhan
Early Cover Spalling in High-Strength Concrete Columns. — Sungjin Bae and Oguzhan Bayrak; 129(3), 314-23 (2003).
Punching Shear Strengthening of Reinforced Concrete Flat Plates Using Carbon Fiber Reinforced Polymers. — Baris Binici and Oguzhan Bayrak; 129(9), 1173-82 (2003).

Bažant, Zdeněk P.
Closure to "Size Effect in Concrete Columns: Finite-Element Analysis with Microplane Model" by Michele Brocca and Zdeněk P. Bažant. — Michele Brocca and Zdeněk P. Bažant; 129(5), 703-4 (2003).

Beach, Jeffrey E.
Optimal *S-N* Testing for Variable-Amplitude Fatigue Applications. —Loren D. Lutes, Shahram Sarkani, David P. Kihl, and Jeffrey E. Beach; 129(6), 829-37 (2003).

Beavers, J. E.
Summary of a Large- and Small-Scale Unreinforced Masonry Infill Test Program. —R. C. Henderson, K. E. Fricke, W. D. Jones, J. E. Beavers, and R. M. Bennett; 129(12), 1667-75 (2003).

Bennett, R. M.
Summary of a Large- and Small-Scale Unreinforced Masonry Infill Test Program. —R. C. Henderson, K. E. Fricke, W. D. Jones, J. E. Beavers, and R. M. Bennett; 129(12), 1667-75 (2003).

Bennett, Richard M.
Discussion of "Arching in Masonry Walls Subjected to Earthquake Motions" by Athanasios Dafnis, Holger Kolsch, and Hans-Günter Reimerdes. — Richard M. Bennett, Roger D. Flanagan, and R. Craig Henderson; 129(6), 838 (2003).

Bergman, L. A.
Phase I Benchmark Control Problem for Seismic Response of Cable-Stayed Bridges. —S. J. Dyke, J. M. Caicedo, G. Turan, L. A. Bergman, and S. Hague; 129(7), 857-72 (2003).

Berman, Jeffrey
Plastic Analysis and Design of Steel Plate Shear Walls. — Jeffrey Berman and Michel Bruneau; 129(11), 1448-56 (2003).

Bertero, Vitelmo V.
Damage Spectra: Characteristics and Applications to Seismic Risk Reduction. — Yousef Bozorgnia and Vitelmo V. Bertero; 129(10), 1330-40 (2003).

Bezkorovainy, Paul
Strength Curves for Metal Plates in Compression. — Paul Bezkorovainy, Tim Burns, and Kim J. R. Rasmussen; 129(11), 1433-40 (2003).

Billington, David P.
Hershey Arena: Anton Tedesko's Pioneering Form. — Edmond P. Saliklis and David P. Billington; 129(3), 278-85 (2003).

Billington, Sarah L.
Influence of Hysteretic Behavior on Equivalent Period and Damping of Structural Systems. — Wing-Pin Kwan and Sarah L. Billington; 129(5), 576-85 (2003).

Binici, Baris
Punching Shear Strengthening of Reinforced Concrete Flat Plates Using Carbon Fiber Reinforced Polymers. — Baris Binici and Oguzhan Bayrak; 129(9), 1173-82 (2003).

Boutros, Medhat K.
Design of Retrofitting for Damaged Rectangular Hollow Sectioned Struts. —Medhat K. Boutros; 129(8), 1011-8 (2003).

Boxoen, Thomas
Advances in Ritz Vector Identification. —Thomas Boxoen and David C. Zimmerman; 129(8), 1131-40 (2003).

Bozorgnia, Yousef
Damage Spectra: Characteristics and Applications to Seismic Risk Reduction. —Yousef Bozorgnia and Vitelmo V. Bertero; 129(10), 1330-40 (2003).

Bradshaw, Richard R.
Discussion of "Size Effect in Concrete Columns: Finite-Element Analysis with Microplane Model" by Michele Brocca and Zdeněk P. Bažant. — Richard R. Bradshaw; 129(5), 703 (2003).

Bridge, Russell Q.
Closure to "Buckling of Thin-Walled Silos and Tanks under Axial Load—Some New Aspects" by Martin Pircher and Russell Q. Bridge. —Martin Pircher and Russell Q. Bridge; 129(5), 704-5 (2003).

Brocca, Michele
Closure to "Size Effect in Concrete Columns: Finite-Element Analysis with Microplane Model" by Michele Brocca and Zdeněk P. Bažant. — Michele Brocca and Zdeněk P. Bažant; 129(5), 703-4 (2003).

Bruneau, Michel
Pseudo-Dynamic Testing of Unreinforced Masonry Building with Flexible Diaphragm. —Jocelyn Paquette and Michel Bruneau; 129(6), 708-16 (2003).
Plastic Analysis and Design of Steel Plate Shear Walls. — Jeffrey Berman and Michel Bruneau; 129(11), 1448-56 (2003).
Tests to Structural Collapse of Single Degree of Freedom Frames Subjected to Earthquake Excitations. — Darren Vian and Michel Bruneau; 129(12), 1676-85 (2003).

Buckner, C. Dale
Editor's Note. — C. Dale Buckner; 129(1), 1-2 (2003).
Editor's Note. — C. Dale Buckner; 129(2), 139-40 (2003).
Editor's Note. — C. Dale Buckner; 129(3), 277 (2003).
Editor's Note. — C. Dale Buckner; 129(4), 425-6 (2003).
Editor's Note. — C. Dale Buckner; 129(5), 565-6 (2003).
Editor's Note. — C. Dale Buckner; 129(6), 707 (2003).
Editor's Note. — C. Dale Buckner; 129(8), 1001-2 (2003).
Editor's Note. — C. Dale Buckner; 129(9), 1153-4 (2003).

Burgess, Ian W.
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. I: Theoretical Development. — Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1093-102 (2003).
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. II: Validations. —Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1103-12 (2003).

Burns, Tim
Strength Curves for Metal Plates in Compression. —Paul Bezkorovainy, Tim Burns, and Kim J. R. Rasmussen; 129(11), 1433-40 (2003).

Cai, C. S.
Steel–Concrete Composite Beams Considering Shear Slip Effects. —Jianguo Nie and C. S. Cai; 129(4), 495-506 (2003).

Caicedo, J. M.
Phase I Benchmark Control Problem for Seismic Response of Cable-Stayed Bridges. —S. J. Dyke, J. M. Caicedo, G. Turan, L. A. Bergman, and S. Hague; 129(7), 857-72 (2003).

Calado, Luis
Experimental Investigation on European Welded Connections. — Elena Mele, Luis Calado, and Antonello De Luca; 129(10), 1301-11 (2003).

Camino, Juan F.
"Convexifying" Linear Matrix Inequality Methods for Integrating Structure and Control Design. —Juan F. Camino, M. C. de Oliveira, and R. E. Skelton; 129(7), 978-88 (2003).

Camp, Charles V.
Flexural Design of Reinforced Concrete Frames Using a Genetic Algorithm. —Charles V. Camp, Shahram Pezeshk, and Håkan Hansson; 129(1), 105-15 (2003).

Chai, Y. H.
Quasi-Static Reversed Cyclic Response of Level and Stepped Cripple Walls. —Y. H. Chai, Tara C. Hutchinson, and Steven M. Vukazich; 129(5), 567-75 (2003).
Geometry of Submerged Funicular Arches in Cartesian Coordinates. —Y. H. Chai and S. K. Kunnath; 129(8), 1087-92 (2003).

Chambers, Janice J.
Effect of Reduced Beam Section Frame Elements on Stiffness of Moment Frames. —Janice J. Chambers, Shaheed Almudhafar, and Frank Stenger; 129(3), 383-93 (2003).

Chang, Chih-Chen
Adaptive Fuzzy Control for Nonlinear Building-Magnetorheological Damper System. — Li Zhou, Chih-Chen Chang, and Li-Xin Wang; 129(7), 905-13 (2003).

Chang, K. C.
Study on Damping Reduction Factor for Buildings under Earthquake Ground Motions. — Y. Y. Lin and K. C. Chang; 129(2), 206-14 (2003).

Chang, P.
Closure to "Database-Assisted Design, Standardization, and Wind Direction Effects" by Antonio Rigato, Peter Chang, and Emil Simiu. — A. Rigato, P. Chang, and E. Simiu; 129(2), 274-5 (2003).

Chang, Shuenn-Yih
Accuracy of Time History Analysis of Impulses. — Shuenn-Yih Chang; 129(3), 357-72 (2003).

Chau, K. W.
Knowledge-Based System on Optimum Design of Liquid Retaining Structures with Genetic Algorithms. — K. W. Chau and F. Albermani; 129(10), 1312-21 (2003).

Chen, G.
Influence of Bond Slip on Crack Spacing in Numerical Modeling of Reinforced Concrete. —G. Chen and G. Baker; 129(11), 1514-21 (2003).

Chen, How-Ji
Modeling Confinement Efficiency of Reinforced Concrete Columns with Rectilinear Transverse Steel Using Artificial Neural Networks. —Chao-Wei Tang, How-Ji Chen, and Tsong Yen; 129(6), 775-83 (2003).

Chen, J. F.
Shear Capacity of Fiber-Reinforced Polymer-Strengthened Reinforced Concrete Beams: Fiber Reinforced Polymer Rupture. —J. F. Chen and J. G. Teng; 129(5), 615-25 (2003).

Chen, Kai
Experimental Studies on the Properties of Constructional Steel at Elevated Temperatures. —Guo-Qiang Li, Shou-Chao Jiang, Ying-Zhi Yin, Kai Chen, and Ming-Fei Li; 129(12), 1717-21 (2003).

Chen, Xinzhong
Efficacy of Tuned Mass Dampers for Bridge Flutter Control. —Xinzhong Chen and Ahsan Kareem; 129(10), 1291-300 (2003).

Cheng, Fu-Ping
Effect of Strength and Fiber Reinforcement on Fire Resistance of High-Strength Concrete Columns. —V. K. R. Kodur, Fu-Ping Cheng, Tien-Chih Wang, and M. A. Sultan; 129(2), 253-9 (2003).

Cheng, J. J. R.
Local Web Buckling Strength of Coped Steel I Beams. — Michael C. H. Yam, Angus C. C. Lam, V. P. Iu, and J. J. R. Cheng; 129(1), 3-11 (2003).

Chicoine, Thierry
Long-Term Behavior and Strength of Partially Encased Composite Columns Made with Built-Up Steel Shapes. —Thierry Chicoine, Bruno Massicotte, and Robert Tremblay; 129(2), 141-50 (2003).

Chintanapakdee, Chatpan
Statistics of Single-Degree-of-Freedom Estimate of Displacement for Pushover Analysis of Buildings. — Anil K. Chopra, Rakesh K. Goel, and Chatpan Chintanapakdee; 129(4), 459-69 (2003).

Cho, Jae Yeol
Static and Fatigue Behavior of Reinforced Concrete Beams Strengthened with Steel Plates for Flexure. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(4), 527-35 (2003).
Failure Behavior and Separation Criterion for Strengthened Concrete Members with Steel Plates. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(9), 1191-8 (2003).

Choi, K.
Moment Magnifier Method for Long-Term Behavior of Flat Plates Subjected to In-Plane Compression. — K. Choi, H. Park, and Y. Shin; 129(1), 87-95 (2003).

Chopra, Anil K.
Statistics of Single-Degree-of-Freedom Estimate of Displacement for Pushover Analysis of Buildings. — Anil K. Chopra, Rakesh K. Goel, and Chatpan Chintanapakdee; 129(4), 459-69 (2003).

Civjan, Scott A.
Behavior of Shear Studs Subjected to Fully Reversed Cyclic Loading. —Scott A. Civjan and Prabhjeet Singh; 129(11), 1466-74 (2003).

Corotis, Ross B.
Design Wind Speed Prediction. —Anne M. Dougherty, Ross B. Corotis, and Anna Segurson; 129(9), 1268-74 (2003).

De Luca, Antonello
Experimental Investigation on European Welded Connections. — Elena Mele, Luis Calado, and Antonello De Luca; 129(10), 1301-11 (2003).

de Oliveira, M. C.
"Convexifying" Linear Matrix Inequality Methods for Integrating Structure and Control Design. —Juan F. Camino, M. C. de Oliveira, and R. E. Skelton; 129(7), 978-88 (2003).

Dhonde, H. B.
Dimensional Analysis of Reinforced Concrete Beams Subjected to Pure Torsion. —D. R. Phatak and H. B. Dhonde; 129(11), 1559-63 (2003).

Domer, Bernd
Adjustable Tensegrity Structures. —Etienne Fest, Kristina Shea, Bernd Domer, and Ian F. C. Smith; 129(4), 515-26 (2003).
Combining Dynamic Relaxation Method with Artificial Neural Networks to Enhance Simulation of Tensegrity Structures. —Bernd Domer, Etienne Fest, Vikram Lalit, and Ian F. C. Smith; 129(5), 672-81 (2003).

Dougherty, Anne M.
Design Wind Speed Prediction. —Anne M. Dougherty, Ross B. Corotis, and Anna Segurson; 129(9), 1268-74 (2003).

Ďuricová, A.
Discussion of "Negative Shear Lag Effect in Box Girders with Varying Depth" by Q. Z. Luo, J. Tang, and Q. S. Li. —M. Rovňák and A. Ďuricová; 129(2), 269-71 (2003).

Dyke, S. J.
Phase I Benchmark Control Problem for Seismic Response of Cable-Stayed Bridges. — S. J. Dyke, J. M. Caicedo, G. Turan, L. A. Bergman, and S. Hague; 129(7), 857-72 (2003).

Earls, C. J.
Cross-Sectional Compactness and Bracing Requirements for HPS483W Girders. — S. J. Thomas and C. J. Earls; 129(12), 1569-83 (2003).
Structural Ductility in Hybrid High Performance Steel Beams. — N. Greco and C. J. Earls; 129(12), 1584-95 (2003).

Easterling, W. Samuel
Behavior and Modeling of a Bolt Bearing on a Single Plate. — Clinton O. Rex and W. Samuel Easterling; 129(6), 792-800 (2003).

Elchalakani, Mohamed
Tests of Cold-Formed Circular Tubular Braces under Cyclic Axial Loading. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 129(4), 507-14 (2003).

El-Dakhakhni, Wael W.
Three-Strut Model for Concrete Masonry-Infilled Steel Frames. —Wael W. El-Dakhakhni, Mohamed Elgaaly, and Ahmad A. Hamid; 129(2), 177-85 (2003).

Elgaaly, Mohamed
Three-Strut Model for Concrete Masonry-Infilled Steel Frames. —Wael W. El-Dakhakhni, Mohamed Elgaaly, and Ahmad A. Hamid; 129(2), 177-85 (2003).

Ellingwood, Bruce R.
Toward Load and Resistance Factor Design for Fiber-Reinforced Polymer Composite Structures. — Bruce R. Ellingwood; 129(4), 449-58 (2003).

Essa, Hesham S.
Behavior of Roof Deck Diaphragms under Quasi-static Cyclic Loading. —Hesham S. Essa, Robert Tremblay, and Colin A. Rogers; 129(12), 1658-66 (2003).

Faella, Ciro
Shear Connection Nonlinearity and Deflections of Steel–Concrete Composite Beams: A Simplified Method. —Ciro Faella, Enzo Martinelli, and Emidio Nigro; 129(1), 12-20 (2003).

Farina, Amy A.
Feasibility and Optimization of Rigidified Inflatable Structures for Housing. —Steven Van Dessel, Achille Messac, Anoop A. Mullur, and Amy A. Farina; 129(11), 1494-502 (2003).

Faust, Thorsten
Connectors for Timber–Lightweight Concrete Composite Structures. —Eric Steinberg, Ricky Selle, and Thorsten Faust; 129(11), 1538-45 (2003).

Feng, Jiu-Bin
Experimental Study and Calculation of Fire Resistance of Concrete-Filled Hollow Steel Columns. —Lin-Hai Han, Xiao-Ling Zhao, You-Fu Yang, and Jiu-Bin Feng; 129(3), 346-56 (2003).

Fest, Etienne
Adjustable Tensegrity Structures. —Etienne Fest, Kristina Shea, Bernd Domer, and Ian F. C. Smith; 129(4), 515-26 (2003).
Combining Dynamic Relaxation Method with Artificial Neural Networks to Enhance Simulation of Tensegrity Structures. — Bernd Domer, Etienne Fest, Vikram Lalit, and Ian F. C. Smith; 129(5), 672-81 (2003).

Filiatrault, A.
Seismic Response of Concentrically Braced Steel Frames Made with Rectangular Hollow Bracing Members. — R. Tremblay, M.-H. Archambault, and A. Filiatrault; 129(12), 1626-36 (2003).

Filippou, Filip C.
Discussion of "Reinforced Concrete Frame Element with Bond Interfaces. II: State Determinations and Numerical Validation" by Suchart Limkatanyu and Enrico Spacone. — Ashraf Ayoub and Filip C. Filippou; 129(10), 1428-9 (2003).

Filliben, James J.
Wind Speeds in ASCE 7 Standard Peak-Gust Map: Assessment. — Emil Simiu, Roseanne Wilcox, Fahim Sadek, and James J. Filliben; 129(4), 427-39 (2003).

Flanagan, Roger D.
Discussion of "Arching in Masonry Walls Subjected to Earthquake Motions" by Athanasios Dafnis, Holger Kolsch, and Hans-Günter Reimerdes. — Richard M. Bennett, Roger D. Flanagan, and R. Craig Henderson; 129(6), 838 (2003).

Foley, Christopher M.
Automated Design of Steel Frames Using Advanced Analysis and Object-Oriented Evolutionary Computation. —Christopher M. Foley and Daniel Schinler; 129(5), 648-60 (2003).

Foliente, Greg C.
Load-Sharing and Redistribution in a One-Story Woodframe Building. —Phillip J. Paevere, Greg C. Foliente, and Bo Kasal; 129(9), 1275-84 (2003).

Foster, Stephen J.
Cracked Membrane Model: Finite Element Implementation. — Stephen J. Foster and Peter Marti; 129(9), 1155-63 (2003).

Frangopol, Dan M.
Evaluation of Expected Life-Cycle Maintenance Cost of Deteriorating Structures. —Jung S. Kong and Dan M. Frangopol; 129(5), 682-91 (2003).
Life-Cycle Reliability-Based Maintenance Cost Optimization of Deteriorating Structures with Emphasis on Bridges. —Jung S. Kong and Dan M. Frangopol; 129(6), 818-28 (2003).

Fricke, K. E.
Summary of a Large- and Small-Scale Unreinforced Masonry Infill Test Program. —R. C. Henderson, K. E. Fricke, W. D. Jones, J. E. Beavers, and R. M. Bennett; 129(12), 1667-75 (2003).

Fung, T. C.
Stress and Strain Concentration Factors of Completely Overlapped Tubular K(N) Joints. —W. M. Gho, T. C. Fung, and C. K. Soh; 129(1), 21-9 (2003).

Galati, Nestore
Field Assessment of Unreinforced Masonry Walls Strengthened with Fiber Reinforced Polymer Laminates. — J. Gustavo Tumialan, Nestore Galati, and Antonio Nanni; 129(8), 1047-56 (2003).

Garlock, Maria M.
Cyclic Load Tests and Analysis of Bolted Top-and-Seat Angle Connections. — Maria M. Garlock, James M. Ricles, and Richard Sause; 129(12), 1615-25 (2003).

Gatto, Kip
Effects of Loading Protocol on the Cyclic Response of Woodframe Shearwalls. — Kip Gatto and Chia-Ming Uang; 129(10), 1384-93 (2003).
Effects of Finish Materials and Dynamic Loading on the Cyclic Response of Woodframe Shearwalls. — Chia-Ming Uang and Kip Gatto; 129(10), 1394-402 (2003).

Gavin, Henri
Fault Tolerance of Semiactive Seismic Isolation. — Henri Gavin, Cenk Alhan, and Natasha Oka; 129(7), 922-32 (2003).

Gerstle, Walter H.
Two Handbooks on Structural Steel Design. — Walter H. Gerstle; 129(6), 842 (2003).

Gho, W. M.
Stress and Strain Concentration Factors of Completely Overlapped Tubular K(N) Joints. — W. M. Gho, T. C. Fung, and C. K. Soh; 129(1), 21-9 (2003).

Goel, Rakesh K.
Statistics of Single-Degree-of-Freedom Estimate of Displacement for Pushover Analysis of Buildings. — Anil K. Chopra, Rakesh K. Goel, and Chatpan Chintanapakdee; 129(4), 459-69 (2003).

Gomes, F. C. T.
Rotational Stiffness of Rectangular Hollow Sections Composite Joints. —L. A. P. Silva, L. F. N. Neves, and F. C. T. Gomes; 129(4), 487-94 (2003).

Greco, N.
Structural Ductility in Hybrid High Performance Steel Beams. —N. Greco and C. J. Earls; 129(12), 1584-95 (2003).

Griffith, M. C.
Improving the Strength and Ductility of Rectangular Reinforced Concrete Columns through Composite Partial Interaction: Tests. —Y. F. Wu, M. C. Griffith, and D. J. Oehlers; 129(9), 1183-90 (2003).

Grzebieta, Raphael
Tests of Cold-Formed Circular Tubular Braces under Cyclic Axial Loading. —Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 129(4), 507-14 (2003).

Hague, S.
Phase I Benchmark Control Problem for Seismic Response of Cable-Stayed Bridges. —S. J. Dyke, J. M. Caicedo, G. Turan, L. A. Bergman, and S. Hague; 129(7), 857-72 (2003).

Haldar, Achintya
Reliability of Frame and Shear Wall Structural Systems. I: Static Loading. —Seung Y. Lee and Achintya Haldar; 129(2), 224-32 (2003).
Reliability of Frame and Shear Wall Structural Systems. II: Dynamic Loading. —Seung Y. Lee and Achintya Haldar; 129(2), 233-40 (2003).

Hamid, Ahmad A.
Three-Strut Model for Concrete Masonry-Infilled Steel Frames. —Wael W. El-Dakhakhni, Mohamed Elgaaly, and Ahmad A. Hamid; 129(2), 177-85 (2003).

Hamilton, H. R., III
Damping in Cantilevered Traffic Signal Structures under Forced Vibration. — P. S. McManus, H. R. Hamilton, III, and J. A. Puckett; 129(3), 373-82 (2003).

Han, Lin-Hai
Concrete-Filled Hollow Structural Steel Columns after Exposure to ISO-834 Fire Standard. — Lin-Hai Han and Jing-si Huo; 129(1), 68-78 (2003).
Experimental Study and Calculation of Fire Resistance of Concrete-Filled Hollow Steel Columns. — Lin-Hai Han, Xiao-Ling Zhao, You-Fu Yang, and Jiu-Bin Feng; 129(3), 346-56 (2003).

Hancock, Gregory J.
Cold-Formed Steel Channels Subjected to Concentrated Bearing Load. — Ben Young and Gregory J. Hancock; 129(8), 1003-10 (2003).
Compression Tests of Channels with Inclined Simple Edge Stiffeners. — Ben Young and Gregory J. Hancock; 129(10), 1403-11 (2003).

Hansson, Håkan
Flexural Design of Reinforced Concrete Frames Using a Genetic Algorithm. —Charles V. Camp, Shahram Pezeshk, and Håkan Hansson; 129(1), 105-15 (2003).

He, W. L.
Applications of Some Semiactive Control Systems to Benchmark Cable-Stayed Bridge. —A. K. Agrawal, J. N. Yang, and W. L. He; 129(7), 884-94 (2003).
Novel Semiactive Friction Controller for Linear Structures against Earthquakes. —W. L. He, A. K. Agrawal, and J. N. Yang; 129(7), 941-50 (2003).

Henderson, R. C.
Summary of a Large- and Small-Scale Unreinforced Masonry Infill Test Program. —R. C. Henderson, K. E. Fricke, W. D. Jones, J. E. Beavers, and R. M. Bennett; 129(12), 1667-75 (2003).

Henderson, R. Craig
Discussion of "Arching in Masonry Walls Subjected to Earthquake Motions" by Athanasios Dafnis, Holger Kolsch, and Hans-Günter Reimerdes. — Richard M. Bennett, Roger D. Flanagan, and R. Craig Henderson; 129(6), 838 (2003).

Heyliger, Paul R.
Adaptive Wood Composite: Experiment. —Watanachai Smittakorn and Paul R. Heyliger; 129(5), 699-702 (2003).

Hirakawa, T.
Fire Resistance of Walls and Floors Using Light-Gauge Steel Shapes. —Y. Sakumoto, T. Hirakawa, H. Masuda, and K. Nakamura; 129(11), 1522-30 (2003).

Hitaka, Toko
Experimental Study on Steel Shear Wall with Slits. —Toko Hitaka and Chiaki Matsui; 129(5), 586-95 (2003).

Hoenderkamp, J. C. D.
Preliminary Analysis of High-Rise Braced Frames with Facade Riggers. —J. C. D. Hoenderkamp and H. H. Snijder; 129(5), 640-7 (2003).

Holden, Tony
Seismic Performance of Precast Reinforced and Prestressed Concrete Walls. — Tony Holden, Jose Restrepo, and John B. Mander; 129(3), 286-96 (2003).

Hu, Hsuan-Teh
Nonlinear Analysis of Axially Loaded Concrete-Filled Tube Columns with Confinement Effect. — Hsuan-Teh Hu, Chiung-Shiann Huang, Ming-Hsien Wu, and Yih-Min Wu; 129(10), 1322-9 (2003).

Huang, Chiung-Shiann
Nonlinear Analysis of Axially Loaded Concrete-Filled Tube Columns with Confinement Effect. — Hsuan-Teh Hu, Chiung-Shiann Huang, Ming-Hsien Wu, and Yih-Min Wu; 129(10), 1322-9 (2003).

Huang, X.
Overstrength and Ductility Factors for Steel Frames Designed According to BS 5950. — T. Balendra and X. Huang; 129(8), 1019-35 (2003).

Huang, Z. F.
Analytical Fire Resistance of Axially Restrained Steel Columns. —Z. F. Huang and K. H. Tan; 129(11), 1531-7 (2003).

Huang, Zhaohui
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. I: Theoretical Development. — Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1093-102 (2003).
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. II: Validations. —Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1103-12 (2003).

Huo, Jing-si
Concrete-Filled Hollow Structural Steel Columns after Exposure to ISO-834 Fire Standard. —Lin-Hai Han and Jing-si Huo; 129(1), 68-78 (2003).

Hurtado, Jorge E.
Classification Approach for Reliability Analysis with Stochastic Finite-Element Modeling. —Jorge E. Hurtado and Diego A. Alvarez; 129(8), 1141-9 (2003).

Hutchinson, Tara C.
Quasi-Static Reversed Cyclic Response of Level and Stepped Cripple Walls. —Y. H. Chai, Tara C. Hutchinson, and Steven M. Vukazich; 129(5), 567-75 (2003).

Ikeda, Yoshiki
Semiactive Structural-Control Based on Variable Slip-Force Level Dampers. —Akira Nishitani, Yoshihiro Nitta, and Yoshiki Ikeda; 129(7), 933-40 (2003).

Iu, V. P.
Local Web Buckling Strength of Coped Steel I Beams. — Michael C. H. Yam, Angus C. C. Lam, V. P. Iu, and J. J. R. Cheng; 129(1), 3-11 (2003).

Iwan, W. D.
Control of a Civil Structure Using an Electric Machine with Semiactive Capability. —J. T. Scruggs and W. D. Iwan; 129(7), 951-9 (2003).

Iyama, Jun
Effects of Material Toughness and Plate Thickness on Brittle Fracture of Steel Members. — Hitoshi Kuwamura, Jun Iyama, and Koji Matsui; 129(11), 1475-83 (2003).

Jeppsson, Joakim
Behavior of Reinforced Concrete Beams with Loss of Bond at Longitudinal Reinforcement. — Joakim Jeppsson and Sven Thelandersson; 129(10), 1376-83 (2003).

Jiang, Shou-Chao
Experimental Studies on the Properties of Constructional Steel at Elevated Temperatures. — Guo-Qiang Li, Shou-Chao Jiang, Ying-Zhi Yin, Kai Chen, and Ming-Fei Li; 129(12), 1717-21 (2003).

Jones, W. D.
Summary of a Large- and Small-Scale Unreinforced Masonry Infill Test Program. — R. C. Henderson, K. E. Fricke, W. D. Jones, J. E. Beavers, and R. M. Bennett; 129(12), 1667-75 (2003).

Jung, Hyung-Jo
Control of Seismically Excited Cable-Stayed Bridge Employing Magnetorheological Fluid Dampers. — Hyung-Jo Jung, Billie F. Spencer, Jr., and In-Won Lee; 129(7), 873-83 (2003).

Jung, Woo-Young
Energy-Dissipating Polymer Matrix Composite-Infill Wall System for Seismic Retrofitting. —Amjad J. Aref and Woo-Young Jung; 129(4), 440-8 (2003).

Karbhari, Vistasp
Poststrengthening of Concrete Slabs: Full-Scale Testing and Design Recommendations. —Werner Seim, Alvaro Vasquez, Vistasp Karbhari, and Frieder Seible; 129(6), 743-52 (2003).

Kareem, Ahsan
Aerodynamic Loads on Tall Buildings: Interactive Database. —Yin Zhou, Tracy Kijewski, and Ahsan Kareem; 129(3), 394-404 (2003).
Semiactive Tuned Liquid Column Dampers: Experimental Study. —Swaroop K. Yalla and Ahsan Kareem; 129(7), 960-71 (2003).
Efficacy of Tuned Mass Dampers for Bridge Flutter Control. —Xinzhong Chen and Ahsan Kareem; 129(10), 1291-300 (2003).
Closure to "Definition of Wind Profiles in ASCE 7" by Yin Zhou and Ahsan Kareem. —Yin Zhou and Ahsan Kareem; 129(11), 1565-6 (2003).

Kasal, Bo
Load-Sharing and Redistribution in a One-Story Woodframe Building. —Phillip J. Paevere, Greg C. Foliente, and Bo Kasal; 129(9), 1275-84 (2003).

Kawashima, Kazuhiko
Neural Network Modeling of Confined Compressive Strength and Strain of Circular Concrete Columns. — Andres W. C. Oreta and Kazuhiko Kawashima; 129(4), 554-61 (2003).

Kihl, David P.
Optimal *S-N* Testing for Variable-Amplitude Fatigue Applications. —Loren D. Lutes, Shahram Sarkani, David P. Kihl, and Jeffrey E. Beach; 129(6), 829-37 (2003).

Kijewski, Tracy
Aerodynamic Loads on Tall Buildings: Interactive Database. — Yin Zhou, Tracy Kijewski, and Ahsan Kareem; 129(3), 394-404 (2003).

Kim, C. H.
Ultimate Strength of Ribbed Slab Composite Beams with Web Openings. — J. W. Park, C. H. Kim, and S. C. Yang; 129(6), 810-7 (2003).

Kim, Hakjun
Microplane Model for Reinforced-Concrete Planar Members in Tension-Compression. — Honggun Park and Hakjun Kim; 129(3), 337-45 (2003).

Kim, Jeong-Tae
Nondestructive Crack Detection Algorithm for Full-Scale Bridges. — Jeong-Tae Kim and Norris Stubbs; 129(10), 1358-66 (2003).

Kim, Tae-Hoon
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. I: Theory and Formulation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1199-207 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. —Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).

Kobori, Takuji
Switching Oil Damper with Built-in Controller for Structural Control. —Haruhiko Kurino, Jun Tagami, Kan Shimizu, and Takuji Kobori; 129(7), 895-904 (2003).
Reliability of Applied Semiactive Structural Control System. —Narito Kurata and Takuji Kobori; 129(7), 914-21 (2003).

Kodur, V. K. R.
Effect of Strength and Fiber Reinforcement on Fire Resistance of High-Strength Concrete Columns. —V. K. R. Kodur, Fu-Ping Cheng, Tien-Chih Wang, and M. A. Sultan; 129(2), 253-9 (2003).

Kollár, László P.
Local Buckling of Fiber Reinforced Plastic Composite Structural Members with Open and Closed Cross Sections. —László P. Kollár; 129(11), 1503-13 (2003).

Kong, Jung S.
Evaluation of Expected Life-Cycle Maintenance Cost of Deteriorating Structures. —Jung S. Kong and Dan M. Frangopol; 129(5), 682-91 (2003).
Life-Cycle Reliability-Based Maintenance Cost Optimization of Deteriorating Structures with Emphasis on Bridges. —Jung S. Kong and Dan M. Frangopol; 129(6), 818-28 (2003).

Kopp, G. A.
Discussion of "Database-Assisted Design, Standardization, and Wind Direction Effects" by Antonio Rigato, Peter Chang, and Emil Simiu. —M. Pande, G. A. Kopp, and D. Surry; 129(2), 272-4 (2003).

Kosteski, N.
Welded Tee-to-HSS Connections. —N. Kosteski and J. A. Packer; 129(2), 151-9 (2003).
Longitudinal Plate and Through Plate-to-Hollow Structural Section Welded Connections. —N. Kosteski and J. A. Packer; 129(4), 478-86 (2003).

Kunnath, S. K.
Geometry of Submerged Funicular Arches in Cartesian Coordinates. — Y. H. Chai and S. K. Kunnath; 129(8), 1087-92 (2003).

Kunnath, Sashi K.
Editor's Note. — Sashi K. Kunnath; 129(7), 843-4 (2003).
Editor's Note. — Sashi K. Kunnath; 129(10), 1289-90 (2003).
Editor's Note. — Sashi K. Kunnath; 129(11), 1431-2 (2003).
Deflection of Metal Plate Connected Wood Trusses with Nontriangulated Openings. — Kathleen A. Wills Rittenburg and Sashi K. Kunnath; 129(11), 1546-58 (2003).
Editor's Note. — Sashi K. Kunnath; 129(12), 1567-8 (2003).

Kurata, Narito
Reliability of Applied Semiactive Structural Control System. — Narito Kurata and Takuji Kobori; 129(7), 914-21 (2003).

Kurino, Haruhiko
Switching Oil Damper with Built-in Controller for Structural Control. —Haruhiko Kurino, Jun Tagami, Kan Shimizu, and Takuji Kobori; 129(7), 895-904 (2003).

Kuwamura, Hitoshi
Effects of Material Toughness and Plate Thickness on Brittle Fracture of Steel Members. —Hitoshi Kuwamura, Jun Iyama, and Koji Matsui; 129(11), 1475-83 (2003).

Kwan, Wing-Pin
Influence of Hysteretic Behavior on Equivalent Period and Damping of Structural Systems. —Wing-Pin Kwan and Sarah L. Billington; 129(5), 576-85 (2003).

Lalit, Vikram
Combining Dynamic Relaxation Method with Artificial Neural Networks to Enhance Simulation of Tensegrity Structures. —Bernd Domer, Etienne Fest, Vikram Lalit, and Ian F. C. Smith; 129(5), 672-81 (2003).

Lam, Angus C. C.
Local Web Buckling Strength of Coped Steel I Beams. — Michael C. H. Yam, Angus C. C. Lam, V. P. Iu, and J. J. R. Cheng; 129(1), 3-11 (2003).

Lam, S. S. E.
Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. —S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).

Lecce, Maura
Lap Splice Steel Connections with Stainless Steel Nails. —Maura Lecce and Jeffrey A. Packer; 129(9), 1250-8 (2003).

Lee, C.
Flexural Design of Reinforced Concrete Frames by Genetic Algorithm. —C. Lee and J. Ahn; 129(6), 762-74 (2003).

Lee, In-Won
Control of Seismically Excited Cable-Stayed Bridge Employing Magnetorheological Fluid Dampers. — Hyung-Jo Jung, Billie F. Spencer, Jr., and In-Won Lee; 129(7), 873-83 (2003).

Lee, Kwang-Myong
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. I: Theory and Formulation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1199-207 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).

Lee, Seung Y.
Reliability of Frame and Shear Wall Structural Systems. I: Static Loading. — Seung Y. Lee and Achintya Haldar; 129(2), 224-32 (2003).
Reliability of Frame and Shear Wall Structural Systems. II: Dynamic Loading. — Seung Y. Lee and Achintya Haldar; 129(2), 233-40 (2003).

Lee, Sung C.
New Design Rule for Intermediate Transverse Stiffeners Attached on Web Panels. — Sung C. Lee, Chai H. Yoo, and Dong Y. Yoon; 129(12), 1607-14 (2003).

Légeron, Frédéric
Uniaxial Confinement Model for Normal- and High-Strength Concrete Columns. —Frédéric Légeron and Patrick Paultre; 129(2), 241-52 (2003).

Li, C. Q.
Life-Cycle Modeling of Corrosion-Affected Concrete Structures: Propagation. —C. Q. Li; 129(6), 753-61 (2003).

Li, C. S.
Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. —S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).

Li, Chunxiang
Active Multiple Tuned Mass Dampers: A New Control Strategy. —Chunxiang Li, Yanxia Liu, and Zhaomin Wang; 129(7), 972-7 (2003).

Li, Guo-Qiang
Experimental Studies on the Properties of Constructional Steel at Elevated Temperatures. —Guo-Qiang Li, Shou-Chao Jiang, Ying-Zhi Yin, Kai Chen, and Ming-Fei Li; 129(12), 1717-21 (2003).

Li, Ming-Fei
Experimental Studies on the Properties of Constructional Steel at Elevated Temperatures. —Guo-Qiang Li, Shou-Chao Jiang, Ying-Zhi Yin, Kai Chen, and Ming-Fei Li; 129(12), 1717-21 (2003).

Li, Q. S.
Calculation of Moments on Top Slab in Single-Cell Box Girders. —Q. Z. Luo, J. Tang, and Q. S. Li; 129(1), 130-4 (2003).
Closure to "Negative Shear Lag Effect in Box Girders with Varying Depth" by Q. Z. Luo, J. Tang, and Q. S. Li. —Q. Z. Luo, J. Tang, and Q. S. Li; 129(2), 271-2 (2003).

Li, X.
Alternative Shear Reinforcement for Reinforced Concrete Flat Slabs. —K. Pilakoutas and X. Li; 129(9), 1164-72 (2003).

Limkatanyu, Sucharat
Closure to "Reinforced Concrete Frame Element with Bond Interfaces. II: State Determination and Numerical Validation" by Sucharat Limkatanyu and Enrico Spacone. — Sucharat Limkatanyu and Enrico Spacone; 129(10), 1430 (2003).

Lin, Y. Y.
Study on Damping Reduction Factor for Buildings under Earthquake Ground Motions. — Y. Y. Lin and K. C. Chang; 129(2), 206-14 (2003).

Lin, Zhuhai
Concrete Uniaxial Tensile Strength and Cylinder Splitting Test. — Zhuhai Lin and Laurence Wood; 129(5), 692-8 (2003).

Liu, Yahua
Experimental Investigation of Cold-Formed Stainless Steel Columns. — Ben Young and Yahua Liu; 129(2), 169-76 (2003).

Liu, Yanxia
Active Multiple Tuned Mass Dampers: A New Control Strategy. — Chunxiang Li, Yanxia Liu, and Zhaomin Wang; 129(7), 972-7 (2003).

Liu, Z. Q.
Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. —S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).

Lourenço, Paulo B.
Cap Model for Limit Analysis and Strengthening of Masonry Structures. —Agustín Orduña and Paulo B. Lourenço; 129(10), 1367-75 (2003).

Lowes, Laura N.
Modeling Reinforced-Concrete Beam-Column Joints Subjected to Cyclic Loading. —Laura N. Lowes and Arash Altoontash; 129(12), 1686-97 (2003).

Lu, Le-Wu
Closure to "Experimental Behavior of High Strength Square Concrete-Filled Steel Tube Beam-Columns" by Amit H. Varma, James M. Ricles, Richard Sause, and Le-We Lu. —Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 129(9), 1286 (2003).

Lu, X. L.
Experimental Seismic Study of Adjacent Buildings with Fluid Dampers. —Z. Yang, Y. L. Xu, and X. L. Lu; 129(2), 197-205 (2003).

Lu, Xilin
Tendon Model for Nonlinear Analysis of Externally Prestressed Concrete Structures. —Xiao-Han Wu and Xilin Lu; 129(1), 96-104 (2003).

Luo, Q. Z.
Calculation of Moments on Top Slab in Single-Cell Box Girders. —Q. Z. Luo, J. Tang, and Q. S. Li; 129(1), 130-4 (2003).
Closure to "Negative Shear Lag Effect in Box Girders with Varying Depth" by Q. Z. Luo, J. Tang, and Q. S. Li. —Q. Z. Luo, J. Tang, and Q. S. Li; 129(2), 271-2 (2003).

Lutes, Loren D.
Optimal *S-N* Testing for Variable-Amplitude Fatigue Applications. —Loren D. Lutes, Shahram Sarkani, David P. Kihl, and Jeffrey E. Beach; 129(6), 829-37 (2003).

Maberry, Steven
Review of *Integrated Life Cycle Design of Structures* by Asko Sarja. — Steven Maberry; 129(5), 706 (2003).

Maison, Bruce F.
Discussion of "Base-Isolated FCC Building: Impact Response in Northridge Earthquake" by Satish Nagarajaiah and Xiaohong Sun. — Bruce F. Maison and Carlos E. Ventura; 129(3), 421-2 (2003).

Mander, John B.
Seismic Performance of Precast Reinforced and Prestressed Concrete Walls. — Tony Holden, Jose Restrepo, and John B. Mander; 129(3), 286-96 (2003).

Marini, Alessandra
Nonlinear Analysis as a Diagnostic Tool for the Strengthening of an Old Wooden Dome. — Alessandra Marini and Paolo Riva; 129(10), 1412-21 (2003).

Marti, Peter
Cracked Membrane Model: Finite Element Implementation. — Stephen J. Foster and Peter Marti; 129(9), 1155-63 (2003).

Martinelli, Enzo
Shear Connection Nonlinearity and Deflections of Steel–Concrete Composite Beams: A Simplified Method. —Ciro Faella, Enzo Martinelli, and Emidio Nigro; 129(1), 12-20 (2003).

Maru, Savita
Effect of Creep and Shrinkage on RC Frames with High Beam Stiffness. —Savita Maru, M. Asfaw, R. K. Sharma, and A. K. Nagpal; 129(4), 536-43 (2003).

Massicotte, Bruno
Long-Term Behavior and Strength of Partially Encased Composite Columns Made with Built-Up Steel Shapes. —Thierry Chicoine, Bruno Massicotte, and Robert Tremblay; 129(2), 141-50 (2003).

Masuda, H.
Fire Resistance of Walls and Floors Using Light-Gauge Steel Shapes. —Y. Sakumoto, T. Hirakawa, H. Masuda, and K. Nakamura; 129(11), 1522-30 (2003).

Matamoros, Adolfo B.
Drift Limits of High-Strength Concrete Columns Subjected to Load Reversals. —Adolfo B. Matamoros and Mete A. Sozen; 129(3), 297-313 (2003).

Matsui, Chiaki
Experimental Study on Steel Shear Wall with Slits. —Toko Hitaka and Chiaki Matsui; 129(5), 586-95 (2003).

Matsui, Koji
Effects of Material Toughness and Plate Thickness on Brittle Fracture of Steel Members. —Hitoshi Kuwamura, Jun Iyama, and Koji Matsui; 129(11), 1475-83 (2003).

McDaniel, Cole C.
Cyclic Testing of Built-Up Steel Shear Links for the New Bay Bridge. —Cole C. McDaniel, Chia-Ming Uang, and Frieder Seible; 129(6), 801-9 (2003).

McFadden, P. D.
Nonlinear Vibration Characteristics of Damaged Concrete Beams. —S. A. Neild, M. S. Williams, and P. D. McFadden; 129(2), 260-8 (2003).

McLean, D. I.
Application of Dynamic System Identification to Timber Bridges. — S. T. Peterson, D. I. McLean, and D. G. Pollock; 129(1), 116-24 (2003).

McManus, P. S.
Damping in Cantilevered Traffic Signal Structures under Forced Vibration. — P. S. McManus, H. R. Hamilton, III, and J. A. Puckett; 129(3), 373-82 (2003).

McMullin, Kurt Michael
Steel Semirigid Column–Tree Moment Resisting Frame Seismic Behavior. — Kurt Michael McMullin and Abolhassan Astaneh-Asl; 129(9), 1243-9 (2003).

Melchers, Robert E.
Probabilistic Model for Marine Corrosion of Steel for Structural Reliability Assessment. — Robert E. Melchers; 129(11), 1484-93 (2003).

Mele, Elena
Experimental Investigation on European Welded Connections. — Elena Mele, Luis Calado, and Antonello De Luca; 129(10), 1301-11 (2003).

Menzemer, Craig C.
Ultimate Compressive Strength of Aluminum Plate Elements. —Yugang Xiao and Craig C. Menzemer; 129(11), 1441-7 (2003).

Messac, Achille
Feasibility and Optimization of Rigidified Inflatable Structures for Housing. —Steven Van Dessel, Achille Messac, Anoop A. Mullur, and Amy A. Farina; 129(11), 1494-502 (2003).

Miranda, Eduardo
Dynamic Instability of Simple Structural Systems. —Eduardo Miranda and Sinan D. Akkar; 129(12), 1722-6 (2003).

Mitchell, Denis
Seismic Retrofit of Shear Walls with Headed Bars and Carbon Fiber Wrap. —James Paterson and Denis Mitchell; 129(5), 606-14 (2003).

Moan, Torgeir
Experimental and Numerical Prediction of Collapse of Flatbar Stiffeners in Aluminum Panels. —Yufeng Zha and Torgeir Moan; 129(2), 160-8 (2003).

Mock Shin, Hyun
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. —Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).

Mohareb, Magdi
Plastic Resistance of Pipe Sections: Upper Bound Solution. —Magdi Mohareb; 129(1), 41-8 (2003).
Exact Finite Element for Nonuniform Torsion of Open Sections. —Magdi Mohareb and Farhood Nowzartash; 129(2), 215-23 (2003).
Testing of Steel Pipes Under Bending, Twist, and Shear. —Istemi Faruk Ozkan and Magdi Mohareb; 129(10), 1350-7 (2003).

Mullur, Anoop A.
Feasibility and Optimization of Rigidified Inflatable Structures for Housing. —Steven Van Dessel, Achille Messac, Anoop A. Mullur, and Amy A. Farina; 129(11), 1494-502 (2003).

Mursi, Mohanad
Strength of Concrete Filled Steel Box Columns Incorporating Interaction Buckling. — Mohanad Mursi and Brian Uy; 129(5), 626-39 (2003).

Nagarajaiah, S.
State of the Art of Structural Control. — B. F. Spencer, Jr., and S. Nagarajaiah; 129(7), 845-56 (2003).

Nagarajaiah, Satish
Closure to "Base-Isolated FCC Building: Impact Response in Northridge Earthquake" by Satish Nagarajaiah and Xiaohong Sun. — Satish Nagarajaiah and Xiaohong Sun; 129(3), 422-3 (2003).

Nagavi, Razi S.
Nonlinear Behavior of Heavy Class Steel Truss Bridges. — Razi S. Nagavi and A. Emin Aktan; 129(8), 1113-21 (2003).

Nagpal, A. K.
Effect of Creep and Shrinkage on RC Frames with High Beam Stiffness. — Savita Maru, M. Asfaw, R. K. Sharma, and A. K. Nagpal; 129(4), 536-43 (2003).

Nakamura, K.
Fire Resistance of Walls and Floors Using Light-Gauge Steel Shapes. —Y. Sakumoto, T. Hirakawa, H. Masuda, and K. Nakamura; 129(11), 1522-30 (2003).

Nakano, Masaaki
Numerical Analysis of Multiple Discrete Cracks in Concrete Dams Using Extended Fictitious Crack Model. —Zihai Shi, Masaki Suzuki, and Masaaki Nakano; 129(3), 324-36 (2003).

Nanni, Antonio
Field Assessment of Unreinforced Masonry Walls Strengthened with Fiber Reinforced Polymer Laminates. — J. Gustavo Tumialan, Nestore Galati, and Antonio Nanni; 129(8), 1047-56 (2003).

Neild, S. A.
Nonlinear Vibration Characteristics of Damaged Concrete Beams. —S. A. Neild, M. S. Williams, and P. D. McFadden; 129(2), 260-8 (2003).

Neves, L. F. N.
Rotational Stiffness of Rectangular Hollow Sections Composite Joints. —L. A. P. Silva, L. F. N. Neves, and F. C. T. Gomes; 129(4), 487-94 (2003).

Nie, Jianguo
Steel–Concrete Composite Beams Considering Shear Slip Effects. —Jianguo Nie and C. S. Cai; 129(4), 495-506 (2003).

Nigro, Emidio
Shear Connection Nonlinearity and Deflections of Steel–Concrete Composite Beams: A Simplified Method. —Ciro Faella, Enzo Martinelli, and Emidio Nigro; 129(1), 12-20 (2003).

Nishitani, Akira
Semiactive Structural-Control Based on Variable Slip-Force Level Dampers. —Akira Nishitani, Yoshihiro Nitta, and Yoshiki Ikeda; 129(7), 933-40 (2003).

Nitta, Yoshihiro
Semiactive Structural-Control Based on Variable Slip-Force Level Dampers. —Akira Nishitani, Yoshihiro Nitta, and Yoshiki Ikeda; 129(7), 933-40 (2003).

Nowzartash, Farhood
Exact Finite Element for Nonuniform Torsion of Open Sections. — Magdi Mohareb and Farhood Nowzartash; 129(2), 215-23 (2003).

Oehlers, D. J.
Improving the Strength and Ductility of Rectangular Reinforced Concrete Columns through Composite Partial Interaction: Tests. — Y. F. Wu, M. C. Griffith, and D. J. Oehlers; 129(9), 1183-90 (2003).

Oh, Byung Hwan
Static and Fatigue Behavior of Reinforced Concrete Beams Strengthened with Steel Plates for Flexure. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(4), 527-35 (2003).
Failure Behavior and Separation Criterion for Strengthened Concrete Members with Steel Plates. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(9), 1191-8 (2003).

Oka, Natasha
Fault Tolerance of Semiactive Seismic Isolation. — Henri Gavin, Cenk Alhan, and Natasha Oka; 129(7), 922-32 (2003).

Orduña, Agustín
Cap Model for Limit Analysis and Strengthening of Masonry Structures. —Agustín Orduña and Paulo B. Lourenço; 129(10), 1367-75 (2003).

Oreta, Andres W. C.
Neural Network Modeling of Confined Compressive Strength and Strain of Circular Concrete Columns. — Andres W. C. Oreta and Kazuhiko Kawashima; 129(4), 554-61 (2003).

Ozkan, Istemi Faruk
Testing of Steel Pipes Under Bending, Twist, and Shear. —Istemi Faruk Ozkan and Magdi Mohareb; 129(10), 1350-7 (2003).

Packer, J. A.
Welded Tee-to-HSS Connections. —N. Kosteski and J. A. Packer; 129(2), 151-9 (2003).
Longitudinal Plate and Through Plate-to-Hollow Structural Section Welded Connections. —N. Kosteski and J. A. Packer; 129(4), 478-86 (2003).

Packer, Jeffrey A.
Lap Splice Steel Connections with Stainless Steel Nails. —Maura Lecce and Jeffrey A. Packer; 129(9), 1250-8 (2003).

Paevere, Phillip J.
Load-Sharing and Redistribution in a One-Story Woodframe Building. —Phillip J. Paevere, Greg C. Foliente, and Bo Kasal; 129(9), 1275-84 (2003).

Pande, M.
Discussion of "Database-Assisted Design, Standardization, and Wind Direction Effects" by Antonio Rigato, Peter Chang, and Emil Simiu. —M. Pande, G. A. Kopp, and D. Surry; 129(2), 272-4 (2003).

Paquette, Jocelyn
Pseudo-Dynamic Testing of Unreinforced Masonry Building with Flexible Diaphragm. —Jocelyn Paquette and Michel Bruneau; 129(6), 708-16 (2003).

Park, Dae Gyun
Static and Fatigue Behavior of Reinforced Concrete Beams Strengthened with Steel Plates for Flexure. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(4), 527-35 (2003).
Failure Behavior and Separation Criterion for Strengthened Concrete Members with Steel Plates. — Byung Hwan Oh, Jae Yeol Cho, and Dae Gyun Park; 129(9), 1191-8 (2003).

Park, H.
Moment Magnifier Method for Long-Term Behavior of Flat Plates Subjected to In-Plane Compression. — K. Choi, H. Park, and Y. Shin; 129(1), 87-95 (2003).

Park, Honggun
Microplane Model for Reinforced-Concrete Planar Members in Tension-Compression. — Honggun Park and Hakjun Kim; 129(3), 337-45 (2003).

Park, J. W.
Ultimate Strength of Ribbed Slab Composite Beams with Web Openings. — J. W. Park, C. H. Kim, and S. C. Yang; 129(6), 810-7 (2003).

Park, Jong S.
Lateral-Torsional Buckling of Stepped Beams. — Jong S. Park and J. Michael Stallings; 129(11), 1457-65 (2003).

Paterson, James
Seismic Retrofit of Shear Walls with Headed Bars and Carbon Fiber Wrap. —James Paterson and Denis Mitchell; 129(5), 606-14 (2003).

Paultre, Patrick
Uniaxial Confinement Model for Normal- and High-Strength Concrete Columns. —Frédéric Légeron and Patrick Paultre; 129(2), 241-52 (2003).

Peterson, S. T.
Application of Dynamic System Identification to Timber Bridges. —S. T. Peterson, D. I. McLean, and D. G. Pollock; 129(1), 116-24 (2003).

Pezeshk, Shahram
Flexural Design of Reinforced Concrete Frames Using a Genetic Algorithm. —Charles V. Camp, Shahram Pezeshk, and Håkan Hansson; 129(1), 105-15 (2003).

Phatak, D. R.
Dimensional Analysis of Reinforced Concrete Beams Subjected to Pure Torsion. —D. R. Phatak and H. B. Dhonde; 129(11), 1559-63 (2003).

Pilakoutas, K.
Alternative Shear Reinforcement for Reinforced Concrete Flat Slabs. —K. Pilakoutas and X. Li; 129(9), 1164-72 (2003).

Pircher, Martin
Closure to "Buckling of Thin-Walled Silos and Tanks under Axial Load—Some New Aspects" by Martin Pircher and Russell Q. Bridge. —Martin Pircher and Russell Q. Bridge; 129(5), 704-5 (2003).

Plank, Roger J.
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. I: Theoretical Development. — Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1093-102 (2003).
Modeling Membrane Action of Concrete Slabs in Composite Buildings in Fire. II: Validations. —Zhaohui Huang, Ian W. Burgess, and Roger J. Plank; 129(8), 1103-12 (2003).

Pollock, D. G.
Application of Dynamic System Identification to Timber Bridges. — S. T. Peterson, D. I. McLean, and D. G. Pollock; 129(1), 116-24 (2003).

Puckett, J. A.
Damping in Cantilevered Traffic Signal Structures under Forced Vibration. — P. S. McManus, H. R. Hamilton, III, and J. A. Puckett; 129(3), 373-82 (2003).

Qiao, Pizhong
Local Buckling of Composite Fiber-Reinforced Plastic Wide-Flange Sections. — Pizhong Qiao and Guiping Zou; 129(1), 125-9 (2003).

Ragavan, Vinasithamby
Effects of Stiffeners on Nonlinear Stability of Self-Erecting Dome. — Vinasithamby Ragavan and Amde M. Amde; 129(1), 49-55 (2003).

Rahmatalla, Salam
Form Finding of Sparse Structures with Continuum Topology Optimization. — Salam Rahmatalla and Colby C. Swan; 129(12), 1707-16 (2003).

Rajasekaran, Sundaramoorthy
Discussion of "Neural Network Model for Uplift Load Capacity of Metal Roof Panels" by Gene F. Sirca Jr. and Hojjat Adeli. —Sundaramoorthy Rajasekaran and Riya Mariam Varki; 129(4), 562 (2003).

Rasmussen, Kim J. R.
Strength Curves for Metal Plates in Compression. —Paul Bezkorovainy, Tim Burns, and Kim J. R. Rasmussen; 129(11), 1433-40 (2003).

Reinhorn, Andrei M.
Design of Amplified Structural Damping Using Optimal Considerations. —Yuri Ribakov and Andrei M. Reinhorn; 129(10), 1422-7 (2003).

Restrepo, Jose
Seismic Performance of Precast Reinforced and Prestressed Concrete Walls. —Tony Holden, Jose Restrepo, and John B. Mander; 129(3), 286-96 (2003).

Rex, Clinton O.
Behavior and Modeling of a Bolt Bearing on a Single Plate. —Clinton O. Rex and W. Samuel Easterling; 129(6), 792-800 (2003).

Ribakov, Yuri
Design of Amplified Structural Damping Using Optimal Considerations. —Yuri Ribakov and Andrei M. Reinhorn; 129(10), 1422-7 (2003).

Richard, Ralph M.
Discussion of "General Issues Influencing Connection Performance" by Charles W. Roeder. —Ralph M. Richard; 129(6), 838-40 (2003).

Ricles, James M.
Closure to "Experimental Behavior of High Strength Square Concrete-Filled Steel Tube Beam-Columns" by Amit H. Varma, James M. Ricles, Richard Sause, and Le-We Lu. —Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 129(9), 1286 (2003).
Cyclic Load Tests and Analysis of Bolted Top-and-Seat Angle Connections. —Maria M. Garlock, James M. Ricles, and Richard Sause; 129(12), 1615-25 (2003).

Rigato, A.
Closure to "Database-Assisted Design, Standardization, and Wind Direction Effects" by Antonio Rigato, Peter Chang, and Emil Simiu. — A. Rigato, P. Chang, and E. Simiu; 129(2), 274-5 (2003).

Riley, Michael A.
Discussion of "Definition of Wind Profiles in ASCE 7" by Yin Zhou and Ahsan Kareem. — Emil Simiu, Fahim Sadek, and Michael A. Riley; 129(11), 1564-5 (2003).

Rittenburg, Kathleen A. Wills
Deflection of Metal Plate Connected Wood Trusses with Nontriangulated Openings. — Kathleen A. Wills Rittenburg and Sashi K. Kunnath; 129(11), 1546-58 (2003).

Riva, Paolo
Nonlinear Analysis as a Diagnostic Tool for the Strengthening of an Old Wooden Dome. — Alessandra Marini and Paolo Riva; 129(10), 1412-21 (2003).

Roeder, Charles W.
Closure to "General Issues Influencing Connection Performance" by Charles W. Roeder. — Charles W. Roeder; 129(6), 840-1 (2003).

Rogers, Colin A.
Inelastic Seismic Response of Side Lap Fasteners for Steel Roof Deck Diaphragms. —Colin A. Rogers and Robert Tremblay; 129(12), 1637-46 (2003).
Inelastic Seismic Response of Frame Fasteners for Steel Roof Deck Diaphragms. —Colin A. Rogers and Robert Tremblay; 129(12), 1647-57 (2003).
Behavior of Roof Deck Diaphragms under Quasi-static Cyclic Loading. —Hesham S. Essa, Robert Tremblay, and Colin A. Rogers; 129(12), 1658-66 (2003).

Rovňák, M.
Discussion of "Negative Shear Lag Effect in Box Girders with Varying Depth" by Q. Z. Luo, J. Tang, and Q. S. Li. —M. Rovňák and A. Ďuricová; 129(2), 269-71 (2003).

Saadatmanesh, H.
Strengthening of Steel-Concrete Composite Girders Using Carbon Fiber Reinforced Polymers Sheets. — M. Tavakkolizadeh and H. Saadatmanesh; 129(1), 30-40 (2003).
Fatigue Strength of Steel Girders Strengthened with Carbon Fiber Reinforced Polymer Patch. —M. Tavakkolizadeh and H. Saadatmanesh; 129(2), 186-96 (2003).

Saatcioglu, Murat
External Prestressing Concrete Columns for Improved Seismic Shear Resistance. —Murat Saatcioglu and Cem Yalcin; 129(8), 1057-70 (2003).

Sadek, Fahim
Wind Speeds in ASCE 7 Standard Peak-Gust Map: Assessment. —Emil Simiu, Roseanne Wilcox, Fahim Sadek, and James J. Filliben; 129(4), 427-39 (2003).
Discussion of "Definition of Wind Profiles in ASCE 7" by Yin Zhou and Ahsan Kareem. —Emil Simiu, Fahim Sadek, and Michael A. Riley; 129(11), 1564-5 (2003).

Sakumoto, Y.
Fire Resistance of Walls and Floors Using Light-Gauge Steel Shapes. — Y. Sakumoto, T. Hirakawa, H. Masuda, and K. Nakamura; 129(11), 1522-30 (2003).

Saliklis, Edmond P.
Hershey Arena: Anton Tedesko's Pioneering Form. — Edmond P. Saliklis and David P. Billington; 129(3), 278-85 (2003).

Sarkani, Shahram
Optimal *S-N* Testing for Variable-Amplitude Fatigue Applications. — Loren D. Lutes, Shahram Sarkani, David P. Kihl, and Jeffrey E. Beach; 129(6), 829-37 (2003).

Sasaki, Atsushi
Damping Evaluation Using Full-Scale Data of Buildings in Japan. — Naoki Satake, Ken-ichi Suda, Toshiharu Arakawa, Atsushi Sasaki, and Yukio Tamura; 129(4), 470-7 (2003).

Satake, Naoki
Damping Evaluation Using Full-Scale Data of Buildings in Japan. — Naoki Satake, Ken-ichi Suda, Toshiharu Arakawa, Atsushi Sasaki, and Yukio Tamura; 129(4), 470-7 (2003).

Sato, Yuichi
Tension Stiffening and Crack Formation in Reinforced Concrete Members with Fiber-Reinforced Polymer Sheets. —Yuichi Sato and Frank J. Vecchio; 129(6), 717-24 (2003).

Sause, Richard
Closure to "Experimental Behavior of High Strength Square Concrete-Filled Steel Tube Beam-Columns" by Amit H. Varma, James M. Ricles, Richard Sause, and Le-We Lu. —Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 129(9), 1286 (2003).
Cyclic Load Tests and Analysis of Bolted Top-and-Seat Angle Connections. —Maria M. Garlock, James M. Ricles, and Richard Sause; 129(12), 1615-25 (2003).

Scarino, John H.
Discussion of "Buckling of Thin-Walled Silos and Tanks under Axial Load—Some New Aspects" by Martin Pircher and Russell Q. Bridge. —John H. Scarino; 129(5), 704 (2003).

Schafer, Benjamin W.
Local Buckling Tests on Cold-Formed Steel Beams. — Cheng Yu and Benjamin W. Schafer; 129(12), 1596-606 (2003).

Schinler, Daniel
Automated Design of Steel Frames Using Advanced Analysis and Object-Oriented Evolutionary Computation. —Christopher M. Foley and Daniel Schinler; 129(5), 648-60 (2003).

Scruggs, J. T.
Control of a Civil Structure Using an Electric Machine with Semiactive Capability. —J. T. Scruggs and W. D. Iwan; 129(7), 951-9 (2003).

Segurson, Anna
Design Wind Speed Prediction. —Anne M. Dougherty, Ross B. Corotis, and Anna Segurson; 129(9), 1268-74 (2003).

Seible, Frieder
Poststrengthening of Concrete Slabs: Full-Scale Testing and Design Recommendations. — Werner Seim, Alvaro Vasquez, Vistasp Karbhari, and Frieder Seible; 129(6), 743-52 (2003).
Cyclic Testing of Built-Up Steel Shear Links for the New Bay Bridge. — Cole C. McDaniel, Chia-Ming Uang, and Frieder Seible; 129(6), 801-9 (2003).

Seim, Werner
Poststrengthening of Concrete Slabs: Full-Scale Testing and Design Recommendations. — Werner Seim, Alvaro Vasquez, Vistasp Karbhari, and Frieder Seible; 129(6), 743-52 (2003).

Selle, Ricky
Connectors for Timber–Lightweight Concrete Composite Structures. — Eric Steinberg, Ricky Selle, and Thorsten Faust; 129(11), 1538-45 (2003).

Shanmugam, N. E.
Steel–Concrete Composite Plate Girders Subject to Shear Loading. — N. E. Shanmugam and K. Baskar; 129(9), 1230-42 (2003).

Sharma, R. K.
Effect of Creep and Shrinkage on RC Frames with High Beam Stiffness. — Savita Maru, M. Asfaw, R. K. Sharma, and A. K. Nagpal; 129(4), 536-43 (2003).

Shea, Kristina
Adjustable Tensegrity Structures. —Etienne Fest, Kristina Shea, Bernd Domer, and Ian F. C. Smith; 129(4), 515-26 (2003).

Shi, Zihai
Numerical Analysis of Multiple Discrete Cracks in Concrete Dams Using Extended Fictitious Crack Model. —Zihai Shi, Masaki Suzuki, and Masaaki Nakano; 129(3), 324-36 (2003).

Shimizu, Kan
Switching Oil Damper with Built-in Controller for Structural Control. —Haruhiko Kurino, Jun Tagami, Kan Shimizu, and Takuji Kobori; 129(7), 895-904 (2003).

Shin, Hyun Mock
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. I: Theory and Formulation. —Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1199-207 (2003).

Shin, Y.
Moment Magnifier Method for Long-Term Behavior of Flat Plates Subjected to In-Plane Compression. — K. Choi, H. Park, and Y. Shin; 129(1), 87-95 (2003).

Shugyo, Minoru
Elastoplastic Large Deflection Analysis of Three-Dimensional Steel Frames. —Minoru Shugyo; 129(9), 1259-67 (2003).

Silva, L. A. P.
Rotational Stiffness of Rectangular Hollow Sections Composite Joints. —L. A. P. Silva, L. F. N. Neves, and F. C. T. Gomes; 129(4), 487-94 (2003).

Simiu, E.
Closure to "Database-Assisted Design, Standardization, and Wind Direction Effects" by Antonio Rigato, Peter Chang, and Emil Simiu. —A. Rigato, P. Chang, and E. Simiu; 129(2), 274-5 (2003).

Simiu, Emil
Wind Speeds in ASCE 7 Standard Peak-Gust Map: Assessment. — Emil Simiu, Roseanne Wilcox, Fahim Sadek, and James J. Filliben; 129(4), 427-39 (2003).
Discussion of "Definition of Wind Profiles in ASCE 7" by Yin Zhou and Ahsan Kareem. — Emil Simiu, Fahim Sadek, and Michael A. Riley; 129(11), 1564-5 (2003).

Singh, Prabhjeet
Behavior of Shear Studs Subjected to Fully Reversed Cyclic Loading. — Scott A. Civjan and Prabhjeet Singh; 129(11), 1466-74 (2003).

Sirca, Gene F., Jr.
Closure to "Neural Network Model for Uplift Load Capacity of Metal Roof Panels" by Gene F. Sirca Jr. and Hojjat Adeli. — Gene F. Sirca, Jr., and Hojjat Adeli; 129(4), 562-3 (2003).

Skelton, R. E.
"Convexifying" Linear Matrix Inequality Methods for Integrating Structure and Control Design. — Juan F. Camino, M. C. de Oliveira, and R. E. Skelton; 129(7), 978-88 (2003).

Smith, Ian F. C.
Adjustable Tensegrity Structures. —Etienne Fest, Kristina Shea, Bernd Domer, and Ian F. C. Smith; 129(4), 515-26 (2003).
Combining Dynamic Relaxation Method with Artificial Neural Networks to Enhance Simulation of Tensegrity Structures. —Bernd Domer, Etienne Fest, Vikram Lalit, and Ian F. C. Smith; 129(5), 672-81 (2003).

Smittakorn, Watanachai
Adaptive Wood Composite: Experiment. —Watanachai Smittakorn and Paul R. Heyliger; 129(5), 699-702 (2003).

Snijder, H. H.
Preliminary Analysis of High-Rise Braced Frames with Facade Riggers. —J. C. D. Hoenderkamp and H. H. Snijder; 129(5), 640-7 (2003).

Soh, C. K.
Stress and Strain Concentration Factors of Completely Overlapped Tubular K(N) Joints. —W. M. Gho, T. C. Fung, and C. K. Soh; 129(1), 21-9 (2003).

Song, S.-H.
Structural Reliability/Redundancy under Earthquakes. — Y. K. Wen and S.-H. Song; 129(1), 56-67 (2003).

Sonmez, Mustafa
Closure to "Inelastic Large Deflection Modeling of Beam-Columns" by Morteza A. M. Torkamani and Mustafa Sonmez. —Morteza A. M. Torkamani and Mustafa Sonmez; 129(1), 136-7 (2003).

Sotelino, E. D.
Parallel Processing Techniques in Structural Engineering Applications. —E. D. Sotelino; 129(12), 1698-706 (2003).

Sozen, Mete A.
Drift Limits of High-Strength Concrete Columns Subjected to Load Reversals. —Adolfo B. Matamoros and Mete A. Sozen; 129(3), 297-313 (2003).

Spacone, Enrico
Closure to "Reinforced Concrete Frame Element with Bond Interfaces. II: State Determination and Numerical Validation" by Sucharat Limkatanyu and Enrico Spacone. — Sucharat Limkatanyu and Enrico Spacone; 129(10), 1430 (2003).

Spencer, B. F., Jr.
State of the Art of Structural Control. — B. F. Spencer, Jr., and S. Nagarajaiah; 129(7), 845-56 (2003).

Spencer, Billie F., Jr.
Control of Seismically Excited Cable-Stayed Bridge Employing Magnetorheological Fluid Dampers. — Hyung-Jo Jung, Billie F. Spencer, Jr., and In-Won Lee; 129(7), 873-83 (2003).

Srinivasan, C. N.
Discussion of "Experimental Behavior of High Strength Square Concrete-Filled Steel Tube Beam-Columns" by Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu. — C. N. Srinivasan; 129(9), 1285-6 (2003).

Stallings, J. Michael
Lateral-Torsional Buckling of Stepped Beams. — Jong S. Park and J. Michael Stallings; 129(11), 1457-65 (2003).

Steinberg, Eric
Connectors for Timber–Lightweight Concrete Composite Structures. —Eric Steinberg, Ricky Selle, and Thorsten Faust; 129(11), 1538-45 (2003).

Stenger, Frank
Effect of Reduced Beam Section Frame Elements on Stiffness of Moment Frames. —Janice J. Chambers, Shaheed Almudhafar, and Frank Stenger; 129(3), 383-93 (2003).

Stubbs, Norris
Nondestructive Crack Detection Algorithm for Full-Scale Bridges. —Jeong-Tae Kim and Norris Stubbs; 129(10), 1358-66 (2003).

Suda, Ken-ichi
Damping Evaluation Using Full-Scale Data of Buildings in Japan. —Naoki Satake, Ken-ichi Suda, Toshiharu Arakawa, Atsushi Sasaki, and Yukio Tamura; 129(4), 470-7 (2003).

Sultan, M. A.
Effect of Strength and Fiber Reinforcement on Fire Resistance of High-Strength Concrete Columns. —V. K. R. Kodur, Fu-Ping Cheng, Tien-Chih Wang, and M. A. Sultan; 129(2), 253-9 (2003).

Sun, Xiaohong
Closure to "Base-Isolated FCC Building: Impact Response in Northridge Earthquake" by Satish Nagarajaiah and Xiaohong Sun. —Satish Nagarajaiah and Xiaohong Sun; 129(3), 422-3 (2003).

Surry, D.
Discussion of "Database-Assisted Design, Standardization, and Wind Direction Effects" by Antonio Rigato, Peter Chang, and Emil Simiu. —M. Pande, G. A. Kopp, and D. Surry; 129(2), 272-4 (2003).

Suzuki, Masaki
Numerical Analysis of Multiple Discrete Cracks in Concrete Dams Using Extended Fictitious Crack Model. —Zihai Shi, Masaki Suzuki, and Masaaki Nakano; 129(3), 324-36 (2003).

Swan, Colby C.
Form Finding of Sparse Structures with Continuum Topology Optimization. — Salam Rahmatalla and Colby C. Swan; 129(12), 1707-16 (2003).

Tagami, Jun
Switching Oil Damper with Built-in Controller for Structural Control. — Haruhiko Kurino, Jun Tagami, Kan Shimizu, and Takuji Kobori; 129(7), 895-904 (2003).

Takewaki, Izuru
Errata for "Robust Building Stiffness Design for Variable Critical Excitations" by Izuru Takewaki. — Izuru Takewaki; 129(3), 424 (2003).

Tamura, Yukio
Damping Evaluation Using Full-Scale Data of Buildings in Japan. — Naoki Satake, Ken-ichi Suda, Toshiharu Arakawa, Atsushi Sasaki, and Yukio Tamura; 129(4), 470-7 (2003).

Tan, K. H.
Plastic Limit Temperatures of Flexibly Connected Steel Frames: A Linear Programming Problem. — V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(1), 79-86 (2003).
Nonlinear Elastoplastic Analysis of Semirigid Steel Frames at Elevated Temperature: MP Approach. —V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(5), 661-71 (2003).
Fire Resistance of Four-Face Heated Reinforced Concrete Columns. —K. H. Tan and Y. Yao; 129(9), 1220-9 (2003).
Analytical Fire Resistance of Axially Restrained Steel Columns. —Z. F. Huang and K. H. Tan; 129(11), 1531-7 (2003).

Tang, Chao-Wei
Modeling Confinement Efficiency of Reinforced Concrete Columns with Rectilinear Transverse Steel Using Artificial Neural Networks. —Chao-Wei Tang, How-Ji Chen, and Tsong Yen; 129(6), 775-83 (2003).

Tang, J.
Calculation of Moments on Top Slab in Single-Cell Box Girders. —Q. Z. Luo, J. Tang, and Q. S. Li; 129(1), 130-4 (2003).
Closure to "Negative Shear Lag Effect in Box Girders with Varying Depth" by Q. Z. Luo, J. Tang, and Q. S. Li. —Q. Z. Luo, J. Tang, and Q. S. Li; 129(2), 271-2 (2003).

Tavakkolizadeh, M.
Strengthening of Steel-Concrete Composite Girders Using Carbon Fiber Reinforced Polymers Sheets. — M. Tavakkolizadeh and H. Saadatmanesh; 129(1), 30-40 (2003).
Fatigue Strength of Steel Girders Strengthened with Carbon Fiber Reinforced Polymer Patch. —M. Tavakkolizadeh and H. Saadatmanesh; 129(2), 186-96 (2003).

Tena-Colunga, Arturo
Discussion of "Behavior and Modeling of Nonprismatic Members Having T-Sections" by Can Balkaya. — Arturo Tena-Colunga; 129(3), 414-9 (2003).

Teng, J. G.
Shear Capacity of Fiber-Reinforced Polymer-Strengthened Reinforced Concrete Beams: Fiber Reinforced Polymer Rupture. —J. F. Chen and J. G. Teng; 129(5), 615-25 (2003).

Thelandersson, Sven
Behavior of Reinforced Concrete Beams with Loss of Bond at Longitudinal Reinforcement. — Joakim Jeppsson and Sven Thelandersson; 129(10), 1376-83 (2003).

Thomas, S. J.
Cross-Sectional Compactness and Bracing Requirements for HPS483W Girders. — S. J. Thomas and C. J. Earls; 129(12), 1569-83 (2003).

Thomas, Wilfred H.
Models for Concentrated Load Performance Assessment of Isotropic Wood Floor Sheathing. — Wilfred H. Thomas; 129(8), 1080-6 (2003).

Ting, S. K.
Plastic Limit Temperatures of Flexibly Connected Steel Frames: A Linear Programming Problem. — V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(1), 79-86 (2003).
Nonlinear Elastoplastic Analysis of Semirigid Steel Frames at Elevated Temperature: MP Approach. — V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(5), 661-71 (2003).

Tong, Genshu
Discussion of "Inelastic Large Deflection Modeling of Beam-Columns" by Morteza A. M. Torkamani and Mustafa Sonmez. —Ji Yuan and Genshu Tong; 129(1), 135-6 (2003).

Torkamani, Morteza A. M.
Closure to "Inelastic Large Deflection Modeling of Beam-Columns" by Morteza A. M. Torkamani and Mustafa Sonmez. —Morteza A. M. Torkamani and Mustafa Sonmez; 129(1), 136-7 (2003).

Trahair, N. S.
Lateral Buckling Strengths of Steel Angle Section Beams. —N. S. Trahair; 129(6), 784-91 (2003).

Tremblay, R.
Seismic Response of Concentrically Braced Steel Frames Made with Rectangular Hollow Bracing Members. —R. Tremblay, M.-H. Archambault, and A. Filiatrault; 129(12), 1626-36 (2003).

Tremblay, Robert
Long-Term Behavior and Strength of Partially Encased Composite Columns Made with Built-Up Steel Shapes. —Thierry Chicoine, Bruno Massicotte, and Robert Tremblay; 129(2), 141-50 (2003).
Inelastic Seismic Response of Side Lap Fasteners for Steel Roof Deck Diaphragms. —Colin A. Rogers and Robert Tremblay; 129(12), 1637-46 (2003).
Inelastic Seismic Response of Frame Fasteners for Steel Roof Deck Diaphragms. —Colin A. Rogers and Robert Tremblay; 129(12), 1647-57 (2003).
Behavior of Roof Deck Diaphragms under Quasi-static Cyclic Loading. —Hesham S. Essa, Robert Tremblay, and Colin A. Rogers; 129(12), 1658-66 (2003).

Tumialan, J. Gustavo
Field Assessment of Unreinforced Masonry Walls Strengthened with Fiber Reinforced Polymer Laminates. — J. Gustavo Tumialan, Nestore Galati, and Antonio Nanni; 129(8), 1047-56 (2003).

Turan, G.
Phase I Benchmark Control Problem for Seismic Response of Cable-Stayed Bridges. — S. J. Dyke, J. M. Caicedo, G. Turan, L. A. Bergman, and S. Hague; 129(7), 857-72 (2003).

Uang, Chia-Ming
Cyclic Testing of Built-Up Steel Shear Links for the New Bay Bridge. — Cole C. McDaniel, Chia-Ming Uang, and Frieder Seible; 129(6), 801-9 (2003).
Effects of Loading Protocol on the Cyclic Response of Woodframe Shearwalls. — Kip Gatto and Chia-Ming Uang; 129(10), 1384-93 (2003).
Effects of Finish Materials and Dynamic Loading on the Cyclic Response of Woodframe Shearwalls. — Chia-Ming Uang and Kip Gatto; 129(10), 1394-402 (2003).

Uy, Brian
Strength of Concrete Filled Steel Box Columns Incorporating Interaction Buckling. — Mohanad Mursi and Brian Uy; 129(5), 626-39 (2003).

Val, Dimitri V.
Reliability of Fiber-Reinforced Polymer-Confined Reinforced Concrete Columns. — Dimitri V. Val; 129(8), 1122-30 (2003).

van de Lindt, John W.
Development and Application of Wood Shear Wall Reliability Model. —John W. van de Lindt and Matthew A. Walz; 129(3), 405-13 (2003).

Van Dessel, Steven
Feasibility and Optimization of Rigidified Inflatable Structures for Housing. —Steven Van Dessel, Achille Messac, Anoop A. Mullur, and Amy A. Farina; 129(11), 1494-502 (2003).

Varki, Riya Mariam
Discussion of "Neural Network Model for Uplift Load Capacity of Metal Roof Panels" by Gene F. Sirca Jr. and Hojjat Adeli. —Sundaramoorthy Rajasekaran and Riya Mariam Varki; 129(4), 562 (2003).

Varma, Amit H.
Closure to "Experimental Behavior of High Strength Square Concrete-Filled Steel Tube Beam-Columns" by Amit H. Varma, James M. Ricles, Richard Sause, and Le-We Lu. —Amit H. Varma, James M. Ricles, Richard Sause, and Le-Wu Lu; 129(9), 1286 (2003).

Vasquez, Alvaro
Poststrengthening of Concrete Slabs: Full-Scale Testing and Design Recommendations. —Werner Seim, Alvaro Vasquez, Vistasp Karbhari, and Frieder Seible; 129(6), 743-52 (2003).

Vecchio, Frank J.
Tension Stiffening and Crack Formation in Reinforced Concrete Members with Fiber-Reinforced Polymer Sheets. —Yuichi Sato and Frank J. Vecchio; 129(6), 717-24 (2003).

Ventura, Carlos E.
Discussion of "Base-Isolated FCC Building: Impact Response in Northridge Earthquake" by Satish Nagarajaiah and Xiaohong Sun. —Bruce F. Maison and Carlos E. Ventura; 129(3), 421-2 (2003).

Vian, Darren
Tests to Structural Collapse of Single Degree of Freedom Frames Subjected to Earthquake Excitations. — Darren Vian and Michel Bruneau; 129(12), 1676-85 (2003).

Vimonsatit, V.
Plastic Limit Temperatures of Flexibly Connected Steel Frames: A Linear Programming Problem. — V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(1), 79-86 (2003).
Nonlinear Elastoplastic Analysis of Semirigid Steel Frames at Elevated Temperature: MP Approach. — V. Vimonsatit, K. H. Tan, and S. K. Ting; 129(5), 661-71 (2003).

Vukazich, Steven M.
Quasi-Static Reversed Cyclic Response of Level and Stepped Cripple Walls. — Y. H. Chai, Tara C. Hutchinson, and Steven M. Vukazich; 129(5), 567-75 (2003).

Walz, Matthew A.
Development and Application of Wood Shear Wall Reliability Model. — John W. van de Lindt and Matthew A. Walz; 129(3), 405-13 (2003).

Wang, Li-Xin
Adaptive Fuzzy Control for Nonlinear Building-Magnetorheological Damper System. — Li Zhou, Chih-Chen Chang, and Li-Xin Wang; 129(7), 905-13 (2003).

Wang, Tien-Chih
Effect of Strength and Fiber Reinforcement on Fire Resistance of High-Strength Concrete Columns. —V. K. R. Kodur, Fu-Ping Cheng, Tien-Chih Wang, and M. A. Sultan; 129(2), 253-9 (2003).

Wang, Z. Y.
Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. —S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).

Wang, Zhaomin
Active Multiple Tuned Mass Dampers: A New Control Strategy. —Chunxiang Li, Yanxia Liu, and Zhaomin Wang; 129(7), 972-7 (2003).

Wen, Y. K.
Structural Reliability/Redundancy under Earthquakes. — Y. K. Wen and S.-H. Song; 129(1), 56-67 (2003).

Wilcox, Roseanne
Wind Speeds in ASCE 7 Standard Peak-Gust Map: Assessment. —Emil Simiu, Roseanne Wilcox, Fahim Sadek, and James J. Filliben; 129(4), 427-39 (2003).

Williams, M. S.
Nonlinear Vibration Characteristics of Damaged Concrete Beams. —S. A. Neild, M. S. Williams, and P. D. McFadden; 129(2), 260-8 (2003).

Williamson, Eric B.
Evaluation of Damage and P-Δ Effects for Systems Under Earthquake Excitation. —Eric B. Williamson; 129(8), 1036-46 (2003).

Wong, Y. L.
Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. —S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).

Wood, Laurence
Concrete Uniaxial Tensile Strength and Cylinder Splitting Test. —Zhuhai Lin and Laurence Wood; 129(5), 692-8 (2003).

Wrobleski, Michael S.
Identification of Simplified Models Using Adaptive Control Techniques. — Michael S. Wrobleski and Henry T. Y. Yang; 129(7), 989-97 (2003).

Wu, B.
Drift Capacity of Rectangular Reinforced Concrete Columns with Low Lateral Confinement and High-Axial Load. — S. S. E. Lam, B. Wu, Y. L. Wong, Z. Y. Wang, Z. Q. Liu, and C. S. Li; 129(6), 733-42 (2003).

Wu, Hui
Retrofit of Reinforced Concrete Columns Using Partially Stiffened Steel Jackets. — Yan Xiao and Hui Wu; 129(6), 725-32 (2003).

Wu, Ming-Hsien
Nonlinear Analysis of Axially Loaded Concrete-Filled Tube Columns with Confinement Effect. — Hsuan-Teh Hu, Chiung-Shiann Huang, Ming-Hsien Wu, and Yih-Min Wu; 129(10), 1322-9 (2003).

Wu, Xiao-Han
Tendon Model for Nonlinear Analysis of Externally Prestressed Concrete Structures. — Xiao-Han Wu and Xilin Lu; 129(1), 96-104 (2003).

Wu, Y. F.
Improving the Strength and Ductility of Rectangular Reinforced Concrete Columns through Composite Partial Interaction: Tests. —Y. F. Wu, M. C. Griffith, and D. J. Oehlers; 129(9), 1183-90 (2003).

Wu, Yih-Min
Nonlinear Analysis of Axially Loaded Concrete-Filled Tube Columns with Confinement Effect. —Hsuan-Teh Hu, Chiung-Shiann Huang, Ming-Hsien Wu, and Yih-Min Wu; 129(10), 1322-9 (2003).

Xiao, Yan
Retrofit of Reinforced Concrete Columns Using Partially Stiffened Steel Jackets. —Yan Xiao and Hui Wu; 129(6), 725-32 (2003).

Xiao, Yugang
Ultimate Compressive Strength of Aluminum Plate Elements. —Yugang Xiao and Craig C. Menzemer; 129(11), 1441-7 (2003).

Xu, Y. L.
Experimental Seismic Study of Adjacent Buildings with Fluid Dampers. —Z. Yang, Y. L. Xu, and X. L. Lu; 129(2), 197-205 (2003).

Yalcin, Cem
External Prestressing Concrete Columns for Improved Seismic Shear Resistance. —Murat Saatcioglu and Cem Yalcin; 129(8), 1057-70 (2003).

Yalla, Swaroop K.
Semiactive Tuned Liquid Column Dampers: Experimental Study. —Swaroop K. Yalla and Ahsan Kareem; 129(7), 960-71 (2003).

Yam, Michael C. H.
Local Web Buckling Strength of Coped Steel I Beams. — Michael C. H. Yam, Angus C. C. Lam, V. P. Iu, and J. J. R. Cheng; 129(1), 3-11 (2003).

Yang, Henry T. Y.
Identification of Simplified Models Using Adaptive Control Techniques. —Michael S. Wrobleski and Henry T. Y. Yang; 129(7), 989-97 (2003).

Yang, J. N.
Applications of Some Semiactive Control Systems to Benchmark Cable-Stayed Bridge. — A. K. Agrawal, J. N. Yang, and W. L. He; 129(7), 884-94 (2003).
Novel Semiactive Friction Controller for Linear Structures against Earthquakes. — W. L. He, A. K. Agrawal, and J. N. Yang; 129(7), 941-50 (2003).

Yang, S. C.
Ultimate Strength of Ribbed Slab Composite Beams with Web Openings. — J. W. Park, C. H. Kim, and S. C. Yang; 129(6), 810-7 (2003).

Yang, You-Fu
Experimental Study and Calculation of Fire Resistance of Concrete-Filled Hollow Steel Columns. — Lin-Hai Han, Xiao-Ling Zhao, You-Fu Yang, and Jiu-Bin Feng; 129(3), 346-56 (2003).

Yang, Z.
Experimental Seismic Study of Adjacent Buildings with Fluid Dampers. — Z. Yang, Y. L. Xu, and X. L. Lu; 129(2), 197-205 (2003).

Yao, Y.
Fire Resistance of Four-Face Heated Reinforced Concrete Columns. — K. H. Tan and Y. Yao; 129(9), 1220-9 (2003).

Yen, Tsong
Modeling Confinement Efficiency of Reinforced Concrete Columns with Rectilinear Transverse Steel Using Artificial Neural Networks. — Chao-Wei Tang, How-Ji Chen, and Tsong Yen; 129(6), 775-83 (2003).

Yin, Ying-Zhi
Experimental Studies on the Properties of Constructional Steel at Elevated Temperatures. — Guo-Qiang Li, Shou-Chao Jiang, Ying-Zhi Yin, Kai Chen, and Ming-Fei Li; 129(12), 1717-21 (2003).

Yoo, Chai H.
New Design Rule for Intermediate Transverse Stiffeners Attached on Web Panels. — Sung C. Lee, Chai H. Yoo, and Dong Y. Yoon; 129(12), 1607-14 (2003).

Yoon, Chongyul
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. I: Theory and Formulation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1199-207 (2003).
Inelastic Behavior and Ductility Capacity of Reinforced Concrete Bridge Piers under Earthquake. II: Numerical Validation. — Tae-Hoon Kim, Kwang-Myong Lee, Chongyul Yoon, and Hyun Mock Shin; 129(9), 1208-19 (2003).

Yoon, Dong Y.
New Design Rule for Intermediate Transverse Stiffeners Attached on Web Panels. — Sung C. Lee, Chai H. Yoo, and Dong Y. Yoon; 129(12), 1607-14 (2003).

Young, Ben
Experimental Investigation of Cold-Formed Stainless Steel Columns. — Ben Young and Yahua Liu; 129(2), 169-76 (2003).
Cold-Formed Steel Channels Subjected to Concentrated Bearing Load. — Ben Young and Gregory J. Hancock; 129(8), 1003-10 (2003).
Compression Tests of Channels with Inclined Simple Edge Stiffeners. — Ben Young and Gregory J. Hancock; 129(10), 1403-11 (2003).

Yu, Cheng
Local Buckling Tests on Cold-Formed Steel Beams. — Cheng Yu and Benjamin W. Schafer; 129(12), 1596-606 (2003).

Yuan, Ji
Discussion of "Inelastic Large Deflection Modeling of Beam-Columns" by Morteza A. M. Torkamani and Mustafa Sonmez. — Ji Yuan and Genshu Tong; 129(1), 135-6 (2003).

Zararis, Prodromos D.
Shear Compression Failure in Reinforced Concrete Deep Beams. — Prodromos D. Zararis; 129(4), 544-53 (2003).

Zha, Yufeng
Experimental and Numerical Prediction of Collapse of Flatbar Stiffeners in Aluminum Panels. — Yufeng Zha and Torgeir Moan; 129(2), 160-8 (2003).

Zhao, Xiao-Ling
Experimental Study and Calculation of Fire Resistance of Concrete-Filled Hollow Steel Columns. — Lin-Hai Han, Xiao-Ling Zhao, You-Fu Yang, and Jiu-Bin Feng; 129(3), 346-56 (2003).
Tests of Cold-Formed Circular Tubular Braces under Cyclic Axial Loading. — Mohamed Elchalakani, Xiao-Ling Zhao, and Raphael Grzebieta; 129(4), 507-14 (2003).

Zhao, Yan-Gang
System Reliability Assessment by Method of Moments. — Yan-Gang Zhao and Alfredo H-S. Ang; 129(10), 1341-9 (2003).

Zhou, Li
Adaptive Fuzzy Control for Nonlinear Building-Magnetorheological Damper System. — Li Zhou, Chih-Chen Chang, and Li-Xin Wang; 129(7), 905-13 (2003).

Zhou, Yin
Aerodynamic Loads on Tall Buildings: Interactive Database. — Yin Zhou, Tracy Kijewski, and Ahsan Kareem; 129(3), 394-404 (2003).
Closure to "Definition of Wind Profiles in ASCE 7" by Yin Zhou and Ahsan Kareem. — Yin Zhou and Ahsan Kareem; 129(11), 1565-6 (2003).

Zimmerman, David C.
Advances in Ritz Vector Identification. — Thomas Boxoen and David C. Zimmerman; 129(8), 1131-40 (2003).

Zou, Guiping
Local Buckling of Composite Fiber-Reinforced Plastic Wide-Flange Sections. — Pizhong Qiao and Guiping Zou; 129(1), 125-9 (2003).
